Total Questions	:	60	Question	n Bo	okle	t Ser	ies	\triangle	
Time Allowed	:	70 Minutes	Roll No. :						

Instructions for Candidates:

- 1. Write your Entrance Test Roll Number in the space provided at the top of this page of Question Booklet and fill up the necessary information in the spaces provided on the OMR Answer Sheet.
- 2. OMR Answer Sheet has an Original Copy and a Candidate's Copy glued beneath it at the top. While making entries in the Original Copy, candidate should ensure that the two copies are aligned properly so that the entries made in the Original Copy against each item are exactly copied in the Candidate's Copy.
- 3. All entries in the OMR Answer Sheet, including answers to questions, are to be recorded in the Original Copy only.
- 4. Choose the correct / most appropriate response for each question among the options A, B, C and D and darken the circle of the appropriate response completely. The incomplete darkened circle is not correctly read by the OMR Scanner and no complaint to this effect shall be entertained.
- 5. Use only blue/black ball point pen to darken the circle of correct/most appropriate response. In no case gel/ink pen or pencil should be used.
- 6. Do not darken more than one circle of options for any question. A question with more than one darkened response shall be considered wrong.
- 7. There will be 'Negative Marking' for wrong answers. Each wrong answer will lead to the deduction of 0.25 marks from the total score of the candidate.
- 8. Only those candidates who would obtain positive score in Entrance Test Examination shall be eligible for admission.
- 9. Do not make any stray mark on the OMR sheet.
- 10. Calculators and mobiles shall not be permitted inside the examination hall.
- 11. Rough work, if any, should be done on the blank sheets provided with the question booklet.
- 12. OMR Answer Sheet must be handled carefully and it should not be folded or mutilated in which case it will not be evaluated.
- 13. Ensure that your OMR Answer Sheet has been signed by the Invigilator and the candidate himself/herself.
- 14. At the end of the examination, hand over the OMR Answer Sheet to the invigilator who will first tear off the original OMR sheet in presence of the Candidate and hand over the Candidate's Copy to the candidate.

1.	(101	$01)_2 + (1101)_2 =$	6.	It is l	believed by some geologists that Dal Lake is the
	(A)	$(110010)_2$		rem	nant of a Pleistocene oligotrophic lake.
	(B)	$(110101)_2$		Pleis	stocene Epoch began around:
	(C)	$(100010)_2$		(A)	1.8 million years ago
	(D)	$(101100)_2$		(B)	2.58 million years ago
2.	SSD	stands for :		(C)	3.6 million years ago
	(A)	Solid Storage Drive		(D)	5.33 million years ago
	(B)	Serial Storage Drive	7.	Playa	a is a landform associated with:
	(C)	Solid Static Drive		(A)	Glaciers
	(D)	Solid State Drive		(B)	Deserts
3.	Whi	ch one is not a GIS programming language?		(C)	River basin
	(A)	Fedora		(D)	Coasts
	(B)	Java	8.	An o	overturned fold in which the axial surface is more
	(C)	C++		or le	ss horizontal, is called:
	(D)	Python		(A)	Recumbent fold
4.		is a network of devices that have		(B)	Chevron fold
	emb	edded hardware and software to communicate		(C)	Isoclinal fold
	(con	nect and exchange data) with other devices on		(D)	Ptygmatic fold
	the s	ame network.	9.	Head	dquarters of the National Bureau of Soil Survey
	(A)	Internet of Things		& La	and Use Planning is located in:
	(B)	Virtual Private Network		(A)	Hyderabad
	(C)	Telnet		(B)	Srinagar
	(D)	Ping		(C)	Nagpur
5.	The	boundary surface between the earth's mantle and		(D)	Lucknow
	core	is called:	10.	Exfo	liation is a result of:
	(A)	Gutenberg discontinuity		(A)	Metamorphism
	(B)	Mohorovicic discontinuity		(B)	Physical Weathering
	(C)	Lehmann discontinuity		(C)	Chemical Weathering
	(D)	Conrad discontinuity		(D)	Splash Erosion
СМ	.2955	32 A	,		

11.	The	basis of Land Capability Classification is:	17.	Pong	g Reservoir is built on which river?
	(A)	Existing fertility and productivity		(A)	Beas
	(B)	The potential for agricultural and other uses		(B)	Sutlej
	(C)	Capacity to resist soil erosion		(C)	Myntdu
	(D)	All of these		(D)	Kopili
12.		ch factor is not important for soil formation?	10		_
	(A)	Time	18.	-	potranspiration may be measured by:
	(B)	Parent material		(A)	Pyranometer
	(C)	Gravity		(B)	Hypsometer
	(D)	Climate		(C)	Hygrometer
13.		visible portion of EMR lies between:		(D)	Lysimeter
	(A)	0.2 and 0.5 micrometers	19.	Hyd	ropower potential estimation is not dependent
	(B)	0.4 and 0.7 micrometers		on:	
	(C)	0.6 and 0.9 micrometers		(A)	Head
1.4	(D)	None of the above		(B)	Reservoir Volume
14.	(A)	ch one is an Indian Remote Sensing Satellite? Formosat		` ′	
	(B)	Envisat		(C)	Gravity
	(C)	Radarsat		(D)	Steam flow
	(D)	Cartosat	20.	-	ply rising ground slopes marking the outer limits
15.	GIS			of a	floodplain are called:
10.		A container of maps in digital form		(A)	Bluff
		A computerized tool for solving geographic		(B)	Levee
	` /	problems		(C)	Backswamp
	(C)	A spatial decision support system		(D)	Neck
	(D)	All of the above	21.	A ra	pidly descending mass, usually of snow, down a
16.	In a	topographic map, a few contours are almost			ntainside is called :
	supe	rimposed over one another. It indicates:		(A)	Subsidence
	(A)	Gentle slope		` ′	
	(B)	Cliff		(B)	Rock slide
	(C)	Spur		(C)	Debris slide
	(D)	None of these		(D)	Avalanche

(A) Jasrota (B) Overa Aru (C) Kibber (B) Govera Aru (C) Kibber (C) Cartogram (D) Heat map

32.	The movement of materials from the leaves to other tissues of the plant is called:	37.	. Which law describes the orbits of planets around the sun?
	(A) Tropic movement		(A) Newton's law
	(B) Guttation		(B) Faraday's law
	(C) Transpiration		(C) Kepler's law
	(D) Translocation		(D) Kirchoff's Law
33.	The small intestine of a human has three parts. The	38.	. The first law of thermodynamics is the principle of :
33.	middle part is called:		(A) Conservation of mass
	(A) Duodenum		(B) Conservation of energy
	(B) Jejunum		(C) Conservation of charge
			(D) None of the above
	(C) Ileum	39.	. Light travels :
2.4	(D) Colon		(A) Fastest in vacuum
34.	The transition between forest and grassland biomes is called:		(B) Fastest in water
			(C) Fastest in air
	(A) Tundra		(D) Independent of the medium
	(B) Savanna	40.	. Which one is not a magnetic material?
	(C) Taiga		(A) Iron
	(D) None of these		(B) Nickel
35.	Which one is not an endocrine gland?		(C) Cobalt
	(A) Mucous		(D) Zinc
	(B) Pituitary	41.	. Isotopes of an element have :
	(C) Adrenal		(A) Different chemical and physical properties
	(D) Pancreas		(B) Similar chemical and physical properties
36.	Alfred Russel Wallace divided the earth into how many	,	(C) Similar chemical but different physical properties
	biogeographic realms based on the distribution of	:	(D) Similar physical but different chemical properties
	animals and plants ?	42.	. pH value less than 7 indicates that the solution is :
	(A) 4		(A) Acidic
	(B) 5		(B) Basic
	(C) 6		(C) Neutral
	(D) 7		(D) Hypotonic
SM	-29552–A	5	[Turn over

43.	Which law states that the volume of an ideal gas at	48.	Which glacier in Kashmir is locally named 'Gwash
	constant pressure is directly proportional to its		Brani' - Goddess of Light ?
	absolute temperature ?		(A) Thajwas
	(A) Joule's law		(B) Nehnar
	(B) Avogadro's law		(C) Kolahoi
	(C) Boyle's law		(D) Panjtarni
	(D) Charles's law	49.	Most of the weather phenomena take place in the :
44.	Removal of oxygen from a compound is an example		(A) Mesosphere
	of:		(B) Troposphere
	(A) Oxidation		(C) Stratosphere
	(B) Reduction		(D) Ionosphere
	(C) Oxygenation	50.	The solar energy received at the earth's surface is
	(D) None of the above	50.	called:
45.	The main aim of social forestry is:		(A) Energy budget
	(A) To utilize the wasteland		(B) Diffusion
	(B) To meet the requirement of fuel wood and		
	fodder		(C) Albedo
	(C) To create an ecological balance		(D) Insolation
	(D) None of these	51.	Which among the following is not a renewable source
46.	In a food chain, the third trophic level is always		of energy?
	occupied by :		(A) Solar energy
	(A) Carnivores		(B) Biomass energy
	(B) Herbivores		(C) Hydro-power
	(C) Producers		(D) Geothermal energy
	(D) Decomposers	52.	Which one is a reliable tool for studying
47.	Which biogeochemical cycle is the slowest?		paleoclimates ?
	(A) Carbon		(A) Tree-ring reconstruction
	(B) Nitrogen		(B) Ice-core study
	(C) Phosphorus		(C) Coral reefs
	(D) Sulphur		(D) All of these

- 53. In a negatively skewed distribution:
 - (A) Mean > Mode > Median
 - (B) Mode < Median > Mean
 - (C) Mode > Median > Mean
 - (D) Mean > Median > Mode
- 54. Sample is regarded as a subset of:
 - (A) Data
 - (B) Set
 - (C) Distribution
 - (D) Population
- 55. What among the following is not part of a regression 59. equation?
 - (A) Intercept
 - (B) Slope
 - (C) Coefficient of variation
 - (D) Error term
- 56. A scatterplot represents the relationship between:
 - (A) Cause and effects
 - (B) Cause and problem
 - (C) Effects and output
 - (D) Production and productivity

- 57. The value of Permutation(n, n-1) is:
 - (A) n
 - (B) n!
 - (C) 2n
 - (D) 2n!
- 58. The polynomial equation x (x + 1) + 8 = (x + 2) (x 2) is:
 - (A) Linear equation
 - (B) Quadratic equation
 - (C) Cubic equation
 - (D) Bi-quadratic equation
- 59. If a matrix P is of order 3×4 and a matrix Q is of order 4×3, then the order of QP is:
 - (A) 4×3
 - (B) 3×4
 - (C) 3×3
 - (D) 4×4
- 60. Which of the following statement is not correct?
 - (A) $\log_{10}(1) = 0$
 - (B) $\log_{10}(10) = 1$
 - (C) $\log (2+3) = \log (2 \times 3)$
 - (D) $\log (1+2+3) = \log 1 + \log 2 + \log 3$

Question Booklet Series

Roll No.:

B

Instructions for Candidates:

- 1. Write your Entrance Test Roll Number in the space provided at the top of this page of Question Booklet and fill up the necessary information in the spaces provided on the OMR Answer Sheet.
- 2. OMR Answer Sheet has an Original Copy and a Candidate's Copy glued beneath it at the top. While making entries in the Original Copy, candidate should ensure that the two copies are aligned properly so that the entries made in the Original Copy against each item are exactly copied in the Candidate's Copy.
- 3. All entries in the OMR Answer Sheet, including answers to questions, are to be recorded in the Original Copy only.
- 4. Choose the correct / most appropriate response for each question among the options A, B, C and D and darken the circle of the appropriate response completely. The incomplete darkened circle is not correctly read by the OMR Scanner and no complaint to this effect shall be entertained.
- 5. Use only blue/black ball point pen to darken the circle of correct/most appropriate response. In no case gel/ink pen or pencil should be used.
- 6. Do not darken more than one circle of options for any question. A question with more than one darkened response shall be considered wrong.
- 7. There will be 'Negative Marking' for wrong answers. Each wrong answer will lead to the deduction of 0.25 marks from the total score of the candidate.
- 8. Only those candidates who would obtain positive score in Entrance Test Examination shall be eligible for admission.
- 9. Do not make any stray mark on the OMR sheet.
- 10. Calculators and mobiles shall not be permitted inside the examination hall.
- 11. Rough work, if any, should be done on the blank sheets provided with the question booklet.
- 12. OMR Answer Sheet must be handled carefully and it should not be folded or mutilated in which case it will not be evaluated.
- 13. Ensure that your OMR Answer Sheet has been signed by the Invigilator and the candidate himself/herself.
- 14. At the end of the examination, hand over the OMR Answer Sheet to the invigilator who will first tear off the original OMR sheet in presence of the Candidate and hand over the Candidate's Copy to the candidate.

Which of the following UNS SDGs focuses on 6. The largest glacier in Kashmir Valley is: sustainable cities and communities? (A) Kolahoi (A) Goal 9 (B) Thajiwas (B) Goal 10 (C) Nehnar (C) Goal 11 (D) Shishram (D) Goal 12 The largest wetland of UT of J&K is: How many nation-states have signed UNFCCC? (A) Wular (A) 145 (B) Hokersar (B) 155 (C) Shallabug (C) 165 (D) Mansar (D) 175 Map scale is: Disaster Management Act was passed by Rajya (A) The ratio between a distance on a map and Sabha in: the corresponding distance on the ground (A) 2005 (B) The ratio between a distance on the ground (B) 2006 and the corresponding distance on a map (C) 2007 (C) The ratio between a distance on the ground (D) 2008 and the corresponding distance on a GPS Which of the following Acts was passed by the (D) All of these Indian Parliament in wake of the Bhopal Gas Eutrophication of lake ecosystems is due to: Tragedy? (A) High DO and bacteria (A) Environmental Protection Act (B) Nitrogen and phosphorous (B) Disaster Management Act (C) Chromium and mercury (C) Air (Prevention and Control of Pollution) Act (D) Lead and hydrogen sulphide (D) Water Pollution Act Which of the following regions has the highest Which one of the following is the largest National biodiversity? Park? (A) Tundra (A) Kazinag National Park (B) Taiga (B) Dachigam National Park (C) Mangroves (C) Hemis National Park

(D) Desert National Park

(D) Tropical rain-forest

-11.	The final stable community in an ecological 16. succession is called:	
	(A) Seral community	into the windpipe?
	(B) Final community	(A) Trachea
		(B) Larynx
	(C) Ultimate community	(C) Epiglottis
10	(D) Climax community	(D) Pharynx
12.	The process of weakening the seed coat to break 17. the dormancy is called:	Which of the following waves have the shortest wavelength?
	(A) Vernalisation	(A) Cosmic rays
	(B) Scarification	(B) X-rays
	(C) Stratification	(C) Microwaves
	(D) None of the above	(D) Radiowaves
13.	Which of the following is a state bird of UT of 18.	The speed of light in vacuum is approximately:
	J&K ?	(A) 300000 km/s
	(A) Kalij Pheasant	(B) 300000 m/s
	(B) Black-necked crane	(C) 300000 mi/s
	(C) Paradise flycatcher	(D) 300000 cm/s
	(D) Himalayan vulture 19.	When a cricket ball is thrown up vertically, the
14.	Which of the following natural regions is known	force of gravity acting on it:
	as the 'Land of Big Games'?	(A) Is opposite to the direction of motion of the
	(A) Temperate grassland	ball
	(B) Tropical monsoon region	(B) Is in the same direction of motion as the ball
	(C) Tropical savannah region	(C) Increases as it rises up
	(D) Tundra	(D) None of the above
15.	Permafrost is found in which of the following 20.	What happens when light travels from air to
	biomes?	glass?
	(A) Tundra	(A) It bends towards the normal
	(B) Taiga	(B) It bends away from the normal
	(C) Grassland	(C) It becomes parallel to the normal
	(D) Forest	(D) There is no change
		work pain to IIX (1)

21.	The density of water is maximum at:	26.	How does the concentration of carbon dioxide in the atmosphere affect climate?
	(A) 0°C(B) 1°C		(A) As carbon dioxide concentration increases, temperatures decreases
	(C) 2°C (D) 4°C		(B) As carbon dioxide concentration increases, temperatures increases
22.	Who was the first to propose the Atomic Theory?		(C) Carbon dioxide concentrations do not affect climate
	(A) J.J. Thomson (B) John Dalton		(D) As carbon dioxide concentrations increase, temperatures become more random
	(C) Neils Bohr	27.	Which process releases nitrogen gas (N ₂) back into the atmosphere?
	(D) T.A. Edison		(A) Denitrification
23.	Which of the following given elements is the most		(B) Nitrogen fixation
	electropositive?		(C) Decay
	(A) S		(D) Nitrification
	(B) Cl	28.	Phosphorus does NOT travel through which of the
	(C) Mg		following spheres?
	(D) Al		(A) Lithosphere
24.	The equation of state for an ideal gas is represented		(B) Atmosphere
	as:		(C) Biosphere
	(A) PV=R/T		(D) Geosphere
	(B) P/V=RT	29.	Although direct measurements of atmospheric
	(C) P/V=nRT		carbon dioxide have only been taken consistently
	(D) PV=nRT		since the 1950s, scientists have been able to retrieve data from the proxies that include:
25.	Carbon is a common component of:		
	(A) Limestone		(A) Ice cores from ice sheets
	(B) All organisms		(B) Sediment cores from the ocean
	(C) Volcanic gases		(C) Tree rings
	(D) All of the above		(D) All of the above
SV	7-14743-B	4	
51		••	

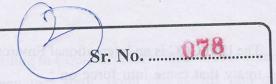

-30	. The height of the troposphere is approximately:	35.	The fishbowl draw is a method of drawing:
	(A) 80 km		(A) Independent sample
	(B) 50 km		(B) Structured sample
	(C) 12 km		(C) Non-random sample
	(D) 120 km		(D) Random sample
31.	The lowest layer of the atmosphere is:	36.	For a perfectly homogenous population, the
	(A) Troposphere		minimum required sample size is:
	(B) Stratosphere		(A) 1
	(C) Ionosphere		(B) 2
	(D) Thermosphere		(C) Whole population
32.	Which of the following is a primary air		(D) Infinite
	pollutant?	37.	The sum of the first 200 natural numbers is:
	(A) Ozone		(A) 19100
	(B) Formaldehyde		(B) 20100
	(C) Photochemical smog		(C) 21100
	(D) Hydrocarbons		(D) 22100
33.	The median of 2,6,6,8,4,2,7,9 values is:	3.8	If $A = \begin{bmatrix} -1 & 4 \\ 5 & 8 \end{bmatrix}$, the trace of matrix A is:
	(A) 4	50.	5 8, the trace of matrix A is:
	(B) 5		(A) 6
	(C) 6		(B) 7
	(D) 7		(C) 8
34.	The average of the three numbers is 21. If two of		(D) 9
	the numbers are 4 and 12, what is the remaining	39.	What is the order of matrix $A = \begin{bmatrix} 3 & 5 \\ 7 & 9 \end{bmatrix}$?
	(A) 37		(A) 2×3
	(B) 47		(B) 2×2
	(C) 57		(C) 3×3
	(D) 67		(D) 4×4

- 40. The main key difference between AND gate and 45. Which of the following is the longest glacier OR gate is that:
 - (A) AND gate gives a true output only when all the inputs are true whereas the OR gate gives a true output when at least one of the inputs is true
 - (B) AND gate gives a true output only when one of the inputs is true whereas the OR gate gives 46. a true output when all the inputs are true
 - (C) Both (A) and (B)
 - (D) None of the above
- 41. The decimal equivalent of 101010 is:
 - (A) 38
 - (B) 40
 - (C) 42
 - (D) 44
- 42. The binary equivalent of 323:
 - (A) 101000111
 - (B) 101000010
 - (C) 101000001
 - (D) 101000011
- 43. The full form of HTTP is:
 - (A) HyperText Transfer Package
 - (B) HyperTransfer Text Package
 - (C) HyperText Transfer Protocol
 - (D) HyperText Transfer Practice
- 44. The location of a resource on the internet is given by:
 - (A) URL
 - (B) Email
 - (C) IP
 - (D) Protocol

- outside the polar regions?
- (A) Fedchenko Glacier
- (B) Siachin Glacier
- (C) Gangotri Glacier
- (D) Hispar Glacier
- Mohoroviĉić discontinuity marks the boundary between:
- (A) Crust and Mantle
- (B) Mantle and Core
- (C) Inner and Outer Core
- (D) None
- 47. Continental drift theory was proposed by:
 - (A) Alfred Wegener
 - (B) Thomas Alva Edison
 - (C) Arthur Holmes
 - (D) Eduard Suess
- 48. Holocene is the name given to the geological epoch that began:
 - (A) 5,650 years BP
 - (B) 11,650 years BP
 - (C) 15,650 years BP
 - (D) 20,650 years BP
- 49. Gully erosion is an advanced stage of:
 - (A) Rill erosion
 - (B) Splash erosion
 - (C) Sheet erosion
 - (D) Wind erosion

- 50. Which of the following soil conservation methods 56. On a topographic map, the closer the contour lines is generally implemented in the coastal and dry regions?
 - (A) Contour ploughing
 - (B) Terrace farming
 - (C) Mulching
 - (D) Shelter belts
- 51. Which of the following is the first stage of water 57. erosion?
 - (A) Rill erosion
 - (B) Sheet erosion
 - (C) Gully erosion
 - (D) Splash erosion
- 52. Karewas are found in:
 - (A) West Bengal
 - (B) Rajasthan
 - (C) Nagaland
 - (D) Jammu and Kashmir
- 53. A handheld camera with the flash turned on during dim light is an example of:
 - (A) Active sensor
 - (B) Passive sensor
 - (C) Proactive sensor
 - (D) None
- 54. GIS allows the user to perform:
 - (A) Store data
 - (B) Edit data
 - (C) Create searches
 - (D) All of the above
- 55. GIS was coined by:
 - (A) Roger Tomlinson
 - (B) Roger James
 - (C) Richard Frost
 - (D) None of the above

- the:
- (A) Steeper the slope
- (B) Flatter the land surface
- (C) Gentler the slope
- (D) Lower the elevation
- The graph showing discharge versus time represents:
- (A) Hydrograph
- (B) Pluviograph
- (C) Environmental flow
- (D) None of the above
- 58. Hydrograph will peak faster in:
 - (A) Forested land
 - (B) Agricultural land
 - (C) Urbanized land
 - (D) All of the above
- 59. Pluviograph is an instrument used for measuring:
 - (A) Snow
 - (B) Hail
 - (C) Precipitation
 - (D) Sleet
- 60. Pyranometer is an instrument used for measuring:
 - (A) Lunar radiation
 - (B) Solar radiation
 - (C) Terrestrial radiation
 - (D) None of the above

SCHOOL OF ENVIRONMENTAL AND EARTH SCIENCES **GEO-INFORMATICS**

Question Booklet Series

Total Questions

Time Allowed

70 Minutes

Roll No.:

Instructions for Candidates:

- 1. Write your Entrance Test Roll Number in the space provided at the top of this page of Question Booklet and fill up the necessary information in the spaces provided on the OMR Answer Sheet.
- 2. OMR Answer Sheet has an Original Copy and a Candidate's Copy glued beneath it at the top. While making entries in the Original Copy, candidate should ensure that the two copies are aligned properly so that the entries made in the Original Copy against each item are exactly copied in the Candidate's Copy.
- 3. All entries in the OMR Answer Sheet, including answers to questions, are to be recorded in the Original Copy only.
- 4. Choose the correct / most appropriate response for each question among the options A, B, C and D and darken the circle of the appropriate response completely. The incomplete darkened circle is not correctly read by the OMR Scanner and no complaint to this effect shall be entertained.
- 5. Use only blue/black ball point pen to darken the circle of correct/most appropriate response. In no case gel/ink pen or pencil should be used.
- 6. Do not darken more than one circle of options for any question. A question with more than one darkened response shall be considered wrong.
- There will be 'Negative Marking' for wrong answers. Each wrong answer will lead to the deduction of 0.25 marks from the total score of the candidate.
- 8. Only those candidates who would obtain positive score in Entrance Test Examination shall be eligible for admission.
- 9. Do not make any stray mark on the OMR sheet.
- 10. Calculators and mobiles shall not be permitted inside the examination hall.
- 11. Rough work, if any, should be done on the blank sheets provided with the question booklet.
- 12. OMR Answer Sheet must be handled carefully and it should not be folded or mutilated in which case it will not be evaluated.
- 13. Ensure that your OMR Answer Sheet has been signed by the Invigilator and the candidate himself/ herself.
- 14. At the end of the examination, hand over the OMR Answer Sheet to the invigilator who will first tear off the original OMR sheet in presence of the Candidate and hand over the Candidate's Copy to the candidate. Turn over

JJ-318-B

1.	The UNFCCC is an International Environmental 6.	Which of the following is the largest glacier of Kashmir Valley?
	treaty that came into force on:	(A) Nehnar
	(A) 21 March 1994	(B) Kolahoi
	(B) 21 March 1995	(C) Shishram
	(C) 21 April 1994	(D) Hoksar
	(D) 21 April 1995 7.	Which of the following is a Ramsar designated
2.	Which of the following is not a Millennium	wetland?
	Development Goal ?	(A) Hokersar
	(A) Eradicate extreme poverty and hunger	(B) Khushalsar
	(B) Achieve universal primary education	(C) Aanchar
	(C) Promote gender equality and empower	(D) Shallabug
	women 8	
	(D) Improve mental health	(A) Pinus roxburghii
3	Which of the following UN Sustainable Development.	(B) Pinus gerardiana (C) Pinus wallichiana
	Goals focuses on affordable and clean energy?	(C) Pinus wattentana (D) None of these
	(A) Goal 6	the following is not an example of
	(B) Goal 7	nrimary succession?
	(C) Goal 9	(A) Vegetation colonising old lava fields on a
	(D) Goal 8	volcanic island
	4. The UNCCD entered into force in:	(B) Moss growing on mountain cliffs
	(A) December 1996	(C) Salt marsh vegetation on a mud flat
	(B) December 1997	(D) Grassland growing on the site of a previous
	(C) December 1998	rainforest 10. In thermal stratification of water bodies, the
	(D) December 1999	middle region which shows drastic temperature
	5. Sapphire, a precious gemstone, is found in:	change is called:
	(A) East Karakorum, Leh	(A) Mesolimnion
	(B) Paddar, Kishtwar	(B) Epilimnion
	(C) Uri, Baramulla	(C) Metalimnion
	(D) Sonamarg, Ganderbal	(D) Hypolimnion
	The rest sent this odw rotsligion after test of land	he original QMR short in sector of the Cardidate.
	nd it and low. See Canadidate's Capy to the conditioned	2

11.	In cryogenic storage, seeds are stored at: (A) -15°C (B) -25°C (C) -35°C		According to Coulomb's Law, electrostatic force between two static point charges q1 and q2 placed some distance apart is not: (A) Inversely proportional to their product
12.	 (D) -196°C The word ecosystem was first used by : (A) A.G. Tansley (B) G.E. Hutchinson (C) Charles Elton (D) Vladimir Vernadsky The digestive enzyme found in saliva is called : 	18.	 (B) Inversely proportional to the square of the distance between them (C) Directed along the line joining the two charged particles (D) None of the above The bending of light at the boundary of two dissimilar media is called:
13.	(A) Pepsin (B) Bile (C) Amylase (D) Both (A) and (B) Which of the following is not part of large	19.	 (A) Reflection (B) Refraction (C) Diffraction (D) Total Internal Reflection At absolute temperature, the kinetic energy of a
15.	intestine? (A) Colon (B) Duodenum (C) Caecum (D) Rectum	20.	gas is: (A) Positive (B) Zero (C) Negative (D) Both (A) and (C) The acceleration due to gravity varies with:
	(A) Red Blood Corpuscles(B) White Blood Corpuscles(C) Platelets(D) All of the above	40.g	 (A) Latitude (B) Height (C) Depth (D) All of the above
16.	Tropical grasslands are also called: (A) Prairies (B) Pampas (C) Steppes (D) Savannas	21.	Discovery of electron is credited to: (A) John Dalton (B) Ernest Rutherford (C) J.J. Thomson (D) None of the above
JJ	-318–B	3	[Turn over

- - (A) Acids produce H⁺ ions when dissolved in water
 - (B) Acids have sour teste
 - (C) Acids are composed of hydrogen
 - (D) All of the above
- 23. The mass number of an atom is:
 - (A) Number of electrons present in the nucleus of an atom
 - (B) Number of protons present in the nucleus of an atom
 - (C) Number of neutrons present in the nucleus of an atom
 - (D) Number of protons and neutrons present in the nucleus of an atom
- 24. According to Boyle's Law:
 - (A) At constant temperature, the volume of a given amount of a gas is directly proportional to its pressure
 - (B) At constant pressure, the volume of a given amount of a gas is inversely proportional to its temperature
 - (C) At constant temperature, the volume of a given amount of a gas is inversely proportional to its pressure
 - (D) At constant volume, the temperature of a given amount of a gas is inversely proportional to its pressure
- 25. Glaciers across high mountain Asia are retreating except those located in:
 - (A) Karakoram
 - (B) Tibetan Plateau
 - (C) Eastern Himalaya
 - (D) Western Himalaya

- 22. Which of the following is a property of acids? 26. The enzyme that fixes atmospheric CO, in C4 plants is:
 - (A) Aldolase
 - (B) Hydrogenase
 - (C) PEP carboxylase
 - (D) Amylase
 - The highest amount of Carbon is stored in:
 - (A) Atmosphere
 - (B) Soil
 - (C) Oceans
 - (D) None of these
 - The ultimate source of energy in an ecosystem is:
 - (A) Sunlight
 - (B) Nutrients
 - (C) Food
 - (D) Water
 - 29. Which of the following can be used to reconstruct past climate?
 - (A) Tree rings
 - (B) Ice cores
 - (C) Lake sediments
 - (D) All of these
 - 30. The normal lapse rate is 6.5°C per:
 - (A) Kilometer rise in altitude
 - (B) Kilometer fall in altitude
 - (C) Mile rise in altitude
 - (D) Mile fall in altitude

- 31. The phenomenon in which temperature increases 36. with increasing altitude is known as:
 - (A) Temperature anomaly
 - (B) Temperature inversion
 - (C) Lapse rate
 - (D) Insolation
- 32. Tropospheric ozone formation results due to the chemical reactions between:
 - (A) Oxides of nitrogen and volatile organic compounds in the presence of sunlight
 - (B) Oxides of sulphur and volatile organic compounds in the presence of sunlight
 - (C) Oxides of carbon and volatile organic compounds in the presence of sunlight
 - (D) Oxides of nitrogen and volatile organic compounds
- 33. What is the median of following series: 7, 44, 32, 8, 9, 17, 19, 16, 15?
 - (A) 15
 - (B) 16
 - (C) 17
 - (D) 19
- 34. Square of standard deviation is called:
 - (A) Harmonic mean
 - (B) Variance
 - (C) Mode
 - (D) 2nd quartile
- 35. Arithmetic mean is:
 - (A) Affected by extreme values
 - (B) Not affected by extreme values
 - (C) Both (A) and (B)
 - (D) None of these

- Sum of deviations of values from their mean is always:
- (A) 1
- (B) 0
- (C) 2
- (D) 3
- 37. The output of an AND gate with three inputs, A, B, and C, is 'high' or '1' when:
 - (A) A = 1, B = 1, C = 0
 - (B) A = 0, B = 0, C = 0
 - (C) A = 1, B = 1, C = 1
 - (D) A = 1, B = 0, C = 1
- 38. A series of numbers in which each number is the sum of the two preceding numbers is called:
 - (A) Fibonacci Series
 - (B) Taylor Series
 - (C) Laurent Series
 - (D) Hypergeometric Series
- 39. What is 'a', if $B = \begin{bmatrix} 1 & 4 \\ 2 & a \end{bmatrix}$ is a singular matrix?
 - (A) 5
 - (B) 6
 - (C) 7
 - (D) 8
- 40. If |A| = 0, then A is a :
 - (A) Zero matrix
 - (B) Singular matrix
 - (C) Non-singular matrix
 - (D) None of these

was to a succession of solids 224 A	7. A stream weathers and erodes its channel and
41. The father of supercomputer is:	7. A stream weathers and crodes as floodplain by :
(A) John Neumann	(A) Hydraulic action
(B) Charles Babbage	(B) Abrasion
(C) Seymour Cray	(C) Solution
(D) Adam Dunkels	(D) All of the above
A computer on the network that is used for	48. New lithosphere forms and spreads outward at:
sharing resources with others is called:	(A) Divergent boundary
(A) Workstation	(B) Convergent boundary
(B) Client	(C) Transform plate boundary
(C) Server	(D) None of the above49. Humus is mostly concentrated in which horizon?
(D) Mainframe	
of decimal number 125 is:	(A) O-horizon
(A) 1111001	(B) B-horizon
	(C) C-horizon (D) A-horizon
(D) 1111110	Gala following is primary factor that
(C) 1111111	affects the rate of weathering?
(D) 1111101 44. Rows of a relation are called:	(A) Topography
	(B) Climate
(A) Tuple	(C) Volume
(B) Entity	(D) Biological organisms
(C) Data structure	51. Which of the following are types of water
(D) Schema	erosion?
45. What is the second most abundant element	- C 11 -wagion
Earth's crust ?	(B) Gully erosion (C) Both (A) and (B)
(A) Nitrogen	
(B) Oxygen	(D) Neither (A) nor (B) 52. Land where the potential natural vegetation is
(C) Carbon	52. Land where the potential natural predominantly grasses, grass-like plants, forbs,
(D) Silicon46. Carbon sequestration is achieved through :	or shrubs is called as:
(A) Rocks	
(B) Soils	
(C) Plants	(C) Forest land (D) Wetland
(D) All of the above	
	6

- object from measurements made at a distance from the object is called:
 - (A) Geographic Information Science
 - (B) Information Science
 - (C) Remote Sensing
 - (D) None of the above
- 54. Which of the following is not a component of Geographic Information Systems?
 - (A) Software
 - (B) Hardware
 - (C) Query
 - (D) People
- The contour lines connect points of equal:
 - (A) Distance
 - (B) Angle
 - (C) Elevation
 - (D) Area
- 56. First satellite based remote sensing programme for broad-scale observation of the Earth's land areas was :
 - (A) SPOT
 - (B) Landsat
 - (C) IRS
 - (D) Geoeye-1

- The science of deriving information about an 57. Which among the following is a component of water cycle ?
 - (A) Evaporation
 - (B) Runoff
 - (C) Precipitation
 - (D) All of the above
 - 58. A graph plotting discharge versus time is called:
 - (A) Hydrogram
 - (B) Hydrograph
 - (C) Discharge
 - (D) Streamflow
 - 59. Process by which the water vapour escapes from the living plant leaves and enters the atmosphere is called:
 - (A) Evapotranspiration
 - (B) Evaporation
 - (C) Transpiration
 - (D) Potential evaporation
 - Flash floods are characterised by:
 - (A) Rapid rises in water levels
 - (B) Devastating flow velocities
 - (C) Neither (A) nor (B)
 - (D) Both (A) and (B)

- What is the decimal equivalent of 1100110? 1.
 - (A) 104
 - (B) 106
 - (C) 108
 - (D) 102
- The binary equivalent of 819 is: 2.
 - (A) 1100110011
 - (B) 1100110001
 - (C) 1010101010
 - (D) 1001100101
- The difference between memory and storage is that:
 - (A) Memory is temporary and storage is permanent
 - (B) Memory is slow and storage is fast
 - (C) Memory is permanent and storage is temporary
 - (D) None of the above
- When was Google Chrome first launched?
 - (A) 2000
 - (B) 2008
 - (C) 2004
 - (D) 2006
- Which of the following has the lowest infiltration capacity?
 - (A) Pasturelands
 - (B) Farmlands
 - (C) Built-up
 - (D) Forest lands
- Tundra biome is characterized by: 6.
 - (A) Tree growth hindered by the cold temperatures and short growing seasons
 - (B) Tree growth hindered by scanty rainfall and deficiency in soil nutrients
 - (C) Tree growth hindered by scanty rainfall and acidic soils
 - (D) None of the above
 - Hemis High Altitude National Park is famous for: 7.
 - (A) Black bear
 - (B) Snow leopard
 - (C) Brown bear
 - (D) Markhor

- Accumulation of urea and other waste substances in the blood is called:
 - (A) Hemodialysis
 - (B) Cystitis
 - (C) Urethritis
 - (D) Uremia
 - Which of the following is the state bird of J & K?
 - (A) Black crested bulbul
 - (B) Hill myna
 - (C) Black necked crane
 - (D) White throated kingfisher
 - Lysimeter is an instrument to measure:
 - (A) Evapotranspiration
 - (B) Transpiration
 - (C) Infiltration
 - (D) Evaporation
 - 11. Hydropower potential depends upon which of the following parameters:
 - (A) Streamflow
 - (B) Head
 - (C) Both (A) and (B)
 - (D) None of the above
 - 12. Hydrograph is a graph:
 - (A) Showing the temperature versus time
 - (B) Showing the rainfall versus time
 - (C) Showing the rate of flow versus time past a specific point in a river
 - (D) None of the above
 - Which of the following are soil conservation measures to arrest erosion?
 - (A) Ploughing
 - (B) Trenching
 - (C) Contour plowing
 - (D) All of the above
 - Sand dunes are formed by which type of erosion:
 - (A) Ravine erosion
 - (B) Guilly erosion
 - (C) Sheet erosion
 - (D) Aeolian erosion

	HFO-848-D	3		[Turn ove
	(D) m ~ P		(D)	
	(C) n \ p (D) m \ x p		(D)	STATE OF THE PARTY
	(C) n×p		(C)) (1925)
	(A) n × n (B) m × n		(B)	1000000
	(A) n×m			51%
2	is p × n. Then the order of matrix AB is?	246)	devi	students have scores below 50?
	 (D) Andisols 21. If the order of matrix A is m × p and the order of 	В	dist	ribution with a mean of 65 and a standard iation of 12. Approximately what proportion of
	(C) Gelisols	2	7. Mar	ks of the Geoinformatics paper follow a normal
	(B) Entisols		(D)	Median
	(A) Alfisols		(C)	Mode
	aluminium organic compounds are known as:		(B)	Mean
2	Soils that are formed in volcanic ash and contain	n		Variance
	(D) Reduced Respiration			ency?
	(C) Reduced Imbibition	26	(D)	ch of the following is not a measure of the central
34	(B) Reduced Transpiration		(D)	Is denoted by the symbol "r"
200	(A) Enhanced Transpiration		(C)	A positive value indicates a rise in one variable accompanies a rise in the other
19			(variables
	(D) None of the above			Describe degree of association between two
	(C) Ovary		(A)	Varies between 0 to 1
	(B) Integuments	275477	Coeff	icient?
18	(A) Endosperm	25.	Which	n of the following is false about the Correlation
10	(D) Rice The seed coat is formed from:		(D)	5
	(C) Pea		(C) 2	
	(B) Castor		(B) 3	
	(A) Mango		(A) 4	100% M
17.			$9 + e^{2x}$	r-4 = 10 ?
	(D) 1935	24.	What i	s the value of x in the exponential equation
	(C) 1950		(D) N	Vone of these
	(B) 1945		(C) 0	
	(A) 1930		(B) 0	
5/70.51	Tansley in:	20.	(A) 3	
16.	toward first used by Arthur George	23.	Roots	of quadratic equation $x^2 - 3x = 0$, will be
	(D) Forests		(D) n((n-1)(n-2)(n-3)
	(C) Sand dunes		(C) (n	
	(B) Agriculture		(B) n!	
	(A) Rocky terrain			(n-1)(n-2)
15.	desert region of Ladakh?	22.	$\frac{n!}{(n-3)!}$	-= : !
15	What is the major land use and land cover of cold		n!	- 2

- Which of the following are true about the normal 34. According to Arrhenius Concept, acids are: distribution?
 - (A) 58.6% of the observations lie between the mean and one standard deviation
 - (B) The mean, median, mode and variance of a normally distributed data area same
 - (C) 99.7% of the observations lie between the mean and three standard deviations
 - (D) None of the above

1

- 29. Indicate the correct arrangement for electromagnetic radiations in order of their increasing wavelength;
 - (A) X-rays, Visible, Infrared, Microwave
 - (B) Visible, Infrared, Microwave, X-rays
 - (C) X-rays, Infrared, Visible, Microwave
 - (D) Microwave, Visible, Infrared, X-rays
- 30. Light travels slower in glass than in air because:
 - (A) Refractive index of air is greater than that of glass
 - (B) Density of glass greater than that of air
 - (C) Refractive index of air is less than that of glass
 - (D) Density of glass is less than that of air
- 31. The Acceleration due to gravity is zero at:
 - (A) The equator
 - (B) Poles
 - (C) Sealevel
 - (D) The center of the earth
- 32. The temperature at which a ferromagnet material becomes paramagnetic is called:
 - (A) Neutral temperature
 - (B) Inversion temperature
 - (C) Curie temperature
 - (D) None of the above
- 33. The number of neutrons in the radioactive isotope of hydrogen is:
 - (A) 2
 - (B) 0
 - (C) 3
 - (D) 1

- - (A) Proton acceptors
 - (B) Compounds which give hydrogen ion
 - (C) Proton donor
 - (D) Compounds which give hydroxyl ion
- 35. Methanol and ethanol are miscible in water due to
 - (A) Covalent character
 - (B) Oxygen bonding character
 - (C) Hydrogen bonding character
 - (D) None of the above
- 36. The average kinetic energy of an ideal gas per molecule in SI units at 25°C will be
 - (A) 61.7 × 10⁻²¹ J
 - (B) 6.17 × 10⁻²¹ J
 - (C) 7.16 × 10⁻²⁰ J
 - (D) 6.17 × 10⁻²⁰ J
- 37. GIS deals with which kind of data:
 - (A) Spatial data
 - (B) Numeric data
 - (C) Binary data
 - (D) Complex data
- 38. Remote sensing techniques make use of the which of the following:
 - (A) Electric waves
 - (B) Electromagnetic waves
 - (C) Sound waves
 - (D) All of the above
- 39. GPS is used for which of the following data:
 - (A) Altitude
 - (B) Latitude
 - (C) Longitude
 - (D) All of the above
- The science of map-making is known as?
 - (A) Cartography
 - (B) Remote Sensing
 - (C) GIS
 - (D) Geomatics

41. The branch of geology dealing with the studies of 48. Kyoto Protocol is linked to: (A) SDGs fossils is: (B) UNCCCD (A) Geomorphology (C) Montreal Protocol (B) Stratigraphy (D) UNFCCC (C) Archaeology Which of the following is a sub-species of European (D) Palaeontology red deer found in Kashmir? 42. The instrument used for reading the intensity of (A) Hangul earthquake wave is called: (B) Markhor (A) Hygrometer (C) Chiru (B) Seismometer (D) Ibex (C) Seismogram 50. Lines on a map connecting places having same (D) Seismograph amount of rainfall are called: 43. The limestone deposits which grow upwards from the floor of underground cave are known as: (A) Isotherms (B) Isobars (A) Stromatolite (C) Contours (B) Stalactite (D) Isohyets (C) Stalagmite 51. Which of the following is not a tributary of Indus (D) Column river? 44. Ozone layer is located in? (A) Sutlei (A) Troposphere (B) Beas (B) Stratosphere (C) Jhelum (C) Thermosphere (D) None of the above (D) Mesosphere 45. The Plio-pleistocene sediments of Kashmir valley are 52. Lignite deposits in Kashmir are found at: (A) Nichhama, Handwara known as: (B) Mokam, Anantnag (A) Verinag formation (C) Hipora, Shopian (B) Lolab formation (D) None of the above (C) Karewa formation 53. Which of the following is a consequence of global (D) Zewan formation 46. Major constituent of the Earth's atmosphere is: warming? (A) Melting of glaciers (A) Oxygen (B) Increasing frequency and intensity of flooding (B) Argon (C) Increasing glacial lake outburst flooding (GLOFs) (C) Carbon Dioxide (D) All of the above (D) Nitrogen The process of nutrient enrichment in a lake is termed 47. Threat of global warming is increasing due to the 54. increasing concentration of: as: (A) Carbon dioxide (A) Limiting nutrients (B) Enrichment (B) Black carbon (C) Schistosomiasis

(C) Particulate matter

(D) Sulphur dioxide

(D) Eutrophication

- 55. How many Sustainable Development Goals (SDGs) have been agreed to, by all the world's nations, as part of the 2030 Agenda?
 - (A) 17
 - (B) 7
 - (C) 27
 - (D) 14
- 56. The Total Dissolved Solids (TDS) in drinking water can be reduced by the following method:
 - (A) Distillation
 - (B) Reverse osmosis
 - (C) Ion exchange
 - (D) All of the above
 - 57. Which of the following minor forest produce in J&K has tremendous medicinal importance?
 - (A) Dioscorea
 - (B) Hazel nut
 - (C) Resin
- (D) Oleander 3

- Which of the following are floating ocean plants and animals?
 - (A) Nekton
 - (B) Benthos
 - (C) Plankton
 - (D) Terrenus
- 59. Environmental flow is provided within a river, wetland or coastal zone to:
 - (A) Promote ecotourism and water sports
 - (B) Round the year hydropower generation
 - (C) Promote climate change mitigation and adaptation
 - (D) Maintain healthy aquatic ecosystems and ensure sustainability of their services
 - The melting of glaciers in Himalaya under the changing climate will in the long run most likely result in which of the following scenarios:
 - (A) Decrease in the frequency and magnitude of disasters
 - (B) Increase the water supplies in the Himalaya
 - (C) Adversely impact the food, water and energy security
 - (D) All of the above

3

3.

1. Which of the following is not an internet browser? On an average, how thick is the crust of earth? (A) Chrome (A) 100 km (B) Internet Explorer (B) 40 km (C) Firefox (C) 150 km (D) Python (D) 92 km DBMS don't use which of the following database The core of earth is thought to be composed of: structure? (A) Granite (A) Hierarchical model (B) Basalt (B) Network model (C) Solid Iron-Nickel alloy (C) Topologic model (D) Peridotite (D) Relational model Which of the following is not a measure of soil Which of the following is not an example of the conservation? spreadsheet software? (A) Mulching (A) MS Excel (B) Tillage cropping (B) Lotus (C) Check dams (C) Xoom Office (D) Pruning (D) IMS 10. Land capability classification is based on which of Bytecode is: (A) A compiler that produces an independent the following properties? (A) Soil fertility, climate, topography and water executable file (B) Is not a machine code and thus, not tied to any availability nk pen ar pencil sh (B) Geology, drainage, weathering and particular hardware geomorphology (C) A data type in C programming language (C) Climate, vegetation, glaciers, population (D) A Database Management System (D) All of the above Universe began: 11. Soil erosion is associated with: (A) 4 billion years ago · (A) Frost shattering and heaving (B) 10-15 billion years ago (B) Rills and ravines (C) 1 billion years ago (C) Floods and water logging (D) 5-8 billion years ago Snow avalanches 6. Which of the following divisions of the geologic time 12. Soil texture influences which of the following? scale is an era of the Phanerozoic eon? (A) Hydrologic properties (A) Paleozoic Climatic processes (B) (B) Paleocene Tectonic processes (C) Permian (D) Proterozoic (D) Magmatic properties

	13.	Remote sensing does not use which region of	19.	Lysimeter is a hydrological instrument used to		
		electromagnetic radiation for sensing?		measure:		
		(A) Visible near-infrared		(A) Evaporation		
		(B) Thermal infrared		(B) Infiltration		
		(C) Microwaves		(C) Evapotranspiration		
		(D) Radiowaves		(D) Interception		
	14.	Digital topographic data in the form of DEM is	20.	GE OLIVITORIS CHILLIE CON OLIVITORIS CONTROL C		
		generated from:		(A) Equal precipitation intensity		
		(A) Contours		(B) Equal precipitation depth		
		(B) Thermal remote sensing data		(C) Equal storm duration		
-		(C) Intensity images	21	(D) Equal height of precipitation stations		
		(D) All of the above	21.	The residence time of CO ₂ in the atmosphere is of the order of:		
14	15.	Which of the following is not an application of Remote Sensing?		(A) 24-72 hours		
				(B) 30-95 Years		
		(A) Crustal deformation studies		(C) 1-2 months		
		(B) Weather monitoring studies		(D) 7-15 days		
		(C) Water quality mapping	22.	Manual (CI)		
		(D) Sub-surface studies		climate change that sets out global action to limit the		
	16.	Geographic Information System:		global warming to below:		
	10.	(A) Uses satellite data		(A) 2°C		
		(B) Integrates data from various sources		(B) 1°C		
		(C) Is a database management system		(C) 3°C		
		(D) All of the above		(D) None of the above		
	17.	Which of the following is the largest reservoir of	23.			
	17.			Control) came into the force in the year:		
		(4) C		(A) 1972		
		(A) Groundwater		(B) 1977		
		(B) Lakes		(C) 1956		
		(C) Rivers		(D) 1974		
		(D) Atmosphere	24.	the state of the s		
	18.	The average annual rainfall of Srinagar is around:		Sustainable Development Goals (SDGs)?		
		(A) 1000 mm		(A) No Poverty		
		(B) 700 mm		(B) Quality education		
		(C) 1500 mm		(C) Zero hunger		
		(D) 1800 mm		(D) None of the above

	carrying conductor			(B)	19	
	allocation and allocation	om Resulting (3)		(C)	17	
	successo			(D)	18	

- 47. For what value of k will the two equations 51. 2x+4=4(x-2) and -x+k=2x-1 have the same solution?
 - (A) 11
 - (B) 7
 - (C) -11
 - (D) 17
- 48. If x is a negative number, which of the following must be true?
 - (I) $x^5 < |x|$
 - (II) $x < \sqrt{(-x)}$
 - (III) x-1/|x| < 0
 - (A) (II) and (III) only
 - (B) (I), (II) and (III)
 - (C) (I) and (II) only
 - (D) (I) and (III) only
- 49. What is the sum of the reciprocals of the solutions to the equation $x^2 (3/5) x = -11/3$:
 - (A) 3/11
 - (B) 9/33
 - (C) 9/55 : 1 a 47 bas 20 assured one
 - (D) 55/33
- 50. The amount of a radioactive material decays according to the formula $A(t) = A_o e^{-kt}$ where, A_o is the initial amount, k is a positive constant and t is the time in days. Find a formula for the half-life of the material.
 - (A) T = ln 2/k
 - (B) $T = \ln 4/k$
 - (C) T = ln k/10
 - (D) None of the above

- 51. The level of sound D in decibels is defined as $D = 10 \log (1/10^{-16})$, where 1 is the sound intensity in watts/cm². Determine the level in decibels of a sound with intensity $1 = 10^{-8}$ watts/cm²:
 - (A) 60 decibels
 - (B) 80 decibels
 - (C) 120 decibels
 - (D) 10 decibels
- 52. Find the 10th term of a geometric sequence if $a_1 = 45$ and the common ratio r = 0.2.
 - (A) 4.601×10^{-2}
 - (B) 2.304×10^{-25}
 - (C) 2.304×10^{-5}
 - (D) 2.304×10^{-9}
- 53. Pyranometer is the instrument which measures the:
 - (A) short wave radiation
 - (B) sunshine hours
 - (C) humidity
 - (D) albedo
- 54. Relative humidity of the air is defined as the ratio of:
 - (A) actual vapour pressure to the saturation vapour pressure at 0°C
 - (B) weight of water in unit volume of air to the weight of air in the same volume
 - (C) actual vapour pressure to the saturation vapour at the air temperature
 - (D) actual vapour pressure to the atmospheric pressure
- 55. The climate of the Kashmir valley is mainly determined by:
 - (A) Westerlies
 - (B) Trade winds
 - (C) Southeast monsoons
 - (D) Southwest monsoons

- 56. A measuring device which can be used to measure 59. wind speed and direction is called:
 - (A) lysimeter
 - (B) anemometer
 - (C) rain gauge
 - (D) none of the above
- 57. The Ozone layer is found in:
 - (A) Troposphere
 - (B) Stratosphere
 - (C) Thermosphere
 - (D) Mesosphere
- 58. Which of the following is not a Greenhouse gas?
 - (A) Carbon dioxide
 - (B) Carbon monoxide
 - (C) Methane
 - (D) All of the above

- 59. Black carbon enhances the melting of Himalayan glaciers as the black carbon deposition:
 - (A) Decreases the albedo causing positive radiative forcing
 - (B) Increases the albedo causing negative radiative forcing
 - (C) Results in acid rains in the ablation zone
 - (D) All of the above
- 60. Which of the following is an important non-timber forest produce in Kashmir forests?
 - (A) Resins
 - (B) Mushrooms
 - (C) Dioscorea
 - (D) All of the above

Time Allowed

70 Minutes

	Roll No.:	 a. Mira	
Alan Tarahan	* .		

Instructions for Candidates:

- 1. Write your Roll Number in the space provided at the top of this page of Question Booklet and fill up the necessary information in the spaces provided on the OMR Answer Sheet.
- 2. OMR Answer Sheet has an Original Copy and a Candidate's Copy glued beneath it at the top. While making entries in the Original Copy, candidate should ensure that the two copies are aligned properly so that the entries made in the Original Copy against each item are exactly copied in the Candidate's Copy.
- 3. All entries in the OMR Answer Sheet, including answers to questions, are to be recorded in the Original Copy only.
- 4. Choose the correct / most appropriate response for each question among the options A, B, C and D and darken the circle of the appropriate response completely. The incomplete darkened circle is not correctly read by the OMR Scanner and no complaint to this effect shall be entertained.
- 5. Use only blue/black ball point pen to darken the circle of correct/most appropriate response. In no case gel/ink pen or pencil should be used.
- 6. Do not darken more than one circle of options for any question. A question with more than one darkened response shall be considered wrong.
- There will be 'Negative Marking' for wrong answers. Each wrong answer will lead to the deduction of 0.25 marks from the total score of the candidate.
- 8. Only those candidates who would obtain positive score in Entrance Test Examination shall be eligible for admission.
- 9. Do not make any stray mark on the OMR sheet.
- 10. Calculators and mobiles shall not be permitted inside the examination hall.
- 11. Rough work, if any, should be done on the blank sheets provided with the question booklet.
- 12. OMR Answer sheet must be handled carefully and it should not be folded or mutilated in which case it will not be evaluated.
- 13. Ensure that your OMR Answer Sheet has been signed by the Invigilator and the candidate himself/herself.
- 14. At the end of the examination, hand over the OMR Answer Sheet to the invigilator who will first tear off the original OMR sheet in presence of the Candidate and hand over the Candidate's Copy to the candidate.

- 7. Konsarnag is situated in which of the mountain range of Jammu and Kashmir?
 - (A) Harmukh Range
 - (B) Great Himalayan Range
 - (C) Pir Panjal Range
 - (D) None of the above
- 8. Which of the following is an application of the GIS?
 - (A) Land information system
 - (B) Traffic navigation system
 - (C) Banking information system
 - (D) Both (A) and (B)
- 9. Which of the following are the optical remote sensing sensors?
 - (A) LISS
 - (B) TM
 - (C) MSS
 - (D) All of the above
- 10. Pyranometer is the instrument which measures the:
 - (A) Solar radiation
 - (B) Sunshine hours
 - (C) Humidity
 - (D) Albedo
- 11. Relative humidity of the air is defined as the ratio of:
 - (A) Actual vapour pressure to the saturation vapour pressure at 0°C
 - (B) Weight of water in unit volume of air to the weight of air in the same volume
 - (C) Actual vapour pressure to the saturation vapour pressure at the air temperature
 - (D) Actual vapour pressure to the atmospheric pressure

	-				
12.	Rain	ıfall Hyetograph represents:	17.		en the set of data [12, 16, 18, 13, 7, 9, 11, 14, 20]
	(A)	A plot of rainfall depth or intensity as a function		(A)	t is the standard deviation? 4.18
		oftime			5.85
	(B)	A plot of summation of rainfall increments as a function of time		(B) (C)	7.55
	(6)	and the same of th		(C) (D)	5.56
	(C)	Depth of rainfall per unit time	18.		standard error is a statistical measure of:
	(D)	None of the above	10.		
13.		is used for determining which of the following meters?		(A)	The degree to which a sample has been accurately stratified
	(A)	Altitude		(B)	The extent to which a sample mean is likely to differ from the population
	(B)	Latitude		(C)	Both (A) and (B)
	(C)	Longitude		(D)	None of the above
	(D)	All of the above	19.		t comes next in the sequence: 2, 4, 10, 28,?
14.	A me	A measuring device which can be used to measure the		(A)	64
		ant of actual evapotranspiration by the plants is		(B)	70
	called			(C)	76
	(A)	Lysimeter		(D)	82
	(B)	Anemometer	20.	If x	=-1, then what is the value of the function
	(C)	Rain gauge		f(x) =	$= x^3 + 4x + 12?$
4	(D)	None of the above		(A)	17 (B) 9
15.		etrongly skewed data distribution, which measure most unreliable indicator of central tendency?		(C)	7 (D) 23
	(A)	Range	21.	If log	garithm of 5832 be 6, find the base
	(B)	Median		(A)	$3\sqrt{2}$ (B) $2\sqrt{5}$
	(C)	Mean		(C)	$\sqrt{2}$ (D) $\sqrt{3}$
	(D)	Mode	22.		and B are matrices, then which from the following
16.		elation Coefficient varies between:	44.	is tru	
	(A)	+1&-1		(A)	$A + B \neq B + A$
	(B)	+1 & 0		3.7	
	(C)	-1 & 0		(B)	$(A^t)^t \neq A$
	(D)	None of the above		(C)	$AB \neq BA$
	(-)	(G), (C)		(D)	All of the above

					The state of the s
23.		acceleration due to gravity near the surface of net of radius R and density d is proportional to:	29.		ch of the following acts as both an oxidizing as as reducing agent?
	(A)	d/\mathbb{R}^2		(A)	HNO ₃
	(B)	$d\mathbb{R}^2$		(B)	HNO ₂
	(C)	dR		(C)	н
	(D)	d/R		(D)	H_2SO_4
24.	In wl	hich of the following cases the potential energy is	30.		energy of an ideal gas depends only on its:
	defin	ed?		(A)	Pressure
	(A)	Conservative and non-conservative forces			
	(B)	Conservative forces only		(B)	Volume
	(C)	Non-conservative forces only		(C)	Number of moles
	(D)	Neither of the above		(D)	Temperature
25.		cle tyre bursts suddenly, this represents an:	31.	A tel	eprinter terminal is an example of:
	(A)	Isothermal process		(A)	Input device
	(B)	Isobaric process		(B)	Output device
	(C)	Isochoric process		(C)	Both (A) and (B)
	(D)	Adiabatic process		(D)	Storage device
26.		wavelength of the sunlight is	32.	_	ram which exactly performs operations that
20.					nal says is classified as:
	(A)	400-700 nanometers		(A)	Stable functioning
	(B)	400-700 micrometers		(B)	Robust
	(C)	10-12.5 centimeters		(C)	Reliable
	(D)	700-900 millimeters		(D)	None
27.	In wh	nich of the following hydrogen bond is present?	33.		lection of related fields is called
	(A)	H_2 .		(A)	Tuple
	(B)	Ice		(B)	Field
	(C)	Sulphur		(C)	File
	(D)	Hydrocarbon		(D)	Database
28.	Bohr	's theory is applicable to	34.		mal equivalent of (101011)2 is:
	(A)	(A) He		(A)	42
	(B)	Li^{2+}		(B)	43
	(C)	He ²⁺		(C)	44
	(D) None of the above			(D)	45

	25	TA 1.*	1 D' 1 10- Damend (DOD) indicators	41.	The	biggest reservoir of carbon is:
-	35.		gh Biological Oxygen Demand (BOD) indicates:	41.		Amazon rainforest
		(A)	Low level of microbial pollution		(A)	Wetlands
		(B)	High level of microbial pollution		(B) (C)	Oceans
		(C)	Absence of microbes		(D)	None
	11571	(D)	None	42.	, ,	osphere does not play a significant role in the cycling
	36.		CCC came into force on	42.	of:	osphere does not play a significant fole in the eyening
		(Å)	21st February, 1994		(A)	Carbon
		(B)	21st March, 1994		(B)	Nitrogen
		(C)	21st April, 1994		(C)	Phosphorus
		(D)	21st May, 1994		(C)	All of these
	37.	Fill 11	n the gap. MDG6 is to combat HIV-Aids,	43.		food chain of a grassland ecosystem, the top
		·	and other diseases.	13.		umers are:
		(A)	Tuberculosis		(A)	Herbivores
		(B)	Malaria		(B)	Carnivores
		(C)	Diarrhoea		(C)	Bacteria
	2.0	(D)			(D)	None
	38.		first sustainable development goal aims to eradicate	44.	2 5	pyramid of energy is:
			eme poverty. How does the UN currently measure		(A)	Always upright
			eme poverty?		(B)	Always inverted
		(A)	People who are unemployed and unable to		(C)	Sometimes upright
		(T)	access welfare benefits from the state		(D)	Sometimes inverted
		(B)	People who live on less than \$5 a day	45.	The	second longest glacier outside poles is:
	4	(C)	People who live on less than \$1.25 a day		(A)	Biafo
		(D)	People who claim to be living in poverty		(B)	Baltora
	39.		onal Disaster Management Authority of India was		(C)	Hispar
		form	ed in:		(D)	Siachin
		(A)	2002 and speciment egind a constant (a)	46.		vast majority of energy taken into an ecosystem
		(B)	2003		is	
		(C)	2004		(A)	Converted into biomass by plants
		(D)	2005		(B)	Utilized by secondary consumers
	40.	CO ₂	concentration at Mauna Loa Observatory touched		(C)	Lost as heat Used by the primary consumers
		an all	l-time high of 400 ppm in:	47.	(D)	of the atmosphere lies within
		(A)	2013	77.	(A)	30 km
		(B)	2014	8 3	(B)	10 km
		(C)	2015		(C)	70 km
		(D)	2016		(D)	1 km

When a volcano ejects an acid lava, eruption is usually Variations in the proportion of which of the following Light and less violent (A) gases in air is major concern of climate change? Soft and less violent (B) Nitrogen Loud but less violent (B) Carbon dioxide (C) (A) Argon Loud and more violent (D) Oxygen An example of a rock whose minerals have been One of the characteristics of troposphere is (C)Constant temperature with altitude 49. crushed into thin sheets or bands is Decrease in temperature with altitude (A) (B) Increase in temperature with altitude Shale (A) (C)Small scale variation in temperature Schist (B) What does the Stefan-Boltzmann's radiation law state? Conglomerate (C) Radiant heat energy emitted from a surface is 50. Granite Which of the following is the name of the partly melted proportional to the fourth power of its absolute (A) rock layer on which the plates move? temperature Radiant heat energy emitted from a surface is Lithosphere (A) proportional to the square of its absolute (B) Asthenosphere (B) Hydrosphere temperature Radiant heat energy emitted from a surface is (C) Outer core The San Andreas fault in California is a classic example directly proportional to the power of its absolute (C)58. of which of the following types of faults? temperature None of the above Dry steam power stations use geothermal steam of Tear fault (A) degrees temperature to turn the turbines. Upthrust fault (B) (B) > 1100 °C 26 (C) Dip-slip fault ≥ 150 °C (A) $=100^{\circ}C$ (D) Strike-slip fault ≥ than 10°C (D) (C)When the front of a glacier is stationary for a lor Atmospheric pressure is generated by time, the glacier will do which of the following? Earth's rotation (A) Earth's revolution Form many crevasses (B) Gravitational force of the earth Build a large terminal moraine (C) 27. None of these Which is more suitable layer for flying of jet aeroplanes? (B) Melt away (C) Troposphere Not erode its bed (A) The Triassic, Jurassic and Cretaceous Peri Mesosphere (B) Thermosphere 60. constitute what Geologic Era? (C) (D) Stratosphere Generally speaking, the most destructive earthquake The Precambrian 28. (A) The Mesozoic waves are (B) P waves The Paleozoic (A) (C) Surface waves (B) The Cenozoic (D) S waves (C) All of the above

Time Allowed

70 Minutes

Instructions for Candidates:

- 1. Write your Roll Number in the space provided at the top of this page of Question Booklet and fill up the necessary information in the spaces provided on the OMR Answer Sheet.
- 2. OMR Answer Sheet has an Original Copy and a Candidate's Copy glued beneath it at the top. While making entries in the Original Copy, candidate should ensure that the two copies are aligned properly so that the entries made in the Original Copy against each item are exactly copied in the Candidate's Copy.
- 3. All entries in the OMR Answer Sheet, including answers to questions, are to be recorded in the Original Copy only.
- 4. Choose the correct / most appropriate response for each question among the options A, B, C and D and darken the circle of the appropriate response completely. The incomplete darkened circle is not correctly read by the OMR Scanner and no complaint to this effect shall be entertained.
- 5. Use only blue/black ball point pen to darken the circle of correct/most appropriate response. In no case gel/ink pen or pencil should be used.
- 6. Do not darken more than one circle of options for any question. A question with more than one darkened response shall be considered wrong.
- 7. There will be 'Negative Marking' for wrong answers. Each wrong answer will lead to the deduction of 0.25 marks from the total score of the candidate.
- 8. Only those candidates who would obtain positive score in Entrance Test Examination shall be eligible for admission.
- 9. Do not make any stray mark on the OMR sheet.
- 10. Calculators and mobiles shall not be permitted inside the examination hall.
- 11. Rough work, if any, should be done on the blank sheets provided with the question booklet.
- 12. Ensure that your OMR Answer Sheet has been signed by the Invigilator and the candidate himself/herself.
- 13. OMR Answer sheet must be handled carefully and it should not be folded or mutilated in which case it will not be evaluated.
- 14. At the end of the examination, hand over the OMR Answer Sheet to the invigilator who will first tear off the original OMR sheet in presence of the Candidate and hand over the Candidate's Copy to the candidate.

57. If a and d are the first term and the common difference of the Arithmetic Progression respectively, then the nth term of corresponding Harmonic Progression is:

(A)
$$a^n = a + (n-1)d$$

(B)
$$a^n = 1/a + (n-1)d$$

(C)
$$a^n = a/1 + (n-1)d$$

(D)
$$a^n = a/a + (n-1)d$$

- 58. The roots of the quadratic equation $x^2 6x + 10 = 0$ are :
 - (A) Imaginary

(B) Real

(C) Irrational

- (D) Equal
- 59. If AB exists, then (AB)⁻¹ is:

(A)
$$A^{-1} B^{-1}$$

(B)
$$B^{-1}A^{-1}$$

(C) AB

- (D) None of the above
- 60. For what value of k will the two equations 2x + 4 = 4(x 2) and -x + k = 2x 1 have the same solution?
 - (A) 11

(B) 7

(C) -11

(D) 17

ROUGH WORK

1-n)+n'=n (8)

(D) $a^n = a/a + (n-1)c$

6x + 10 = 0 are:

(D) Equal

(B) B-1 A-1

(f)) None of the above

(D) Non

For what value of k will the two equations 2x + 4 = 4(x - 2) and -x + k = 2x

	(A)	Same	(B)	Lower
	(C)	Higher	(D)	None of the above
52.	Which o	of the following climatic controls	is the mo	ost important?
	(A)	Latitude	(B)	Longitude
	(C)	Continentality	(D)	Wind system
53.	Correlat	ion Coefficient varies from:		
	(A)	0-1	(B)	-1 to +1
	(C)	-1-0	(D)	None of the above
54.	What is	the standard deviation of the da	ata set; [1	14, 23, 9, 12, 21, 18, 8] ?
	(A)	15.987	(B)	13.456
	(C)	5.398	(D)	7.876
55.	Under w	hat circumstances should we be c	autious a	bout using the mean as the measure
	of centra	l tendency?		
	(A)	When the data is skewed		
	(B)	When the data is positively ske		
	(C)	When the data is negatively ske	ewed	
	(D)	All of the above		
56.	Which of	the following is true about the no	ormal sta	tistical distribution?
	(A)	99.7% of the data lies between	±3σ of t	he mean
	(B)	95.4% of the data lies between		
	(C)	68.2% of the data lies between	±1\sigma of t	he mean
	(D)	All of the above		
57.	Which of	the following statements is not of	correct?	
		$Log(2+3) = log(2\times3)$		$Log_{10} 10 = 1$
		$Log_{10} 1 = 0$		Log(1+2+3) = log1 + log2 + log3
CLN	1-53700 –	A		8

50. Western disturbances orginate from which sea?

- 58. What is the 30th term of the Arithmetic progression: 10, 7, 4,?
 - (A) 97

(B) -87

(C) -77

- (D) -67
- 59. Which of the following is not a quadratic equation?
 - (A) x + 1/x = 5

- (B) (x-3)(2x+1) = x(x+5)
- (C) (x-2)(x+1) = (x-1)(x+3) (D) (2x-1)(x-3) = (x+5)(x-1)
- 60. Find the determinant of the matrix:

$$\begin{bmatrix} 5 & -2 & 3 \\ 4 & -1 & -5 \\ 6 & 7 & 9 \end{bmatrix}$$

(A) 214

(B) 300

(C) 364

(D) 376

1.	Which	of the following is not an operating syste	m?	
	(A)		(B)	Red Hat Linux
	(C)	Mac OS X	(D)	Microsoft office XP
2.	The erro	ors that can be pointed out by the comp	iler are	:
	(A)	Syntax error	(B)	Symantic error
	(C)	Logical error	(D)	Internal error
3.	Which o	of the following is not a database manag	ement sy	ystem?
	(A)	Relation database management syster		
	(B)	Object oriented database managemen		n
	(C)	Network database management syste	m	
	(D)	Raster database management system		
4.	Which o	of the following performs modulation and	d demod	ulation?
	(A)	Fibre optics	(B)	Modem
	(C)	Coaxial cable	(D)	Satellite
5.	The rigio	d outer most layer of the earth is called:		
	(A)	Lithosphere	(B)	Outer core
	(C)	Asthenosphere	(D)	Mantle
6.	The Mol	no is located between:		
	(A)	Inner and outer core		
	(B)	Crust and Mantle		
	(C)	Lithosphere and Asthenosphere		
	(D)	Continental slope and abysmal plain		
7.	The most	t common mineral in the earth's crust is		
	(A)	Olivine	(B)	Feldspar
	(C)	Quartz	(D)	Hornblende
8.	Fossils ar	re most common in which type of the ro	cks?	
	(A)	Igneous	(B)	Sedimentary
	(C)	Metamorphic	• /	•
	(0)		(D)	All of the above

(A) Mulching (B) Tillage cropping (C) Check dams (D) All of the above 10. Land capability classification is based on which of the following properties? (A) Soil fertility, climate, topography and water availability (B) Geology, land degradation, weathering and geomorphology (C) Climate, vegetation, glaciers, population (D) None of the above 11. Soil erosion is associated with: (A) Dunes and heaving (B) Rills and ravines (C) Floods and water logging (D) Landslides and avalanches 12. Soil texture influences which of the following? (A) Hydrologic properties (B) Climatic processes (C) Tectonic processes (D) Magmatic properties 13. Microwaves used in remote sensing have: (A) Nanometer wavelength (B) Micrometer wavelength (C) Centimeter wavelength (D) All of the above 14. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 15. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS 16. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation (C) Height of the tree canopies (D) All of the above	9.	w nich c	of the following is a measure of soil c	conservation	?			
(A) Soil fertility, climate, topography and water availability (B) Geology, land degradation, weathering and geomorphology (C) Climate, vegetation, glaciers, population (D) None of the above 11. Soil erosion is associated with: (A) Dunes and heaving (B) Rills and ravines (C) Floods and water logging (D) Landslides and avalanches 12. Soil texture influences which of the following? (A) Hydrologic properties (B) Climatic processes (C) Tectonic processes (D) Magmatic properties (A) Nanometer wavelength (B) Micrometer wavelength (C) Centimeter wavelength (D) All of the above 14. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 15. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS		(A)	Mulching	(B)	Tillage cropping			
(A) Soil fertility, climate, topography and water availability (B) Geology, land degradation, weathering and geomorphology (C) Climate, vegetation, glaciers, population (D) None of the above 11. Soil erosion is associated with: (A) Dunes and heaving (B) Rills and ravines (C) Floods and water logging (D) Landslides and avalanches 12. Soil texture influences which of the following? (A) Hydrologic properties (B) Climatic processes (C) Tectonic processes (D) Magmatic properties 13. Microwaves used in remote sensing have: (A) Nanometer wavelength (B) Micrometer wavelength (C) Centimeter wavelength (D) All of the above 14. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 15. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS		(C)	Check dams	(D)	All of the above			
(B) Geology, land degradation, weathering and geomorphology (C) Climate, vegetation, glaciers, population (D) None of the above 11. Soil erosion is associated with: (A) Dunes and heaving (B) Rills and ravines (C) Floods and water logging (D) Landslides and avalanches 12. Soil texture influences which of the following? (A) Hydrologic properties (B) Climatic processes (C) Tectonic processes (D) Magmatic properties 13. Microwaves used in remote sensing have: (A) Nanometer wavelength (B) Micrometer wavelength (C) Centimeter wavelength (D) All of the above 14. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 15. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS	10.	Land cap	pability classification is based on wh	nich of the fo	llowing properties?			
(C) Climate, vegetation, glaciers, population (D) None of the above 11. Soil erosion is associated with: (A) Dunes and heaving (B) Rills and ravines (C) Floods and water logging (D) Landslides and avalanches 12. Soil texture influences which of the following? (A) Hydrologic properties (B) Climatic processes (C) Tectonic processes (D) Magmatic properties 13. Microwaves used in remote sensing have: (A) Nanometer wavelength (B) Micrometer wavelength (C) Centimeter wavelength (D) All of the above 14. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 15. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS		- · ·						
(D) None of the above 11. Soil erosion is associated with: (A) Dunes and heaving (B) Rills and ravines (C) Floods and water logging (D) Landslides and avalanches 12. Soil texture influences which of the following? (A) Hydrologic properties (B) Climatic processes (C) Tectonic processes (D) Magmatic properties 13. Microwaves used in remote sensing have: (A) Nanometer wavelength (B) Micrometer wavelength (C) Centimeter wavelength (D) All of the above 14. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 15. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS 16. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation		(B)	Geology, land degradation, weather	ering and geo	omorphology			
11. Soil erosion is associated with: (A) Dunes and heaving (B) Rills and ravines (C) Floods and water logging (D) Landslides and avalanches 22. Soil texture influences which of the following? (A) Hydrologic properties (B) Climatic processes (C) Tectonic processes (D) Magmatic properties 33. Microwaves used in remote sensing have: (A) Nanometer wavelength (B) Micrometer wavelength (C) Centimeter wavelength (D) All of the above 44. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 55. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS 66. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation		(C)	Climate, vegetation, glaciers, popu	ılation				
(A) Dunes and heaving (B) Rills and ravines (C) Floods and water logging (D) Landslides and avalanches 12. Soil texture influences which of the following? (A) Hydrologic properties (B) Climatic processes (C) Tectonic processes (D) Magmatic properties 3. Microwaves used in remote sensing have: (A) Nanometer wavelength (B) Micrometer wavelength (C) Centimeter wavelength (D) All of the above 4. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 15. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS 16. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation		(D)	None of the above					
(B) Rills and ravines (C) Floods and water logging (D) Landslides and avalanches (2. Soil texture influences which of the following? (A) Hydrologic properties (B) Climatic processes (C) Tectonic processes (D) Magmatic properties (A) Nanometer wavelength (B) Micrometer wavelength (C) Centimeter wavelength (D) All of the above (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS (B) Crustal deformation	11.	Soil eros	sion is associated with:					
(C) Floods and water logging (D) Landslides and avalanches 2. Soil texture influences which of the following? (A) Hydrologic properties (B) Climatic processes (C) Tectonic processes (D) Magmatic properties 3. Microwaves used in remote sensing have: (A) Nanometer wavelength (B) Micrometer wavelength (C) Centimeter wavelength (D) All of the above 4. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 5. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS		(A)	Dunes and heaving					
(D) Landslides and avalanches 2. Soil texture influences which of the following? (A) Hydrologic properties (B) Climatic processes (C) Tectonic processes (D) Magmatic properties 3. Microwaves used in remote sensing have: (A) Nanometer wavelength (B) Micrometer wavelength (C) Centimeter wavelength (D) All of the above 4. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 5. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS 6. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation		(B)	Rills and ravines					
12. Soil texture influences which of the following? (A) Hydrologic properties (B) Climatic processes (C) Tectonic processes (D) Magmatic properties 13. Microwaves used in remote sensing have: (A) Nanometer wavelength (B) Micrometer wavelength (C) Centimeter wavelength (D) All of the above 14. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 15. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS 16. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation		(C)	Floods and water logging					
(A) Hydrologic properties (C) Tectonic processes (D) Magmatic processes (C) Tectonic processes (D) Magmatic properties (A) Microwaves used in remote sensing have: (A) Nanometer wavelength (B) Micrometer wavelength (C) Centimeter wavelength (D) All of the above (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes (E) Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS		(D)	Landslides and avalanches					
(C) Tectonic processes (D) Magmatic properties 13. Microwaves used in remote sensing have: (A) Nanometer wavelength (B) Micrometer wavelength (C) Centimeter wavelength (D) All of the above 14. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 15. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS 16. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation	12.	Soil text	ure influences which of the following	g?				
3. Microwaves used in remote sensing have: (A) Nanometer wavelength (B) Micrometer wavelength (C) Centimeter wavelength (D) All of the above 4. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 5. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS 6. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation		(A)	Hydrologic properties	(B)	Climatic processes			
(A) Nanometer wavelength (C) Centimeter wavelength (D) All of the above 4. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 5. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS 6. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation		(C)	Tectonic processes	(D)	Magmatic properties			
(C) Centimeter wavelength (D) All of the above 4. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 5. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS 6. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation	3.	Microw	aves used in remote sensing have:					
4. Digital Elevation Model is a representation of: (A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 5. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS 6. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation		(A)	Nanometer wavelength	(B)	Micrometer wavelength			
(A) Electromagnetic radiation (B) Surface topography (C) Mountain orography (D) Land surface processes 5. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS 6. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation		(C)	Centimeter wavelength	(D)	All of the above			
(C) Mountain orography (D) Land surface processes 5. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS 6. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation	4.	Digital H	Elevation Model is a representation of	of:				
 5. Which of the following is an example of the high spatial resolution satellite? (A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS 6. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation 		(A)	Electromagnetic radiation	(B)	Surface topography			
(A) NOAA (B) MODIS (C) LANDSAT (D) IKONOS 6. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation		(C)	Mountain orography	(D)	Land surface processes			
(C) LANDSAT (D) IKONOS 6. Global Positioning System is used for determining the: (A) Location and altitude (B) Crustal deformation	5.	Which o	f the following is an example of the l	nigh spatial r	esolution satellite?			
 6. Global Positioning System is used for determining the : (A) Location and altitude (B) Crustal deformation 		(A)	NOAA	(B)	MODIS			
(A) Location and altitude (B) Crustal deformation		(C)	LANDSAT	(D)	IKONOS			
(A) Location and altitude (B) Crustal deformation	6.	Global P	ositioning System is used for determ	nining the:				
					Crustal deformation			
		(C)	Height of the tree canopies	(D)	All of the above			

17.	Lysimei	ter is used to measure:					
	(A)	Precipitation	(B)	Soil moisture			
	(C)	Evaporation	(D)	Evapo-transpiration			
18.	What does a hyetograph display?						
	(A)	Variations in snowfall over time	2				
	(B)	Variations in river discharge ov	er time				
	(C)	Variations in water temperature	e over time				
	(D)	Variations in rainfall over time					
19.	Hard wa	ater contains high concentration o	of:				
	(A)	Silicon	(B)	Lead			
	(C)	Cadmium	(D)	Calcium			
20.	Hydropo	ower potential estimation is depe	ndent on :				
	(A)	Head	(B)	Stream flow and velocity			
	(C)	Gravity	(D)	All of the above			
21.	Which o	of the following international co	onventions is fo	or the protection of Ozone			
	layer?						
	(A)	UNFCCC	(B)	CBD			
	(C)	UNCCD	(D)	None of the above			
22.	The alga	l bloom in the lakes is due to:					
	(A)	(A) Increase in the greenhouse gases attributed to Climate change					
	(B)	Explosive increase in Cyanobac	cteria				
	(C)	Growth of certain fungi in humid	d conditions				
	(D)	Excessive loading of heavy met	als				
23.	The J&K	and other Himalayan states are	highly vulnerat	ole to earthquake disasters			
	because	of:					
	(A)	The high relief and mountainous	sterrain				
	(B)	The stress generated by continue	d northward mo	ovement of the Indian plate			
	(C)	The high volcanic activity in the		-			
	(D)						

24.	Snow and glacier melt constitutes:							
	(A)	Almost half of the stream-flow discharge in J&K state						
	(B)	The entire stream-flow discharge in the J&K state						
	(C)	Negligible proportion of the stream-flow discharge in the J&K state						
	(D)	None of the above						
25.	Which e	of the following is an example of Ch	noropleth mag	os?				
	(A)	Population density map	(B)	Drainage map				
	(C)	Digital elevation model	(D)	Satellite image				
26.	As per tl	he 2011 census, what is the popula	ation of J&K	state?				
	(A)	10.90 million	(B)	11.20 million				
	(C)	18.5 million	(D)	12.5 million				
27.	Changth	ang wildlife sanctuary hosts which	of the followir	ng wildlife?				
	(A)	Snow leopard and lbex						
	. (B)	European red deer and brown be	ear					
	(C)	Black bear and Musk deer						
	(D)	All of the above		•				
28.	Which o	of the rivers in the state has the high	est hydropow	er energy potential?				
	(A)	Jhelum	(B)	Chenab				
	(C)	Indus	(D)	Tawi				
29.	The enzy	yme that fixes atmospheric CO2 in	C4 plants is:					
	(A)	Aldolase	(B)	Hydrogenase				
	(C)	PEP carboxylase	(D)	RUBP carboxylase				
30.	What is	the primary route of mineral absorp	ption by roots	?				
	(A)	Root hairs	(B)	Cortex of the root	*			
	(C)	Epidermis of the root	(D)	Casparian strips				
31.	Epigeal g	germination is found in :						
	(A)	Pea	(B)	Gram				
	(C)	Castor	(D)	Jowar				
	` /		` /					

32.	During cellular respiration, NADH is:						
	(A)	Used in electron transport system					
	(B)	Converted to NAD+ by an enzyme called dehydrogenase					
	(C)	Reduced to form NAD+					
	(D)	None of the above					
33.	Geograp	phically India falls in which of the	e major biomes	of the world?			
	(A)	Tropical rain forest	(B)	Tropical dry forest			
	(C)	Tropical savannah	(D)	Tundra			
34.	Which o	f the following is false?					
	(A)	The thyroid gland secrets clacitonin					
	(B)	Thyroxin is formed by iodination of tyrosine					
	(C)	A hormone may be secreted by nerve cells					
	(D)	Melatonin is secreted by pituita	ary gland				
35.	The scien	ntific name of Kashmir stag (Han	ngul) is :				
	(A)	Moschus fuscus hanglu	(B)	Cervus elaphus hanglu			
	(C)	Muntiacus muntjac hanglu	(D)	Cervicapra hanglu			
36.	Cholecys	stokinin harmone is produced in	:				
	(A)	The stomach	(B)	The pancreas			
	(C)	The small intestines	(D)	The mouth			
37.	Which of	f the following are not electroma	gnetic waves?				
	(A)	Cosmic rays	(B)	X-rays			
	(C).	Gamma rays	(D)	Beta rays			
38.	If the dis	tance between the sun and the e	arth is increase	ed by three times, then the			
		between the two will:		- , , , , ,			
	(A)	Remain constant	(B)	Decrease by 63%			
	(C)	Decrease by 89%	(D)	Decrease by 73%			

39.	When the amount of work done is 333 cal and increase in internal energy is 167 cal,								
	then the	heat supplied is:							
	(A)	500 cal	(B)	433 cal					
	(C)	333 cal	(D)	167 cal					
1 0.	Both ele	ctric and magnetic fields in an electrom	agnetic v	vaves are :					
	(A)	(A) Perpendicular to the direction of the propagation of wave							
	(B)	Parallel to the direction of the wave propagation							
	(C)	Opposite the direction that the wave travels							
	(D)								
1 1.	What is	the electronic configuration of Co?							
	(A)	$[Ar] 4s^2 3d^{10}$	(B)	$[Ar] 4s^2 3d^2$					
	(C)	[Ar] 4d1 3d3	(D)	[Ar] 3d7 4s2					
12.	If both, the pressure and volume of a gas are doubled, how will the absolute								
	temperature change?								
	(A) It will increase by two times its original value								
	(B)	(B) It will decrease to one fourth of its original value							
	(C)	C) It will stay the same as its original value							
	(D)	(D) It will increase by four times its original value							
1 3.	Which among the following does not have the hydrogen bond?								
	(A)	Phenol	(B)	Liquid NH3					
	(C)	Liquid HCl	(D)	Water					
14.	The oxid	lation number of Carbon in CH2O is:		1					
	(A)	-2	(B)	+2					
	(C)	0	(D)	+3					
15.	The Ozo	ne layer is found in:		•					
	(A)	Troposphere	(B)	Stratosphere					
	(C)	Thermosphere	(D)	Mesosphere					

46.	Which of the following is not a Greenhouse gas?					
	(A)	Carbon dioxide	(B)	Carbon monoxide		
	(C)	Methane	(D)	Chlorofluorocarbons		
47.	Black c	arbon enhances the melting of Hin	nalayan gl	aciers as the black carbon		
	depositi	on:				
	(A)	Decreases the albedo causing positi	ve radiativ	e forcing		
	(B)	Increases the albedo causing negative	ve radiative	eforcing		
	(C)	Results in acid rains in the ablation a	zone			
	(D)	None of the above				
48.	Which	one of the following is an importa	nt minor f	orest produce in Kashmir		
	Himalay	vas?				
	(A)	Bamboo	(B)	Mushrooms		
	(C)	Dioscorea	(D)	None of the above		
49.	Isohytes	are the lines joining the points of equa	al:			
	(A)	Temperature	(B)	Height		
	(C)	Pressure	(D)	Precipitation		
50.	Carbon s	sequestration is achieved through:		•		
	(A)	Rocks	(B)	Soils		
	(C)	Plants	(D)	All of the above		
51.	The pace	e of the anthropogenic climate change	e can be rec	duced by :		
	(A)	The use of renewable sources of end	ergy			
	(B)	Reducing the deforestation				
	(C)	Reducing the use of fossil fuels				
	(D)	All of the above				
52.	The clim	ate of the Kashmir valley is determine	ed by :			
	(A)	Westerlies	(B)	Trade winds		
	(C)	Monsoons	(D)	None of the above		

53.	For the data	series: 2,	1, 6, 4	and 2:

(A) The mode is 4

- (B) The median is 3
- (C) The standard deviation is 4
- (D) The mean is 3

54. Which of the following are true about the normal distribution?

- (A) 95% of the observations lie between the mean and two standard deviations
- (B) 68% of the observations lie between the mean and one standard deviation
- (C) The mean, median and mode coincide
- (D) All of the above

55. Which of the following statements is true for the standard error of the mean (SEM)?

- (A) SEM is the square root of the variance
- (B) SEM assesses the reliability of the mean
- (C) SEM measures the spread of observations around the mean
- (D) SEM is always larger than the standard deviation

- (A) Cluster sampling
- (B) Simple random sampling
- (C) Systematic sampling
- (D) Proportionate stratified sampling

(A) 1

(B) 0

(C) A' * A

(D) A'

58. Find the cofactor,
$$A_{23}$$
, of the matrix $A = \begin{bmatrix} 5 & -2 & 7 \\ 6 & 1 & -9 \\ 4 & -3 & 8 \end{bmatrix}$:

(A) 7

(B) 0

(C) 23

(D) -23

- 59. The values of x, y, z in order, if the systems of equations 3x + y + 2z = 3, 2x 3y z = -3 and x + 2y + z = 4 are:
 - (A) 2, 1, 4

(B) 1, 2, -3

(C) 1, 2, -1

- (D) 1, 1, 1
- 60. If the ratio of the sum of the first 6 terms of a Geometric Progression (G.P) to the sum of the first 3 terms of the G.P. is 9, what is the common ratio of the G.P.?
 - (A) 3

(B) 1/3

(C) 2

(D) 9

Geo-informatics

1.	Which of	f the following is an internet brows	er?	
	(a)	Chrome	(b)	Internet Explorer
	(c)	Firefox	(d)	All of the above
		*		
2.	DBMS d	lon't use which of the following da	atabase	estructure?
	(a)	Hierarchical model	(b)	Network model
	(c)	Topologic model	(d)	Relational model
3.	Which o	f the following is an example of th	e sprea	adsheet software?
	(a)	MS Excel	(b)	Lotus
	(c)	Xoom Office	(d)	All of the above
4.	Bytecod	e is :		
	(a)	A compiler that produces an inde	epende	ent executable file
	(b)	Is not a machine code and thus,		
	(c)	A data type in C programming la		
	(d)	A database Management System		
5.	Horn, C	ol, Cirque and Arete are associate	d with	a landforms produced by:
	(a)	Running water	(b)	Ground water
	(c)	Wind action	(d)	Glaciers
6.	A rock	dominated in composition by Qua	rtz and	l Feldspar is :
0.	(a)	Basalt	(b)	
	(c)	Granite	(d)	
	(0)			
7.	Which	of the following rocks has higher p	orosit	y but lower permeability?
	(a)	Limestone	(b)	Sandstone
	(c)	Conglomerate	(d)	Shale

	earthquak	ce?		
	(a)	The modified Mercalli scale	(b)	The elastic rebound theory
	(c)	The principle of superposition	(d)	The travel difference
				6 .
9.	Which of	the following agents of erosion sha	ll be c	lominant in arid environments?
	(a)	Water	(b)	Wind
	(c)	Gravity	(d)	Ice
10.	Land use	and Land cover information can b	e gene	erated through:
	(a)	Remote sensing	(b)	GIS
	(c)	Topographic surveys	(d)	GPS
11.	In chemic	cal weathering, which of the follow	ing pi	rocesses are important?
	(a)	Hydrolysis	(b)	Oxidation
	(c)	Dissolution	(d)	All of the above
12.	Peat soils	s have:		
	(a)	High carbon content	(b)	Low carbon content
	(c)	High sand content	(d)	None of the above
13.	Radar re	mote sensing sensors:		
	(a)	Can see through clouds		
	(b)	Can penetrate water surface		
	(c)	Are passive sensor		
	(d)	Operate in the visible part of the	spectr	um
14.	The com	ponents of a typical Geographic In	form	ation System are:
	(a)	Hardware, software, data and us	ers	
	(b)	Satellites, computers, printers and		
	(c)	GPS, remote sensing, digital cart		
	(d)	Computers, DEM, applications	and G	PS

Which of the following explains the build up and release of stress during an

8.

	(a)	Stereo images	(b)	GPS measurements
	(c)	Contour lines	(d)	All of the above
				2
16.	Vector C	GIS data model is suitable for:		
	(a)	Network analysis	(b)	Slope analysis
	(c)	Digital cartography	(d)	Aspect analysis
				w
17.	Theisser	n polygons describe:		
	(a)	A network of rainfall gauges		
	(b)	Contours of equal rainfall across	an are	ea
	(c)	Polygons that contribute to exces	s over	land flow
	(d)	Polygons created by drawing straig	ght lin	es at equal distance between points
18.	What do	es a hydrograph display?		
	(a)	Variations in snowfall over time		
	(b)	Variations in river discharge over	time	
	(c)	Variations in water temperature of	ver tin	ne
	(d)	Variations in rainfall over time		
	_			
19.		tion pans provide an approximate e		
	(a)	Actual transpiration	(b)	Actual evaporation
	(c)	Potential evapo-transpiration	(d)	Actual evapo-transpiration
20		00 0 1		
20.		00-year flooding event means:		
	(a)	Flood will occur once in 100 year		. H
	(b)	There is 1% chance of a flooding		
	(c)	There is high probability of the b	iggest	of the 100 years flood occurring
	(4)	this year		
	(d)	There is high chance of flooding of	ccurr	ing once every year
21	Whiele e	C41 - C-11	1	
21.		f the following is not a major green		•
	(a)	Water vapour	(b)	Carbon dioxide
	(c)	Methane	(d)	Nitrogen
TT X	iniac			*

15. Digital Elevation Model can be generated from:

	(a)	Earthquake	(b)	Flooding	
	(c)	Landslides	(d)	Tsunamis	
23.	Millenr	nium development goals that all nati	on eta	star have acroed to	
	(a)	Address climate change issues	OH SIA	ites have agreed to ;	
	(b)	Address Biodiversity conservation	n iccı	100	*
	(c)	Combat desertification in the dev			
	(d)			e socio-economic conditions in the	
		poorest countries		social socialities and the social soc	
24.	The hun	nan interference in the nitrogen cycl	le has	led to:	
	(a)	Eutrophication of lakes	(b)	Increased acid rains	
	(c)	Nitrous oxide release	(d)	All of the above	
25.	Which o	of the following is not an essential el	emen	t of the map composition?	
	(a)	Legend	(b)	Scale	
	(c)	Direction	(d)	Path/row	
26.	In J&K	State, the dominant forest type is:			
	(a)	Himalayan moist temperate forest	(b)	Himalayan dry temperate forest	
	(c)	Sub tropical dry evergreen forest	(d)	All of the above	
27.	Black-ne	ecked crane is found in which of the	follo	wing wildlife parks?	
	(a)	Dachigam	(b)	Kishtwar	, a
	(c)	Changthang	(d)	Hemis	4. 4. 4.
	×			, 4°3	all the state of t
28.	The Stat	e has an identified potential for geot	herm	al energy in:	, \$,
	(a)	Kashmir Valley	(b)	Puga valley	
	(c)	Chinta valley	(d)	Suru valley	
29.	Genetic l	Engineering allows us to directly ma	nipula	ate:	
	(a)	RNA	(b)	DNA	
	(c)	Cell membranes	(d)	Bacteria

30.	Panjal T	raps mainly consist of:					
	(a)	Granite	(b)	limestone			
	(c)	Basalt	(d)	All of the above			
31.	Which o	f the following is not a measure o	f the ce	ntral tendency?			
	(a)	Mean	(b)	Mode			
	(c)	Median	(d)	Standard deviation			
32.	Scatterplots are used to show relationship between:						
	(a) Mean and standard deviation of the data						
	(b)	Histogram and variance					
	(c)	Any two variables					
	(d)	All of the above					
33.	The distribution of heights of students in a class is roughly bell-shaped. Moreover,						
	the average height is 68 inches and approximately 95% of the heights are between						
	62 and 74 inches. The standard deviation of the height distribution is approximately:						
	(a)	12	(b)	9			
	(c)	6	(d)	3			
34.	If n is a positive integer such that $n!/(n-2)! = 342$, find n:						
	(a)	15	(b)	19			
	(c)	17	(d)	18			
35.	For wha	t value of k will the two equation	ons 2x +	-4 = 4(x-2) and $-x + k = 2x - 1$			
		same solution?					
	(a)	11	(b)	7			

	I.	$x^5 < x $					
	II.	$x < \sqrt{(-x)}$					
	III.	x - 1/ x < 0					
	(a)	II and III only	(b)	I, II and III			
	(c)	I and II only	(d)	I and III only			
37.	What i	s the sum of the reciprocal	s of t	he solutions to the equation			
	$x^2 - (3/5)$	x = -11/3?					
	(a)	3/11	(b)	9/33			
	(c)	9/55	(d)	55/33			
38.	The am	ount of a radioactive materi	al dec	ays according to the formula			
	A(t) = A	e ht where, A is the initial amour	nt, k is a	positive constant and t is the time			
	in days.	Find a formula for the half life of t	he mat	erial :			
	(a)	$T = \ln 2/k$	(b)	T = In 4/k			
	(c)	$T = \ln k/10$	(d)	None of the above			
39.	The level of sound D in decibels is defined as D = $10 \log(1/10^{-16})$, where I is the						
	sound intensity in watts/cm ² . Determine the level in decibels of a sound with intensity $I = 10^{-8}$ watts/cm ² :						
			4.5	00.1.7.1			
	(a)	60 decibels	(b)	80 decibels			
	(c)	120 decibels	(d)	10 decibels			
40.	Find the 10^{th} term of a geometric sequence if $a_1 = 45$ and the common ratio $r = 0.2$:						
	(a)	4.601 × 10 ⁻²	(b)	2.304 × 10 ⁻²⁵			
	(c)	2.304×10^{-5}	(d)	2.304 × 10 ⁻⁹			
41.	Two waves of same wavelength and amplitude interfere to produce a minimum when						
	phase di	fference is:					
	(a)	0	(b)	π/2			
	(c)	π	(d)	$3\pi/2$			
42.	In electr	ic wires, copper is used for electri	c condi	uction mainly because :			
	(a)	It has low electrical resistivity	(b)	It is cheaper			
	(c)	It is very durable and light	(d)	It has a high melting point			

36. If x is a negative number, which of the following must be true?

43.		of charged particle moving in a	The second second				
	100.00	Straight line		Helix			
	(c)	Circle	(d)	All of the above			
44.		oservation Satellites use which p	art of ele	ectromagnetic radiation for remote			
	sensing:	Commonweal	75.5	C			
	(a) (c)	Gamma rays Sunlight	(p)	•			
	(c)	Sungn	(d)	Radio waves			
15.	Which o	f the following is not a renewab	ole source	e of energy?			
	(a)	Ocean currents	(b)	Biomass			
	(c)	Geothermal	(d)	Uranium			
16.		Rutherford's experiment, which established the nuclear model of the atom, used a					
	beam of		110.00	00.40			
	2015	Helium nuclei	(b)	Helium atoms			
	(c)	Beta particles	(d)	Gamma rays			
17.	NH ₄ Cl contains:						
	(a)	Covalent bond	(b)	Ionic bond			
	(c)	Coordinate covalent bond	(d)	All of the above			
18.	Which of the following is not a salt?						
	(a)	Lead sulphide	(b)	Sodium chloride			
	(c)	Slaked lime	(d)	Zinc nitrate			
19.	Atmospheric chemistry includes study of aerosols which are responsible for :						
	(a) Global warming and climate change						
	(b)	(b) Scattering of incoming solar radiation					
	(c)	Weather of earth system					
	(d)	All of the above					
50.	Which a	Which among the following oxides of nitrogen on dissolution in water produces an					
		ch can act as, both, reducing and					
		NO	(b)	N,O,			
	(c)	NO,	(d)	N ₂ O ₅			

51.	The wool for the shahtoosh shawls is obtained from:						
	(a)	Red deer	(b)	Tibetan antelope			
	(c)	Barking dear	(d)	Wild goat			
52.	Which o	f the following minor forest produ	ce in J &	& K has tremendous economic and			
	medicina	al importance?					
	(a)	Hazel nut	(b)	Dioscorea			
	(c)	Resin	(d)	Oleander			
53.	Genetic	engineering has established its app	dication	as in the field of:			
	(a) Food production and food security						
	(b)	Population control					
	(c)	Renewable energy generation					
	(d)	All of the above					
		š					
54.			oth and	rough ER, and other parts. Based			
	on this ir	formation, it could not be:					
	(a)	and the second of the second o		A grasshopper cell			
	(c)	A yeast (fungus) cell	(d)	A bacterium			
55.	In nutrient cycles in general, the minerals tend to be dispersed through:						
	(a)	Evaporation	(b)	Assimilation			
	(c)	Conduction	(d)	Surface and Sub-surface runoff			
56.	Which of the following are floating ocean plants and animals?						
	(a)	Nekton	(b)	Plankton			
	(c)	Benthos	(d)	terrenus			
57.	Which o	f the following is a correct reaction	n for pl	notosynthesis?			
	(a) $6CO_2 + C_6H_{12}O_6 + \text{solar energy} = 6O_2 + 6H_2O$						
	(b)	(b) $6H_2O + 6CO_2 + \text{solar energy} = C_6H_{12}O_6 + 6O_2$					
		(c) $6H_2O + C_6H_{12}O_6 + \text{solar energy} = 6O_2 + 6CO_2$					
	(d)						
58.	Fungi an	nd bacteria, which breakdown orga	ınic ma	itter and return nutrients to the soil,			
	are called:						
	(a)	Decomposers	(b)	Autotrophs			
	(c)	Imposters	(d)	Producers			

F/3	Tt t C C C	trophic level to the next is an example of:
59.	The loss of energy from one	rophic level to the next is an example of :

- (a) The law of conservation of matter
- (b) The First law of thermodynamics
- (c) The Second law of thermodynamics
- (d) The recycling of nutrients

60. Which of the following is a Ramsar Site in J & K?

- (a) Dal lake
- (b) Gangabal lake
- (c) Manasbal lake
- (d) Tsomoriri lake
