# ENTRANCE TEST-2022

SCHOOL OF ENVIRONMENTAL AND EARTH SCIENCES

GEO-INFORMATICS

Question Booklet Series

**B**

Total Questions : 60

Time Allowed : 70 Minutes

Roll No. :

--	--	--	--	--	--	--	--

### Instructions for Candidates :

1. Write your Entrance Test Roll Number in the space provided at the top of this page of Question Booklet and fill up the necessary information in the spaces provided on the OMR Answer Sheet.
2. OMR Answer Sheet has an Original Copy and a Candidate's Copy glued beneath it at the top. While making entries in the Original Copy, candidate should ensure that the two copies are aligned properly so that the entries made in the Original Copy against each item are exactly copied in the Candidate's Copy.
3. All entries in the OMR Answer Sheet, including answers to questions, are to be recorded in the Original Copy only.
4. Choose the correct / most appropriate response for each question among the options A, B, C and D and darken the circle of the appropriate response completely. The incomplete darkened circle is not correctly read by the OMR Scanner and no complaint to this effect shall be entertained.
5. Use only blue/black ball point pen to darken the circle of correct/most appropriate response. In no case gel/ink pen or pencil should be used.
6. Do not darken more than one circle of options for any question. A question with more than one darkened response shall be considered wrong.
7. There will be '**Negative Marking**' for wrong answers. Each wrong answer will lead to the deduction of 0.25 marks from the total score of the candidate.
8. Only those candidates who would obtain positive score in Entrance Test Examination shall be eligible for admission.
9. Do not make any stray mark on the OMR sheet.
10. Calculators and mobiles shall not be permitted inside the examination hall.
11. Rough work, if any, should be done on the blank sheets provided with the question booklet.
12. OMR Answer Sheet must be handled carefully and it should not be folded or mutilated in which case it will not be evaluated.
13. Ensure that your OMR Answer Sheet has been signed by the Invigilator and the candidate himself/herself.
14. At the end of the examination, hand over the OMR Answer Sheet to the invigilator who will first tear off the original OMR sheet in presence of the Candidate and hand over the Candidate's Copy to the candidate.

1. Which of the following UNS SDGs focuses on sustainable cities and communities ?
  - (A) Goal 9
  - (B) Goal 10
  - (C) Goal 11
  - (D) Goal 12
2. How many nation-states have signed UNFCCC ?
  - (A) 145
  - (B) 155
  - (C) 165
  - (D) 175
3. Disaster Management Act was passed by Rajya Sabha in :
  - (A) 2005
  - (B) 2006
  - (C) 2007
  - (D) 2008
4. Which of the following Acts was passed by the Indian Parliament in wake of the Bhopal Gas Tragedy ?
  - (A) Environmental Protection Act
  - (B) Disaster Management Act
  - (C) Air (Prevention and Control of Pollution) Act
  - (D) Water Pollution Act
5. Which one of the following is the largest National Park ?
  - (A) Kazinag National Park
  - (B) Dachigam National Park
  - (C) Hemis National Park
  - (D) Desert National Park
6. The largest glacier in Kashmir Valley is :
  - (A) Kolahoi
  - (B) Thajiwas
  - (C) Nehnar
  - (D) Shishram
7. The largest wetland of UT of J&K is :
  - (A) Wular
  - (B) Hokersar
  - (C) Shallabug
  - (D) Mansar
8. Map scale is :
  - (A) The ratio between a distance on a map and the corresponding distance on the ground
  - (B) The ratio between a distance on the ground and the corresponding distance on a map
  - (C) The ratio between a distance on the ground and the corresponding distance on a GPS
  - (D) All of these
9. Eutrophication of lake ecosystems is due to :
  - (A) High DO and bacteria
  - (B) Nitrogen and phosphorous
  - (C) Chromium and mercury
  - (D) Lead and hydrogen sulphide
10. Which of the following regions has the highest biodiversity ?
  - (A) Tundra
  - (B) Taiga
  - (C) Mangroves
  - (D) Tropical rain-forest

11. The final stable community in an ecological succession is called :
- (A) Seral community  
(B) Final community  
(C) Ultimate community  
(D) Climax community
12. The process of weakening the seed coat to break the dormancy is called :
- (A) Vernalisation  
(B) Scarification  
(C) Stratification  
(D) None of the above
13. Which of the following is a state bird of UT of J&K ?
- (A) Kalij Pheasant  
(B) Black-necked crane  
(C) Paradise flycatcher  
(D) Himalayan vulture
14. Which of the following natural regions is known as the 'Land of Big Games' ?
- (A) Temperate grassland  
(B) Tropical monsoon region  
(C) Tropical savannah region  
(D) Tundra
15. Permafrost is found in which of the following biomes ?
- (A) Tundra  
(B) Taiga  
(C) Grassland  
(D) Forest
16. Which of the following prevents the entry of food into the windpipe ?
- (A) Trachea  
(B) Larynx  
(C) Epiglottis  
(D) Pharynx
17. Which of the following waves have the shortest wavelength ?
- (A) Cosmic rays  
(B) X-rays  
(C) Microwaves  
(D) Radiowaves
18. The speed of light in vacuum is approximately :
- (A) 300000 km/s  
(B) 300000 m/s  
(C) 300000 mi/s  
(D) 300000 cm/s
19. When a cricket ball is thrown up vertically, the force of gravity acting on it :
- (A) Is opposite to the direction of motion of the ball  
(B) Is in the same direction of motion as the ball  
(C) Increases as it rises up  
(D) None of the above
20. What happens when light travels from air to glass ?
- (A) It bends towards the normal  
(B) It bends away from the normal  
(C) It becomes parallel to the normal  
(D) There is no change

21. The density of water is maximum at :
- (A) 0°C
  - (B) 1°C
  - (C) 2°C
  - (D) 4°C
22. Who was the first to propose the Atomic Theory ?
- (A) J.J. Thomson
  - (B) John Dalton
  - (C) Neils Bohr
  - (D) T.A. Edison
23. Which of the following given elements is the most electropositive ?
- (A) S
  - (B) Cl
  - (C) Mg
  - (D) Al
24. The equation of state for an ideal gas is represented as :
- (A)  $PV=R/T$
  - (B)  $P/V=RT$
  - (C)  $P/V=nRT$
  - (D)  $PV=nRT$
25. Carbon is a common component of :
- (A) Limestone
  - (B) All organisms
  - (C) Volcanic gases
  - (D) All of the above
26. How does the concentration of carbon dioxide in the atmosphere affect climate ?
- (A) As carbon dioxide concentration increases, temperatures decreases
  - (B) As carbon dioxide concentration increases, temperatures increases
  - (C) Carbon dioxide concentrations do not affect climate
  - (D) As carbon dioxide concentrations increase, temperatures become more random
27. Which process releases nitrogen gas ( $N_2$ ) back into the atmosphere ?
- (A) Denitrification
  - (B) Nitrogen fixation
  - (C) Decay
  - (D) Nitrification
28. Phosphorus does NOT travel through which of the following spheres ?
- (A) Lithosphere
  - (B) Atmosphere
  - (C) Biosphere
  - (D) Geosphere
29. Although direct measurements of atmospheric carbon dioxide have only been taken consistently since the 1950s, scientists have been able to retrieve data from the proxies that include :
- (A) Ice cores from ice sheets
  - (B) Sediment cores from the ocean
  - (C) Tree rings
  - (D) All of the above

30. The height of the troposphere is approximately :
- (A) 80 km
  - (B) 50 km
  - (C) 12 km
  - (D) 120 km
31. The lowest layer of the atmosphere is :
- (A) Troposphere
  - (B) Stratosphere
  - (C) Ionosphere
  - (D) Thermosphere
32. Which of the following is a primary air pollutant ?
- (A) Ozone
  - (B) Formaldehyde
  - (C) Photochemical smog
  - (D) Hydrocarbons
33. The median of 2,6,6,8,4,2,7,9 values is :
- (A) 4
  - (B) 5
  - (C) 6
  - (D) 7
34. The average of the three numbers is 21. If two of the numbers are 4 and 12, what is the remaining number ?
- (A) 37
  - (B) 47
  - (C) 57
  - (D) 67
35. The fishbowl draw is a method of drawing :
- (A) Independent sample
  - (B) Structured sample
  - (C) Non-random sample
  - (D) Random sample
36. For a perfectly homogenous population, the minimum required sample size is :
- (A) 1
  - (B) 2
  - (C) Whole population
  - (D) Infinite
37. The sum of the first 200 natural numbers is :
- (A) 19100
  - (B) 20100
  - (C) 21100
  - (D) 22100
38. If  $A = \begin{bmatrix} -1 & 4 \\ 5 & 8 \end{bmatrix}$ , the trace of matrix A is :
- (A) 6
  - (B) 7
  - (C) 8
  - (D) 9
39. What is the order of matrix  $A = \begin{bmatrix} 3 & 5 \\ 7 & 9 \end{bmatrix}$  ?
- (A) 2×3
  - (B) 2×2
  - (C) 3×3
  - (D) 4×4

40. The main key difference between AND gate and OR gate is that :
- (A) AND gate gives a true output only when all the inputs are true whereas the OR gate gives a true output when at least one of the inputs is true
- (B) AND gate gives a true output only when one of the inputs is true whereas the OR gate gives a true output when all the inputs are true
- (C) Both (A) and (B)
- (D) None of the above
41. The decimal equivalent of 101010 is :
- (A) 38
- (B) 40
- (C) 42
- (D) 44
42. The binary equivalent of 323 :
- (A) 101000111
- (B) 101000010
- (C) 101000001
- (D) 101000011
43. The full form of HTTP is :
- (A) HyperText Transfer Package
- (B) HyperTransfer Text Package
- (C) HyperText Transfer Protocol
- (D) HyperText Transfer Practice
44. The location of a resource on the internet is given by :
- (A) URL
- (B) Email
- (C) IP
- (D) Protocol
45. Which of the following is the longest glacier outside the polar regions ?
- (A) Fedchenko Glacier
- (B) Siachin Glacier
- (C) Gangotri Glacier
- (D) Hispar Glacier
46. Mohorovičić discontinuity marks the boundary between :
- (A) Crust and Mantle
- (B) Mantle and Core
- (C) Inner and Outer Core
- (D) None
47. Continental drift theory was proposed by :
- (A) Alfred Wegener
- (B) Thomas Alva Edison
- (C) Arthur Holmes
- (D) Eduard Suess
48. Holocene is the name given to the geological epoch that began :
- (A) 5,650 years BP
- (B) 11,650 years BP
- (C) 15,650 years BP
- (D) 20,650 years BP
49. Gully erosion is an advanced stage of :
- (A) Rill erosion
- (B) Splash erosion
- (C) Sheet erosion
- (D) Wind erosion

50. Which of the following soil conservation methods is generally implemented in the coastal and dry regions ?
- (A) Contour ploughing
  - (B) Terrace farming
  - (C) Mulching
  - (D) Shelter belts
51. Which of the following is the first stage of water erosion ?
- (A) Rill erosion
  - (B) Sheet erosion
  - (C) Gully erosion
  - (D) Splash erosion
52. *Karewas* are found in :
- (A) West Bengal
  - (B) Rajasthan
  - (C) Nagaland
  - (D) Jammu and Kashmir
53. A handheld camera with the flash turned on during dim light is an example of :
- (A) Active sensor
  - (B) Passive sensor
  - (C) Proactive sensor
  - (D) None
54. GIS allows the user to perform :
- (A) Store data
  - (B) Edit data
  - (C) Create searches
  - (D) All of the above
55. GIS was coined by :
- (A) Roger Tomlinson
  - (B) Roger James
  - (C) Richard Frost
  - (D) None of the above
56. On a topographic map, the closer the contour lines the :
- (A) Steeper the slope
  - (B) Flatter the land surface
  - (C) Gentler the slope
  - (D) Lower the elevation
57. The graph showing discharge versus time represents :
- (A) Hydrograph
  - (B) Pluviograph
  - (C) Environmental flow
  - (D) None of the above
58. Hydrograph will peak faster in :
- (A) Forested land
  - (B) Agricultural land
  - (C) Urbanized land
  - (D) All of the above
59. Pluviograph is an instrument used for measuring :
- (A) Snow
  - (B) Hail
  - (C) Precipitation
  - (D) Sleet
60. Pyranometer is an instrument used for measuring :
- (A) Lunar radiation
  - (B) Solar radiation
  - (C) Terrestrial radiation
  - (D) None of the above

# ENTRANCE TEST-2020

SCHOOL OF ENVIRONMENTAL AND EARTH SCIENCES

GEO-INFORMATICS

Question Booklet Series

**B**

Total Questions : 60  
Time Allowed : 70 Minutes

Roll No. :

--	--	--	--	--	--	--	--	--	--

## Instructions for Candidates :

1. Write your Entrance Test Roll Number in the space provided at the top of this page of Question Booklet and fill up the necessary information in the spaces provided on the OMR Answer Sheet.
2. OMR Answer Sheet has an Original Copy and a Candidate's Copy glued beneath it at the top. While making entries in the Original Copy, candidate should ensure that the two copies are aligned properly so that the entries made in the Original Copy against each item are exactly copied in the Candidate's Copy.
3. All entries in the OMR Answer Sheet, including answers to questions, are to be recorded in the Original Copy only.
4. Choose the correct / most appropriate response for each question among the options A, B, C and D and darken the circle of the appropriate response completely. The incomplete darkened circle is not correctly read by the OMR Scanner and no complaint to this effect shall be entertained.
5. Use only blue/black ball point pen to darken the circle of correct/most appropriate response. In no case gel/ink pen or pencil should be used.
6. Do not darken more than one circle of options for any question. A question with more than one darkened response shall be considered wrong.
7. There will be '**Negative Marking**' for wrong answers. Each wrong answer will lead to the deduction of 0.25 marks from the total score of the candidate.
8. Only those candidates who would obtain positive score in Entrance Test Examination shall be eligible for admission.
9. Do not make any stray mark on the OMR sheet.
10. Calculators and mobiles shall not be permitted inside the examination hall.
11. Rough work, if any, should be done on the blank sheets provided with the question booklet.
12. OMR Answer Sheet must be handled carefully and it should not be folded or mutilated in which case it will not be evaluated.
13. Ensure that your OMR Answer Sheet has been signed by the Invigilator and the candidate himself/herself.
14. At the end of the examination, hand over the OMR Answer Sheet to the invigilator who will first tear off the original OMR sheet in presence of the Candidate and hand over the Candidate's Copy to the candidate.

1. The UNFCCC is an International Environmental treaty that came into force on :
- (A) 21 March 1994  
(B) 21 March 1995  
(C) 21 April 1994  
(D) 21 April 1995
2. Which of the following is not a Millennium Development Goal ?
- (A) Eradicate extreme poverty and hunger  
(B) Achieve universal primary education  
(C) Promote gender equality and empower women  
(D) Improve mental health
3. Which of the following UN Sustainable Development Goals focuses on affordable and clean energy ?
- (A) Goal 6  
(B) Goal 7  
(C) Goal 9  
(D) Goal 8
4. The UNCCD entered into force in :
- (A) December 1996  
(B) December 1997  
(C) December 1998  
(D) December 1999
5. Sapphire, a precious gemstone, is found in :
- (A) East Karakorum, Leh  
(B) Paddar, Kishtwar  
(C) Uri, Baramulla  
(D) Sonamarg, Ganderbal
6. Which of the following is the largest glacier of Kashmir Valley ?
- (A) Nehnar  
(B) Kolahoi  
(C) Shishram  
(D) Hoksar
7. Which of the following is a Ramsar designated wetland ?
- (A) Hokersar  
(B) Khushalsar  
(C) Aanchar  
(D) Shallabug
8. The botanical name of Chilgoza Pine is :
- (A) *Pinus roxburghii*  
(B) *Pinus gerardiana*  
(C) *Pinus wallichiana*  
(D) None of these
9. Which of the following is not an example of primary succession ?
- (A) Vegetation colonising old lava fields on a volcanic island  
(B) Moss growing on mountain cliffs  
(C) Salt marsh vegetation on a mud flat  
(D) Grassland growing on the site of a previous rainforest
10. In thermal stratification of water bodies, the middle region which shows drastic temperature change is called :
- (A) Mesolimnion  
(B) Epilimnion  
(C) Metalimnion  
(D) Hypolimnion

11. In cryogenic storage, seeds are stored at :
- (A)  $-15^{\circ}\text{C}$
  - (B)  $-25^{\circ}\text{C}$
  - (C)  $-35^{\circ}\text{C}$
  - (D)  $-196^{\circ}\text{C}$
12. The word ecosystem was first used by :
- (A) A.G. Tansley
  - (B) G.E. Hutchinson
  - (C) Charles Elton
  - (D) Vladimir Vernadsky
13. The digestive enzyme found in saliva is called :
- (A) Pepsin
  - (B) Bile
  - (C) Amylase
  - (D) Both (A) and (B)
14. Which of the following is not part of large intestine ?
- (A) Colon
  - (B) Duodenum
  - (C) Caecum
  - (D) Rectum
15. Leucocytes are also called :
- (A) Red Blood Corpuscles
  - (B) White Blood Corpuscles
  - (C) Platelets
  - (D) All of the above
16. Tropical grasslands are also called :
- (A) Prairies
  - (B) Pampas
  - (C) Steppes
  - (D) Savannas
17. According to Coulomb's Law, electrostatic force between two static point charges  $q_1$  and  $q_2$  placed some distance apart is not :
- (A) Inversely proportional to their product
  - (B) Inversely proportional to the square of the distance between them
  - (C) Directed along the line joining the two charged particles
  - (D) None of the above
18. The bending of light at the boundary of two dissimilar media is called :
- (A) Reflection
  - (B) Refraction
  - (C) Diffraction
  - (D) Total Internal Reflection
19. At absolute temperature, the kinetic energy of a gas is :
- (A) Positive
  - (B) Zero
  - (C) Negative
  - (D) Both (A) and (C)
20. The acceleration due to gravity varies with :
- (A) Latitude
  - (B) Height
  - (C) Depth
  - (D) All of the above
21. Discovery of electron is credited to :
- (A) John Dalton
  - (B) Ernest Rutherford
  - (C) J.J. Thomson
  - (D) None of the above

- 1
22. Which of the following is a property of acids ?
- (A) Acids produce  $H^+$  ions when dissolved in water
  - (B) Acids have sour taste
  - (C) Acids are composed of hydrogen
  - (D) All of the above
23. The mass number of an atom is :
- (A) Number of electrons present in the nucleus of an atom
  - (B) Number of protons present in the nucleus of an atom
  - (C) Number of neutrons present in the nucleus of an atom
  - (D) Number of protons and neutrons present in the nucleus of an atom
24. According to Boyle's Law :
- (A) At constant temperature, the volume of a given amount of a gas is directly proportional to its pressure
  - (B) At constant pressure, the volume of a given amount of a gas is inversely proportional to its temperature
  - (C) At constant temperature, the volume of a given amount of a gas is inversely proportional to its pressure
  - (D) At constant volume, the temperature of a given amount of a gas is inversely proportional to its pressure
25. Glaciers across high mountain Asia are retreating except those located in :
- (A) Karakoram
  - (B) Tibetan Plateau
  - (C) Eastern Himalaya
  - (D) Western Himalaya
26. The enzyme that fixes atmospheric  $CO_2$  in  $C_4$  plants is :
- (A) Aldolase
  - (B) Hydrogenase
  - (C) PEP carboxylase
  - (D) Amylase
27. The highest amount of Carbon is stored in :
- (A) Atmosphere
  - (B) Soil
  - (C) Oceans
  - (D) None of these
28. The ultimate source of energy in an ecosystem is :
- (A) Sunlight
  - (B) Nutrients
  - (C) Food
  - (D) Water
29. Which of the following can be used to reconstruct past climate ?
- (A) Tree rings
  - (B) Ice cores
  - (C) Lake sediments
  - (D) All of these
30. The normal lapse rate is  $6.5^\circ C$  per :
- (A) Kilometer rise in altitude
  - (B) Kilometer fall in altitude
  - (C) Mile rise in altitude
  - (D) Mile fall in altitude
- 2

31. The phenomenon in which temperature increases with increasing altitude is known as :
- (A) Temperature anomaly  
 (B) Temperature inversion  
 (C) Lapse rate  
 (D) Insolation
32. Tropospheric ozone formation results due to the chemical reactions between :
- (A) Oxides of nitrogen and volatile organic compounds in the presence of sunlight  
 (B) Oxides of sulphur and volatile organic compounds in the presence of sunlight  
 (C) Oxides of carbon and volatile organic compounds in the presence of sunlight  
 (D) Oxides of nitrogen and volatile organic compounds
33. What is the median of following series : 7, 44, 32, 8, 9, 17, 19, 16, 15 ?
- (A) 15  
 (B) 16  
 (C) 17  
 (D) 19
34. Square of standard deviation is called :
- (A) Harmonic mean  
 (B) Variance  
 (C) Mode  
 (D) 2<sup>nd</sup> quartile
35. Arithmetic mean is :
- (A) Affected by extreme values  
 (B) Not affected by extreme values  
 (C) Both (A) and (B)  
 (D) None of these
36. Sum of deviations of values from their mean is always :
- (A) 1  
 (B) 0  
 (C) 2  
 (D) 3
37. The output of an AND gate with three inputs, A, B, and C, is 'high' or '1' when :
- (A) A = 1, B = 1, C = 0  
 (B) A = 0, B = 0, C = 0  
 (C) A = 1, B = 1, C = 1  
 (D) A = 1, B = 0, C = 1
38. A series of numbers in which each number is the sum of the two preceding numbers is called :
- (A) Fibonacci Series  
 (B) Taylor Series  
 (C) Laurent Series  
 (D) Hypergeometric Series
39. What is 'a', if  $B = \begin{bmatrix} 1 & 4 \\ 2 & a \end{bmatrix}$  is a singular matrix ?
- (A) 5  
 (B) 6  
 (C) 7  
 (D) 8
40. If  $|A| = 0$ , then A is a :
- (A) Zero matrix  
 (B) Singular matrix  
 (C) Non-singular matrix  
 (D) None of these

41. The father of supercomputer is :
- (A) John Neumann
  - (B) Charles Babbage
  - (C) Seymour Cray
  - (D) Adam Dunkels
42. A computer on the network that is used for sharing resources with others is called :
- (A) Workstation
  - (B) Client
  - (C) Server
  - (D) Mainframe
43. The binary form of decimal number 125 is :
- (A) 1111001
  - (B) 1111110
  - (C) 1111111
  - (D) 1111101
44. Rows of a relation are called :
- (A) Tuple
  - (B) Entity
  - (C) Data structure
  - (D) Schema
45. What is the second most abundant element in Earth's crust ?
- (A) Nitrogen
  - (B) Oxygen
  - (C) Carbon
  - (D) Silicon
46. Carbon sequestration is achieved through :
- (A) Rocks
  - (B) Soils
  - (C) Plants
  - (D) All of the above
47. A stream weathers and erodes its channel and floodplain by :
- (A) Hydraulic action
  - (B) Abrasion
  - (C) Solution
  - (D) All of the above
48. New lithosphere forms and spreads outward at :
- (A) Divergent boundary
  - (B) Convergent boundary
  - (C) Transform plate boundary
  - (D) None of the above
49. Humus is mostly concentrated in which horizon ?
- (A) O-horizon
  - (B) B-horizon
  - (C) C-horizon
  - (D) A-horizon
50. Which of the following is primary factor that affects the rate of weathering ?
- (A) Topography
  - (B) Climate
  - (C) Volume
  - (D) Biological organisms
51. Which of the following are types of water erosion ?
- (A) Rill erosion
  - (B) Gully erosion
  - (C) Both (A) and (B)
  - (D) Neither (A) nor (B)
52. Land where the potential natural vegetation is predominantly grasses, grass-like plants, forbs, or shrubs is called as :
- (A) Agricultural land
  - (B) Rangeland
  - (C) Forest land
  - (D) Wetland

53. The science of deriving information about an object from measurements made at a distance from the object is called :
- (A) Geographic Information Science  
 (B) Information Science  
 (C) Remote Sensing  
 (D) None of the above
54. Which of the following is not a component of Geographic Information Systems ?
- (A) Software  
 (B) Hardware  
 (C) Query  
 (D) People
55. The contour lines connect points of equal :
- (A) Distance  
 (B) Angle  
 (C) Elevation  
 (D) Area
56. First satellite based remote sensing programme for broad-scale observation of the Earth's land areas was :
- (A) SPOT  
 (B) Landsat  
 (C) IRS  
 (D) Geoeye-1
57. Which among the following is a component of water cycle ?
- (A) Evaporation  
 (B) Runoff  
 (C) Precipitation  
 (D) All of the above
58. A graph plotting discharge versus time is called :
- (A) Hydrogram  
 (B) Hydrograph  
 (C) Discharge  
 (D) Streamflow
59. Process by which the water vapour escapes from the living plant leaves and enters the atmosphere is called :
- (A) Evapotranspiration  
 (B) Evaporation  
 (C) Transpiration  
 (D) Potential evaporation
60. Flash floods are characterised by :
- (A) Rapid rises in water levels  
 (B) Devastating flow velocities  
 (C) Neither (A) nor (B)  
 (D) Both (A) and (B)

SEAL

1. What is the decimal equivalent of 1100110 ?  
 (A) 104  
 (B) 106  
 (C) 108  
 (D) 102
2. The binary equivalent of 819 is :  
 (A) 1100110011  
 (B) 1100110001  
 (C) 1010101010  
 (D) 1001100101
3. The difference between memory and storage is that :  
 (A) Memory is temporary and storage is permanent  
 (B) Memory is slow and storage is fast  
 (C) Memory is permanent and storage is temporary  
 (D) None of the above
4. When was Google Chrome first launched ?  
 (A) 2000  
 (B) 2008  
 (C) 2004  
 (D) 2006
5. Which of the following has the lowest infiltration capacity ?  
 (A) Pasturelands  
 (B) Farmlands  
 (C) Built-up  
 (D) Forest lands
6. Tundra biome is characterized by :  
 (A) Tree growth hindered by the cold temperatures and short growing seasons  
 (B) Tree growth hindered by scanty rainfall and deficiency in soil nutrients  
 (C) Tree growth hindered by scanty rainfall and acidic soils  
 (D) None of the above
7. Hemis High Altitude National Park is famous for :  
 (A) Black bear  
 (B) Snow leopard  
 (C) Brown bear  
 (D) Markhor
8. Accumulation of urea and other waste substances in the blood is called :  
 (A) Hemodialysis  
 (B) Cystitis  
 (C) Urethritis  
 (D) Uremia
9. Which of the following is the state bird of J & K ?  
 (A) Black crested bulbul  
 (B) Hill myna  
 (C) Black necked crane  
 (D) White throated kingfisher
10. Lysimeter is an instrument to measure :  
 (A) Evapotranspiration  
 (B) Transpiration  
 (C) Infiltration  
 (D) Evaporation
11. Hydropower potential depends upon which of the following parameters :  
 (A) Streamflow  
 (B) Head  
 (C) Both (A) and (B)  
 (D) None of the above
12. Hydrograph is a graph :  
 (A) Showing the temperature versus time  
 (B) Showing the rainfall versus time  
 (C) Showing the rate of flow versus time past a specific point in a river  
 (D) None of the above
13. Which of the following are soil conservation measures to arrest erosion ?  
 (A) Ploughing  
 (B) Trenching  
 (C) Contour plowing  
 (D) All of the above
14. Sand dunes are formed by which type of erosion :  
 (A) Ravine erosion  
 (B) Gully erosion  
 (C) Sheet erosion  
 (D) Aeolian erosion

15. What is the major land use and land cover of cold desert region of Ladakh ?  
 (A) Rocky terrain  
 (B) Agriculture  
 (C) Sand dunes  
 (D) Forests
16. The term ecosystem was first used by Arthur George Tansley in :  
 (A) 1930  
 (B) 1945  
 (C) 1950  
 (D) 1935
17. Which of the following is not dicotyledonous ?  
 (A) Mango  
 (B) Castor  
 (C) Pea  
 (D) Rice
18. The seed coat is formed from :  
 (A) Endosperm  
 (B) Integuments  
 (C) Ovary  
 (D) None of the above
19. Phenyl Mercuric Acetate results in :  
 (A) Enhanced Transpiration  
 (B) Reduced Transpiration  
 (C) Reduced Imbibition  
 (D) Reduced Respiration
20. Soils that are formed in volcanic ash and contain aluminium organic compounds are known as :  
 (A) Alfisols  
 (B) Entisols  
 (C) Gelisols  
 (D) Andisols
21. If the order of matrix A is  $m \times p$  and the order of B is  $p \times n$ . Then the order of matrix AB is ?  
 (A)  $n \times m$   
 (B)  $m \times n$   
 (C)  $n \times p$   
 (D)  $m \times p$
22.  $\frac{n!}{(n-3)!} = ?$   
 (A)  $n(n-1)(n-2)$   
 (B)  $n!$   
 (C)  $(n-3)!$   
 (D)  $n(n-1)(n-2)(n-3)$
23. Roots of quadratic equation  $x^2 - 3x = 0$ , will be  
 (A) 3  
 (B) 0, -3  
 (C) 0, 3  
 (D) None of these
24. What is the value of x in the exponential equation  $9 + e^{2x-4} = 10$  ?  
 (A) 4  
 (B) 3  
 (C) 2  
 (D) 5
25. Which of the following is false about the Correlation Coefficient ?  
 (A) Varies between 0 to 1  
 (B) Describe degree of association between two variables  
 (C) A positive value indicates a rise in one variable accompanies a rise in the other  
 (D) Is denoted by the symbol "r"
26. Which of the following is not a measure of the central tendency ?  
 (A) Variance  
 (B) Mean  
 (C) Mode  
 (D) Median
27. Marks of the Geoinformatics paper follow a normal distribution with a mean of 65 and a standard deviation of 12. Approximately what proportion of the students have scores below 50 ?  
 (A) 51%  
 (B) 11%  
 (C) 89%  
 (D) 15%

- 1
28. Which of the following are true about the normal distribution ?
- 58.6% of the observations lie between the mean and one standard deviation
  - The mean, median, mode and variance of a normally distributed data area same
  - 99.7% of the observations lie between the mean and three standard deviations
  - None of the above
29. Indicate the correct arrangement for electromagnetic radiations in order of their increasing wavelength :
- X-rays, Visible, Infrared, Microwave
  - Visible, Infrared, Microwave, X-rays
  - X-rays, Infrared, Visible, Microwave
  - Microwave, Visible, Infrared, X-rays
30. Light travels slower in glass than in air because :
- Refractive index of air is greater than that of glass
  - Density of glass greater than that of air
  - Refractive index of air is less than that of glass
  - Density of glass is less than that of air
31. The Acceleration due to gravity is zero at :
- The equator
  - Poles
  - Sea level
  - The center of the earth
32. The temperature at which a ferromagnet material becomes paramagnetic is called :
- Neutral temperature
  - Inversion temperature
  - Curie temperature
  - None of the above
33. The number of neutrons in the radioactive isotope of hydrogen is :
- 2
  - 0
  - 3
  - 1
34. According to Arrhenius Concept, acids are :
- Proton acceptors
  - Compounds which give hydrogen ion
  - Proton donor
  - Compounds which give hydroxyl ion
35. Methanol and ethanol are miscible in water due to
- Covalent character
  - Oxygen bonding character
  - Hydrogen bonding character
  - None of the above
36. The average kinetic energy of an ideal gas per molecule in SI units at 25°C will be
- $61.7 \times 10^{-21}$  J
  - $6.17 \times 10^{-21}$  J
  - $7.16 \times 10^{-20}$  J
  - $6.17 \times 10^{-20}$  J
37. GIS deals with which kind of data :
- Spatial data
  - Numeric data
  - Binary data
  - Complex data
38. Remote sensing techniques make use of the which of the following :
- Electric waves
  - Electromagnetic waves
  - Sound waves
  - All of the above
39. GPS is used for which of the following data :
- Altitude
  - Latitude
  - Longitude
  - All of the above
40. The science of map-making is known as ?
- Cartography
  - Remote Sensing
  - GIS
  - Geomatics

41. The branch of geology dealing with the studies of fossils is :
- (A) Geomorphology  
(B) Stratigraphy  
(C) Archaeology  
(D) Palaeontology
42. The instrument used for reading the intensity of earthquake wave is called :
- (A) Hygrometer  
(B) Seismometer  
(C) Seismogram  
(D) Seismograph
43. The limestone deposits which grow upwards from the floor of underground cave are known as :
- (A) Stromatolite  
(B) Stalactite  
(C) Stalagmite  
(D) Column
44. Ozone layer is located in ?
- (A) Troposphere  
(B) Stratosphere  
(C) Thermosphere  
(D) Mesosphere
45. The Plio-pleistocene sediments of Kashmir valley are known as :
- (A) Verinag formation  
(B) Lolab formation  
(C) Karewa formation  
(D) Zewan formation
46. Major constituent of the Earth's atmosphere is :
- (A) Oxygen  
(B) Argon  
(C) Carbon Dioxide  
(D) Nitrogen
47. Threat of global warming is increasing due to the increasing concentration of :
- (A) Carbon dioxide  
(B) Black carbon  
(C) Particulate matter  
(D) Sulphur dioxide
48. Kyoto Protocol is linked to :
- (A) SDGs  
(B) UNCCCD  
(C) Montreal Protocol  
(D) UNFCCC
49. Which of the following is a sub-species of European red deer found in Kashmir ?
- (A) Hangul  
(B) Markhor  
(C) Chiru  
(D) Ibex
50. Lines on a map connecting places having same amount of rainfall are called :
- (A) Isotherms  
(B) Isobars  
(C) Contours  
(D) Isohyets
51. Which of the following is not a tributary of Indus river ?
- (A) Sutlej  
(B) Beas  
(C) Jhelum  
(D) None of the above
52. Lignite deposits in Kashmir are found at :
- (A) Nichhama, Handwara  
(B) Mokam, Anantnag  
(C) Hipora, Shopian  
(D) None of the above
53. Which of the following is a consequence of global warming ?
- (A) Melting of glaciers  
(B) Increasing frequency and intensity of flooding  
(C) Increasing glacial lake outburst flooding (GLOFs)  
(D) All of the above
54. The process of nutrient enrichment in a lake is termed as :
- (A) Limiting nutrients  
(B) Enrichment  
(C) Schistosomiasis  
(D) Eutrophication

55. How many Sustainable Development Goals (SDGs) have been agreed to, by all the world's nations, as part of the 2030 Agenda ?
- (A) 17
  - (B) 7
  - (C) 27
  - (D) 14
56. The Total Dissolved Solids (TDS) in drinking water can be reduced by the following method :
- (A) Distillation
  - (B) Reverse osmosis
  - (C) Ion exchange
  - (D) All of the above
57. Which of the following minor forest produce in J&K has tremendous medicinal importance ?
- (A) Dioscorea
  - (B) Hazel nut
  - (C) Resin
  - (D) Oleander
58. Which of the following are floating ocean plants and animals ?
- (A) Nekton
  - (B) Benthos
  - (C) Plankton
  - (D) Terrenus
59. Environmental flow is provided within a river, wetland or coastal zone to :
- (A) Promote ecotourism and water sports
  - (B) Round the year hydropower generation
  - (C) Promote climate change mitigation and adaptation
  - (D) Maintain healthy aquatic ecosystems and ensure sustainability of their services
60. The melting of glaciers in Himalaya under the changing climate will in the long run most likely result in which of the following scenarios :
- (A) Decrease in the frequency and magnitude of disasters
  - (B) Increase the water supplies in the Himalaya
  - (C) Adversely impact the food, water and energy security
  - (D) All of the above

1. Which of the following is not an internet browser ?
  - (A) Chrome
  - (B) Internet Explorer
  - (C) Firefox
  - (D) Python
2. DBMS don't use which of the following database structure ?
  - (A) Hierarchical model
  - (B) Network model
  - (C) Topologic model
  - (D) Relational model
3. Which of the following is not an example of the spreadsheet software ?
  - (A) MS Excel
  - (B) Lotus
  - (C) Xoom Office
  - (D) IMS
4. Bytecode is :
  - (A) A compiler that produces an independent executable file
  - (B) Is not a machine code and thus, not tied to any particular hardware
  - (C) A data type in C programming language
  - (D) A Database Management System
5. Universe began :
  - (A) 4 billion years ago
  - (B) 10-15 billion years ago
  - (C) 1 billion years ago
  - (D) 5-8 billion years ago
6. Which of the following divisions of the geologic time scale is an era of the Phanerozoic eon ?
  - (A) Paleozoic
  - (B) Paleocene
  - (C) Permian
  - (D) Proterozoic
7. On an average, how thick is the crust of earth ?
  - (A) 100 km
  - (B) 40 km
  - (C) 150 km
  - (D) 92 km
8. The core of earth is thought to be composed of :
  - (A) Granite
  - (B) Basalt
  - (C) Solid Iron-Nickel alloy
  - (D) Peridotite
9. Which of the following is not a measure of soil conservation ?
  - (A) Mulching
  - (B) Tillage cropping
  - (C) Check dams
  - (D) Pruning
10. Land capability classification is based on which of the following properties ?
  - (A) Soil fertility, climate, topography and water availability
  - (B) Geology, drainage, weathering and geomorphology
  - (C) Climate, vegetation, glaciers, population
  - (D) All of the above
11. Soil erosion is associated with :
  - (A) Frost shattering and heaving
  - (B) Rills and ravines
  - (C) Floods and water logging
  - (D) Snow avalanches
12. Soil texture influences which of the following ?
  - (A) Hydrologic properties
  - (B) Climatic processes
  - (C) Tectonic processes
  - (D) Magmatic properties

13. Remote sensing does not use which region of electromagnetic radiation for sensing ?
- Visible near-infrared
  - Thermal infrared
  - Microwaves
  - Radiowaves
14. Digital topographic data in the form of DEM is generated from :
- Contours
  - Thermal remote sensing data
  - Intensity images
  - All of the above
15. Which of the following is not an application of Remote Sensing ?
- Crustal deformation studies
  - Weather monitoring studies
  - Water quality mapping
  - Sub-surface studies
16. Geographic Information System :
- Uses satellite data
  - Integrates data from various sources
  - Is a database management system
  - All of the above
17. Which of the following is the largest reservoir of water ?
- Groundwater
  - Lakes
  - Rivers
  - Atmosphere
18. The average annual rainfall of Srinagar is around :
- 1000 mm
  - 700 mm
  - 1500 mm
  - 1800 mm
19. Lysimeter is a hydrological instrument used to measure :
- Evaporation
  - Infiltration
  - Evapotranspiration
  - Interception
20. An isohyet is a line joining :
- Equal precipitation intensity
  - Equal precipitation depth
  - Equal storm duration
  - Equal height of precipitation stations
21. The residence time of  $\text{CO}_2$  in the atmosphere is of the order of :
- 24-72 hours
  - 30-95 Years
  - 1-2 months
  - 7-15 days
22. COP21 meeting negotiated the Paris agreement on climate change that sets out global action to limit the global warming to below :
- $2^\circ\text{C}$
  - $1^\circ\text{C}$
  - $3^\circ\text{C}$
  - None of the above
23. The Indian Water Pollution Act (Prevention & Control) came into the force in the year :
- 1972
  - 1977
  - 1956
  - 1974
24. Which of the following statements is false about the Sustainable Development Goals (SDGs) ?
- No Poverty
  - Quality education
  - Zero hunger
  - None of the above

25. Which of the following is not an essential element of the map composition ?
- Legend
  - Scale
  - North direction
  - Path/row
26. In J & K State, the dominant forest type is :
- Himalayan moist temperate forest
  - Himalayan dry temperate forest
  - Sub tropical dry evergreen forest
  - All of the above
27. Black-necked crane is found in which of the following wildlife parks ?
- Dachigam
  - Kishtwar
  - Changthang
  - Hemis
28. The State has an identified potential for geothermal energy in :
- Kashmir valley
  - Puga valley
  - Chinta valley
  - Suru valley
29. The enzyme that fixes atmospheric  $\text{CO}_2$  in  $\text{C}_4$  plants is:
- Aldolase
  - Hydrogenase
  - PEP carboxylase
  - RUBP carboxylase
30. What is the primary route of mineral absorption by roots ?
- Root hairs
  - Cortex of the root
  - Epidermis of the root
  - Casparian strips
31. Epigeal germination is found in :
- Pea
  - Gram
  - Castor
  - Jowar
32. During cellular respiration, NADH is :
- Used in electron transport system
  - Converted to  $\text{NAD}^+$  by an enzyme called dehydrogenase
  - Reduced to form  $\text{NAD}^+$
  - None of the above
33. Which of the following is both an endocrine and exocrine gland ?
- Pancreas
  - Adrenal
  - Pituitary
  - Thyroid
34. Bile contribution to digestion is :
- Nucleic acid metabolism
  - Phagocytosis
  - Emulsification of dietary lipids
  - Carbohydrate digestion
35. Which of the following is not a biogeographical realm ?
- Palaeartic
  - Nearctic
  - Paleotropic
  - Chapparral
36. Which of the following animals has four horns ?
- Alces Alces
  - Tetracerus Quadricornis
  - Antelope Cervicapra
  - Pseudonis Nayaur

37. Which of the following has the greatest covalent character ?
- NaCl
  - MgCl<sub>2</sub>
  - AlCl<sub>3</sub>
  - SiCl<sub>4</sub>
38. A gas absorbs a photon of 355 nm and emits at two wavelengths. If one of the emissions is at 680 nm, the other is at :
- 518 nm
  - 1035 nm
  - 325 nm
  - 743 nm
39. An atom has a mass number of 23 and atomic number 11. The number of protons are :
- 11
  - 12
  - 23
  - 44
40. Which of the following salts is basic in nature ?
- NH<sub>4</sub>NO<sub>3</sub>
  - Na<sub>2</sub>CO<sub>3</sub>
  - Na<sub>2</sub>SO<sub>4</sub>
  - NaCl
41. Fleming's left hand rule is used to find :
- Direction of flux in a solenoid
  - Direction of forces on a current carrying conductor in a magnetic field
  - Polarity of a magnetic pole
  - Direction of magnetic field due to current carrying conductor
42. What is the magnetomotive force in a 75-turn coil of wire when there is 4A of current passing through it ?
- 18.75 At
  - 300 At
  - 40 At
  - 187 At
43. Which law states that the internal energy of a gas is a function of temperature ?
- Charles' law
  - Joule's law
  - Regnault's law
  - Boyle's law
44. Which of the following wavelength ranges is associated with UV spectroscopy ?
- 0.8 – 500 μm
  - 380 – 750 nm
  - 100 – 400 nm
  - 0.1 – 10 nm
45. The distribution of heights of students in a class is roughly bell-shaped. Moreover, the average height is 68 inches and approximately 95% of the heights are between 62 and 74 inches. The standard deviation of the height distribution is approximately :
- 12
  - 9
  - 6
  - 3
46. If n is a positive integer such that  $n! / (n-2)! = 342$ , find n.
- 15
  - 19
  - 17
  - 18

47. For what value of  $k$  will the two equations  $2x + 4 = 4(x - 2)$  and  $-x + k = 2x - 1$  have the same solution?
- (A) 11  
(B) 7  
(C) -11  
(D) 17
48. If  $x$  is a negative number, which of the following must be true?
- (I)  $x^5 < |x|$   
(II)  $x < \sqrt{-x}$   
(III)  $x - 1 / |x| < 0$
- (A) (II) and (III) only  
(B) (I), (II) and (III)  
(C) (I) and (II) only  
(D) (I) and (III) only
49. What is the sum of the reciprocals of the solutions to the equation  $x^2 - (3/5)x = -11/3$  :
- (A) 3/11  
(B) 9/33  
(C) 9/55  
(D) 55/33
50. The amount of a radioactive material decays according to the formula  $A(t) = A_0 e^{-kt}$  where,  $A_0$  is the initial amount,  $k$  is a positive constant and  $t$  is the time in days. Find a formula for the half-life of the material.
- (A)  $T = \ln 2/k$   
(B)  $T = \ln 4/k$   
(C)  $T = \ln k/10$   
(D) None of the above
51. The level of sound  $D$  in decibels is defined as  $D = 10 \log (1/10^{-16})$ , where 1 is the sound intensity in watts/cm<sup>2</sup>. Determine the level in decibels of a sound with intensity  $1 = 10^{-8}$  watts/cm<sup>2</sup> :
- (A) 60 decibels  
(B) 80 decibels  
(C) 120 decibels  
(D) 10 decibels
52. Find the 10th term of a geometric sequence if  $a_1 = 45$  and the common ratio  $r = 0.2$ .
- (A)  $4.601 \times 10^{-2}$   
(B)  $2.304 \times 10^{-25}$   
(C)  $2.304 \times 10^{-5}$   
(D)  $2.304 \times 10^{-9}$
53. Pyranometer is the instrument which measures the :
- (A) short wave radiation  
(B) sunshine hours  
(C) humidity  
(D) albedo
54. Relative humidity of the air is defined as the ratio of :
- (A) actual vapour pressure to the saturation vapour pressure at 0°C  
(B) weight of water in unit volume of air to the weight of air in the same volume  
(C) actual vapour pressure to the saturation vapour at the air temperature  
(D) actual vapour pressure to the atmospheric pressure
55. The climate of the Kashmir valley is mainly determined by :
- (A) Westerlies  
(B) Trade winds  
(C) Southeast monsoons  
(D) Southwest monsoons

56. A measuring device which can be used to measure wind speed and direction is called :
- (A) lysimeter
  - (B) anemometer
  - (C) rain gauge
  - (D) none of the above
57. The Ozone layer is found in :
- (A) Troposphere
  - (B) Stratosphere
  - (C) Thermosphere
  - (D) Mesosphere
58. Which of the following is not a Greenhouse gas ?
- (A) Carbon dioxide
  - (B) Carbon monoxide
  - (C) Methane
  - (D) All of the above
59. Black carbon enhances the melting of Himalayan glaciers as the black carbon deposition :
- (A) Decreases the albedo causing positive radiative forcing
  - (B) Increases the albedo causing negative radiative forcing
  - (C) Results in acid rains in the ablation zone
  - (D) All of the above
60. Which of the following is an important non-timber forest produce in Kashmir forests ?
- (A) Resins
  - (B) Mushrooms
  - (C) Dioscorea
  - (D) All of the above

**ENTRANCE TEST-2017****SCHOOL OF EARTH & ENVIRONMENTAL SCIENCES****GEO-INFORMATICS**

Question Booklet Series

**B**

Total Questions : 60  
Time Allowed : 70 Minutes

Roll No. : 

--	--	--	--	--	--

**Instructions for Candidates :**

1. Write your Roll Number in the space provided at the top of this page of Question Booklet and fill up the necessary information in the spaces provided on the OMR Answer Sheet.
2. OMR Answer Sheet has an Original Copy and a Candidate's Copy glued beneath it at the top. While making entries in the Original Copy, candidate should ensure that the two copies are aligned properly so that the entries made in the Original Copy against each item are exactly copied in the Candidate's Copy.
3. All entries in the OMR Answer Sheet, including answers to questions, are to be recorded in the Original Copy only.
4. Choose the correct / most appropriate response for each question among the options A, B, C and D and darken the circle of the appropriate response completely. The incomplete darkened circle is not correctly read by the OMR Scanner and no complaint to this effect shall be entertained.
5. Use only blue/black ball point pen to darken the circle of correct/most appropriate response. In no case gel/ink pen or pencil should be used.
6. Do not darken more than one circle of options for any question. A question with more than one darkened response shall be considered wrong.
7. There will be 'Negative Marking' for wrong answers. Each wrong answer will lead to the deduction of 0.25 marks from the total score of the candidate.
8. Only those candidates who would obtain positive score in Entrance Test Examination shall be eligible for admission.
9. Do not make any stray mark on the OMR sheet.
10. Calculators and mobiles shall not be permitted inside the examination hall.
11. Rough work, if any, should be done on the blank sheets provided with the question booklet.
12. OMR Answer sheet must be handled carefully and it should not be folded or mutilated in which case it will not be evaluated.
13. Ensure that your OMR Answer Sheet has been signed by the Invigilator and the candidate himself/herself.
14. At the end of the examination, hand over the OMR Answer Sheet to the invigilator who will first tear off the original OMR sheet in presence of the Candidate and hand over the Candidate's Copy to the candidate.

1. Arrange the following gases present in atmosphere in the decreasing order of volume
- I. Helium                      II. Oxygen  
 III. Nitrogen                IV. Argon
- (A) I, II, III IV  
 (B) II, III, IV, I  
 (C) III, II, IV, I  
 (D) IV, III, I, II
2. Which of the following latitudes passes through India ?
- (A) Tropic of Cancer  
 (B) Equator  
 (C) Tropic of Capricorn  
 (D) Arctic Circle
3. The following factor(s) is (are) responsible for degradation of soil
- (A) Chemical fertilizers  
 (B) Landslides  
 (C) Floods  
 (D) All of the above
4. Thick blue line in map is usually used to show
- (A) Hydro-electric power station  
 (B) Stream  
 (C) River  
 (D) Dam axis
5. Salim Ali National Park is situated in which State of India?
- (A) Jammu and Kashmir  
 (B) Assam  
 (C) Karnataka  
 (D) Nainital, Uttarakhand
6. In the State of Jammu and Kashmir good quality sapphire deposits are found in
- (A) Sanku, Dras  
 (B) Poddar, Kishtwar  
 (C) Uri, Baramulla  
 (D) Lolab, Kupwara
7. Konsarnag is situated in which of the mountain ranges of Jammu and Kashmir ?
- (A) Harmukh Range  
 (B) Great Himalayan Range  
 (C) Pir Panjal Range  
 (D) None of the above
8. Which of the following is an application of the GIS?
- (A) Land information system  
 (B) Traffic navigation system  
 (C) Banking information system  
 (D) Both (A) and (B)
9. Which of the following are the optical remote sensing sensors?
- (A) LISS  
 (B) TM  
 (C) MSS  
 (D) All of the above
10. Pyranometer is the instrument which measures the:
- (A) Solar radiation  
 (B) Sunshine hours  
 (C) Humidity  
 (D) Albedo
11. Relative humidity of the air is defined as the ratio of:
- (A) Actual vapour pressure to the saturation vapour pressure at 0°C  
 (B) Weight of water in unit volume of air to the weight of air in the same volume  
 (C) Actual vapour pressure to the saturation vapour pressure at the air temperature  
 (D) Actual vapour pressure to the atmospheric pressure

12. Rainfall Hyetograph represents:
- A plot of rainfall depth or intensity as a function of time
  - A plot of summation of rainfall increments as a function of time
  - Depth of rainfall per unit time
  - None of the above
13. GPS is used for determining which of the following parameters?
- Altitude
  - Latitude
  - Longitude
  - All of the above
14. A measuring device which can be used to measure the amount of actual evapotranspiration by the plants is called:
- Lysimeter
  - Anemometer
  - Rain gauge
  - None of the above
15. In a strongly skewed data distribution, which measure is the most unreliable indicator of central tendency?
- Range
  - Median
  - Mean
  - Mode
16. Correlation Coefficient varies between:
- +1 & -1
  - +1 & 0
  - 1 & 0
  - None of the above
17. Given the set of data [12, 16, 18, 13, 7, 9, 11, 14, 20] what is the standard deviation?
- 4.18
  - 5.85
  - 7.55
  - 5.56
18. The standard error is a statistical measure of:
- The degree to which a sample has been accurately stratified
  - The extent to which a sample mean is likely to differ from the population
  - Both (A) and (B)
  - None of the above
19. What comes next in the sequence: 2, 4, 10, 28, \_\_\_\_\_ ?
- 64
  - 70
  - 76
  - 82
20. If  $x = -1$ , then what is the value of the function  $f(x) = x^3 + 4x + 12$ ?
- 17
  - 9
  - 7
  - 23
21. If logarithm of 5832 be 6, find the base
- $3\sqrt{2}$
  - $2\sqrt{5}$
  - $\sqrt{2}$
  - $\sqrt{3}$
22. If A and B are matrices, then which from the following is true ?
- $A + B \neq B + A$
  - $(A)^t \neq A$
  - $AB \neq BA$
  - All of the above

23. The acceleration due to gravity near the surface of a planet of radius  $R$  and density  $d$  is proportional to:
- $d/R^2$
  - $dR^2$
  - $dR$
  - $d/R$
24. In which of the following cases the potential energy is defined?
- Conservative and non-conservative forces
  - Conservative forces only
  - Non-conservative forces only
  - Neither of the above
25. A cycle tyre bursts suddenly, this represents an:
- Isothermal process
  - Isobaric process
  - Isochoric process
  - Adiabatic process
26. The wavelength of the sunlight is
- 400-700 nanometers
  - 400-700 micrometers
  - 10-12.5 centimeters
  - 700-900 millimeters
27. In which of the following hydrogen bond is present?
- $H_2$
  - Ice
  - Sulphur
  - Hydrocarbon
28. Bohr's theory is applicable to
- He
  - $Li^{2+}$
  - $He^{2+}$
  - None of the above
29. Which of the following acts as both an oxidizing as well as reducing agent?
- $HNO_3$
  - $HNO_2$
  - HI
  - $H_2SO_4$
30. The energy of an ideal gas depends only on its:
- Pressure
  - Volume
  - Number of moles
  - Temperature
31. A teleprinter terminal is an example of:
- Input device
  - Output device
  - Both (A) and (B)
  - Storage device
32. Program which exactly performs operations that manual says is classified as:
- Stable functioning
  - Robust
  - Reliable
  - None
33. A collection of related fields is called
- Tuple
  - Field
  - File
  - Database
34. Decimal equivalent of  $(101011)_2$  is:
- 42
  - 43
  - 44
  - 45

35. A high Biological Oxygen Demand (BOD) indicates:
- Low level of microbial pollution
  - High level of microbial pollution
  - Absence of microbes
  - None
36. UNFCCC came into force on
- 21<sup>st</sup> February, 1994
  - 21<sup>st</sup> March, 1994
  - 21<sup>st</sup> April, 1994
  - 21<sup>st</sup> May, 1994
37. Fill in the gap. MDG6 is to combat HIV-Aids, \_\_\_\_\_ and other diseases.
- Tuberculosis
  - Malaria
  - Diarrhoea
  - Cholera
38. The first sustainable development goal aims to eradicate extreme poverty. How does the UN currently measure extreme poverty?
- People who are unemployed and unable to access welfare benefits from the state
  - People who live on less than \$5 a day
  - People who live on less than \$1.25 a day
  - People who claim to be living in poverty
39. National Disaster Management Authority of India was formed in:
- 2002
  - 2003
  - 2004
  - 2005
40. CO<sub>2</sub> concentration at Mauna Loa Observatory touched an all-time high of 400 ppm in:
- 2013
  - 2014
  - 2015
  - 2016
41. The biggest reservoir of carbon is:
- Amazon rainforest
  - Wetlands
  - Oceans
  - None
42. Atmosphere does not play a significant role in the cycling of:
- Carbon
  - Nitrogen
  - Phosphorus
  - All of these
43. In a food chain of a grassland ecosystem, the top consumers are:
- Herbivores
  - Carnivores
  - Bacteria
  - None
44. The pyramid of energy is:
- Always upright
  - Always inverted
  - Sometimes upright
  - Sometimes inverted
45. The second longest glacier outside poles is:
- Biafo
  - Baltora
  - Hispar
  - Siachin
46. The vast majority of energy taken into an ecosystem is
- Converted into biomass by plants
  - Utilized by secondary consumers
  - Lost as heat
  - Used by the primary consumers
47. 99% of the atmosphere lies within
- 30 km
  - 10 km
  - 70 km
  - 1 km

2

48. Variations in the proportion of which of the following gases in air is major concern of climate change?

- (A) Carbon dioxide
- (B) Nitrogen
- (C) Oxygen
- (D) Argon

49. One of the characteristics of troposphere is

- (A) Constant temperature with altitude
- (B) Decrease in temperature with altitude
- (C) Increase in temperature with altitude
- (D) Small scale variation in temperature

50. What does the Stefan-Boltzmann's radiation law state?

- (A) Radiant heat energy emitted from a surface is proportional to the fourth power of its absolute temperature
- (B) Radiant heat energy emitted from a surface is proportional to the square of its absolute temperature
- (C) Radiant heat energy emitted from a surface is directly proportional to the power of its absolute temperature
- (D) None of the above

26

51. Dry steam power stations use geothermal steam of \_\_\_\_\_ degrees temperature to turn the turbines.

- (A)  $\geq 150^\circ\text{C}$
- (B)  $> 1100^\circ\text{C}$
- (C)  $\geq \text{than } 10^\circ\text{C}$
- (D)  $= 100^\circ\text{C}$

27.

52. Atmospheric pressure is generated by

- (A) Earth's rotation
- (B) Earth's revolution
- (C) Gravitational force of the earth
- (D) None of these

28.

53. Which is more suitable layer for flying of jet aeroplanes?

- (A) Troposphere
- (B) Mesosphere
- (C) Thermosphere
- (D) Stratosphere

54. Generally speaking, the most destructive earthquake waves are

- (A) P waves
- (B) Surface waves
- (C) S waves
- (D) All of the above

55. When a volcano ejects an acid lava, eruption is usually

- (A) Light and less violent
- (B) Soft and less violent
- (C) Loud but less violent
- (D) Loud and more violent

56. An example of a rock whose minerals have been crushed into thin sheets or bands is

- (A) Shale
- (B) Schist
- (C) Conglomerate
- (D) Granite

57. Which of the following is the name of the partly melted rock layer on which the plates move?

- (A) Lithosphere
- (B) Asthenosphere
- (C) Hydrosphere
- (D) Outer core

58. The San Andreas fault in California is a classic example of which of the following types of faults?

- (A) Tear fault
- (B) Upthrust fault
- (C) Dip-slip fault
- (D) Strike-slip fault

59. When the front of a glacier is stationary for a long time, the glacier will do which of the following?

- (A) Form many crevasses
- (B) Build a large terminal moraine
- (C) Melt away
- (D) Not erode its bed

60. The Triassic, Jurassic and Cretaceous Periods constitute what Geologic Era?

- (A) The Precambrian
- (B) The Mesozoic
- (C) The Paleozoic
- (D) The Cenozoic

Sr. No. ....159.....

# ENTRANCE TEST-2016

FACULTY OF PHYSICALS & MATERIAL SCIENCE

M.Sc. GEO-INFORMATICS

Question Booklet Series

A

Total Questions : 60  
Time Allowed : 70 Minutes

Roll No. :

--	--	--	--	--	--	--	--

### Instructions for Candidates :

1. Write your Roll Number in the space provided at the top of this page of Question Booklet and fill up the necessary information in the spaces provided on the OMR Answer Sheet.
2. OMR Answer Sheet has an Original Copy and a Candidate's Copy glued beneath it at the top. While making entries in the Original Copy, candidate should ensure that the two copies are aligned properly so that the entries made in the Original Copy against each item are exactly copied in the Candidate's Copy.
3. All entries in the OMR Answer Sheet, including answers to questions, are to be recorded in the Original Copy only.
4. Choose the correct / most appropriate response for each question among the options A, B, C and D and darken the circle of the appropriate response completely. The incomplete darkened circle is not correctly read by the OMR Scanner and no complaint to this effect shall be entertained.
5. Use only blue/black ball point pen to darken the circle of correct/most appropriate response. In no case gel/ink pen or pencil should be used.
6. Do not darken more than one circle of options for any question. A question with more than one darkened response shall be considered wrong.
7. There will be 'Negative Marking' for wrong answers. Each wrong answer will lead to the deduction of 0.25 marks from the total score of the candidate.
8. Only those candidates who would obtain positive score in Entrance Test Examination shall be eligible for admission.
9. Do not make any stray mark on the OMR sheet.
10. Calculators and mobiles shall not be permitted inside the examination hall.
11. Rough work, if any, should be done on the blank sheets provided with the question booklet.
12. Ensure that your OMR Answer Sheet has been signed by the Invigilator and the candidate himself/herself.
13. OMR Answer sheet must be handled carefully and it should not be folded or mutilated in which case it will not be evaluated.
14. At the end of the examination, hand over the OMR Answer Sheet to the invigilator who will first tear off the original OMR sheet in presence of the Candidate and hand over the Candidate's Copy to the candidate.

1. Which of the following has the shortest access time ?  
(A) Cache memory (B) Magnetic core memory  
(C) RAM (D) Magnetic bubble memory
2. Which of the following is not an Operating System ?  
(A) Windows (B) OS/2  
(C) Unix (D) LAN
3. Which of the following produces the best quality graphics reproduction ?  
(A) Plotter (B) Laser printer  
(C) Dot matrix printer (D) Ink jet printer
4. Which of the following is not a Binary Number ?  
(A) 001 (B) 202  
(C) 101 (D) 110
5. The most violent type of volcano is known as :  
(A) Hawaiian type (B) Strambilian type  
(C) Pelean type (D) Vesuvian type
6. Which of the following is not a feature of Mountain Glaciation ?  
(A) Horn (B) Arete  
(C) Cirque (D) Playas
7. The instrument used to record earthquake waves is called :  
(A) Seismograph (B) Seismogram  
(C) GPS (D) None of the above
8. The era that covers the longest span of time is :  
(A) Cenozoic (B) Precambrian  
(C) Paleozoic (D) Mesozoic

9. Which of the following Geomorphic features is created by Wind Erosion ?
- (A) Sand dune (B) The Grand Canyon  
(C) Cinder cone (D) All of the above
10. Which of the following factors are used for Soil Classification ?
- (A) Age and parent material of the soil (B) Structure of the soil  
(C) Climate and drainage (D) All of the above
11. Which of the following is a land use and land cover classification system ?
- (A) Anderson (B) GNSS  
(C) GAGAN (D) All of the above
12. Which of the following is not an example of the Soil Conservation Practice ?
- (A) Contour farming (B) Mulching  
(C) Terracing (D) All of the above
13. Microwave remote sensing operates in which of the following wavelength regions ?
- (A) 400–700 nanometers (B) 400–700 micrometers  
(C) 1–100 centimeters (D) 1.2–12.5 micrometers
14. Digital Elevation Model (DEM) is generated from :
- (A) Remote sensing data (B) Topographic data  
(C) Global positioning system (D) All of the above
15. Which of the following sensors is an example of Indian Remote Sensing Satellite ?
- (A) LISS (B) ETM+  
(C) MSS (D) PRISM
16. Geoinformatics is the science that develops and uses information to address the problems of :
- (A) Earth observation and Satellite sensor technology  
(B) Computer science; software and hardware  
(C) Geosciences, cartography, image processing and other related branches of science  
(D) All of the above

17. From the historical flood records, it could be safely said that the return period of September 2014 flood was :
- (A) 100 year flood (B) 50 year flood  
(C) 1000 year flood (D) None of the above
18. A hyetograph is a graphical representation of :
- (A) Discharge and time (B) Rainfall intensity and time  
(C) Rainfall depth and time (D) Cumulative rainfall and time
19. A current meter is used to measure :
- (A) Water discharge (B) Depth of flow of water  
(C) Velocity of flow of water (D) All of the above
20. A type of rock with low hydraulic conductivity is called :
- (A) Aquifer (B) Aquitude  
(C) Aquiclude (D) Aquitard
21. The residence time of CO<sub>2</sub> in the atmosphere is of the order of :
- (A) 24–72 hours (B) 30–95 years  
(C) 1–2 months (D) 7–15 days
22. COP21 meeting negotiated the Paris Agreement on Climate Change that sets out global action to limit the global warming to below :
- (A) 2°C (B) 1°C  
(C) 3°C (D) None of the above
23. The Indian Water Pollution Act (Prevention and Control) came into force in the year :
- (A) 1972 (B) 1977  
(C) 1956 (D) 1974
24. Which of the following statements is false about the Millenium Development Goals (MDGs)?
- (A) Poverty eradication (B) Universal primary education  
(C) Halting the spread of HIV/AIDS (D) Nuclear energy promotion

25. Which of the following is not a map element ?  
(A) Legend (B) Scale  
(C) Annotation (D) Contour
26. Snow leopard habitat is spread over :  
(A) The entire Kashmir valley (B) The entire Ladakh region  
(C) The entire Gilgit region (D) All of the above
27. Which of the following mountain ranges is currently heavily glaciated ?  
(A) Pir Panjal (B) Greater Himalaya  
(C) Korakoram (D) Shamasbari
28. The critically endangered Kashmir stag, also known as Hangul has currently a population of about :  
(A) 200 (B) 100  
(C) 500 (D) 1000
29. The process of manipulating the genes outside the normal reproductive process is known as :  
(A) Gene linking (B) Genetic manipulation  
(C) Gene targetting (D) Genome recombination
30. Succession that occurs on abandoned agriculture fields is best described as :  
(A) Primary succession (B) Secondary succession  
(C) Coevolution (D) Prairie succession
31. Which of the following statements is correct ?  
(A) Flower of tulip is a modified shoot  
(B) Eyes of potato tuber are root buds  
(C) The most reduced stem is found in rhizome  
(D) All of the above
32. Which of the following factors is the most influential in determining the rate of transpiration ?  
(A) Rain (B) Light  
(C) Relative humidity of atmosphere (D) Water

33. The male and female brains have structural differences in which of the following ?  
(A) Corpus callosum (B) Cerebral cortex  
(C) Thalamus (D) All of these
34. The endocrine system can be controlled by which of the following ?  
(A) Calcium (B) Topical hormones  
(C) Glucose and sodium (D) All of these
35. How much blood does the average adult have ?  
(A) 2 litres (B) 5 litres  
(C) 10 litres (D) 15 litres
36. The largest terrestrial biome on earth is the :  
(A) Taiga (B) Tundra  
(C) Deciduous forest (D) Desert
37. Fleming's left hand rule is used to find :  
(A) Direction of flux in a solenoid  
(B) Direction of forces on a current carrying conductor in a magnetic field  
(C) Polarity of a magnetic pole  
(D) Direction of magnetic field due to current carrying conductor
38. What is the magnetomotive force in a 75-turn coil of wire when there is 4 A of current passing through it ?  
(A) 18.75 At (B) 300 At  
(C) 40 At (D) 187 At
39. Which law states that the internal energy of a gas is a function of temperature ?  
(A) Charles' law (B) Joule's law  
(C) Regnault's law (D) Boyle's law
40. Which of the following wave length ranges is associated with UV spectroscopy ?  
(A) 0.8–500  $\mu\text{m}$  (B) 380–750 nm  
(C) 100–400 nm (D) 0.1–10 nm

41. According to the first law of thermodynamics :
- (A) Total energy of an isolated system remains constant
  - (B) Total internal energy of a system during a process remains constant
  - (C) Work done by a system is equal to the heat transferred by the system
  - (D) All of the above
42. Which of the following substances has a polar covalent bond between its atoms ?
- (A) NaCl
  - (B)  $\text{Ca}_3\text{N}_2$
  - (C)  $\text{NH}_3$
  - (D)  $\text{K}_3\text{N}$
43. Which one of the following reactions is NOT a redox reaction ?
- (A)  $\text{Zn} + \text{Cu}^{2+} \rightarrow \text{Zn}^{2+} + \text{Cu}$
  - (B)  $\text{I}_2 + 2\text{Fe}^{2+} \rightarrow 2\text{I}^- + 2\text{Fe}^{3+}$
  - (C)  $2\text{Mg} + \text{O}_2 \rightarrow 2\text{MgO}$
  - (D)  $\text{HCl} + \text{NaOH} \rightarrow \text{NaCl} + \text{H}_2\text{O}$
44. The Total Dissolved Solids (TDS) in water can be reduced by the following method :
- (A) Distillation
  - (B) Reverse osmosis
  - (C) Ion exchange
  - (D) All of the above
45. Which of the following is termed as 'third pole' ?
- (A) Arctic
  - (B) Antarctic
  - (C) Himalaya
  - (D) None of the above
46. Environmental Impact Assessment (EIA) in India is mandatory under which of the following legislations ?
- (A) Indian Forest Act
  - (B) Wildlife Protection Act
  - (C) Environment Protection Act
  - (D) Air Pollution Prevention and Control Act
47. Which one of the following is not a gaseous biogeochemical cycle in Ecosystem ?
- (A) Phosphorus cycle
  - (B) Carbon cycle
  - (C) Nitrogen cycle
  - (D) Sulphur cycle
48. Which one of the following is a glacier depositional feature ?
- (A) Drumlins
  - (B) Arête
  - (C) Cirque
  - (D) Horn

49. Which one of the following is correct order of layers in Atmosphere ?
- (A) Troposphere, Stratosphere, Mesosphere, Thermosphere, Exosphere
  - (B) Stratosphere, Troposphere, Mesosphere, Thermosphere, Exosphere
  - (C) Stratosphere, Thermosphere, Exosphere, Troposphere, Mesosphere
  - (D) Stratosphere, Mesosphere, Troposphere, Thermosphere, Exosphere
50. Atmospheric pressure generated on the earth's surface is due to :
- (A) Earth's rotation
  - (B) Earth's revolution
  - (C) Gravitational force of the Earth
  - (D) None of the above
51. Which is the coldest place in India ?
- (A) Leh
  - (B) Manali
  - (C) Siliguri
  - (D) Drass
52. Which of the following causes rainfall in the north west part of India ?
- (A) Western disturbances
  - (B) Southwest monsoons
  - (C) Cyclonic depression
  - (D) Retreating monsoons
53. The mean of the distribution is 14 and the standard deviation is 5. What is the value of the Correlation Coefficient ?
- (A) 60.6%
  - (B) 45.6%
  - (C) 35.7%
  - (D) 46.5%
54. The number of emergency cases in hospital for five days are as 12, 15, 18, 16 and 14, then variance of sample is :
- (A) 5
  - (B) 7
  - (C) 11
  - (D) 6.5
55. A distribution that leans sharply to the left (low side) and tails far out to the right has :
- (A) Positive skewness
  - (B) Negative skewness
  - (C) Positive kurtosis
  - (D) Negative kurtosis
56. What percentage of scores falls within three standard deviations from the mean ?
- (A) 50.5%
  - (B) 99.7%
  - (C) 95.4%
  - (D) 68.2%

57. If  $a$  and  $d$  are the first term and the common difference of the Arithmetic Progression respectively, then the  $n$ th term of corresponding Harmonic Progression is :

- (A)  $a^n = a + (n - 1)d$                       (B)  $a^n = 1/a + (n - 1)d$   
(C)  $a^n = a/1 + (n - 1)d$                       (D)  $a^n = a/a + (n - 1)d$

58. The roots of the quadratic equation  $x^2 - 6x + 10 = 0$  are :

- (A) Imaginary                                      (B) Real  
(C) Irrational                                      (D) Equal

59. If  $AB$  exists, then  $(AB)^{-1}$  is :

- (A)  $A^{-1} B^{-1}$                                       (B)  $B^{-1} A^{-1}$   
(C)  $AB$     (D) None of the above

60. For what value of  $k$  will the two equations  $2x + 4 = 4(x - 2)$  and  $-x + k = 2x - 1$  have the same solution ?

- (A) 11    (B) 7  
(C) -11    (D) 17

**ROUGH WORK**

27. If  $a$  and  $b$  are the first term and the common difference of the Arithmetic Progression respectively, then the  $n$ th term of corresponding Harmonic Progression is:

- (A)  $x = a + (n-1)d$
- (B)  $x = \frac{1}{a} + (n-1)d$
- (C)  $x = a^2 + (n-1)d$
- (D)  $x = a^2 + (n-1)d$

28. The roots of the quadratic equation  $x^2 - 6x + 10 = 0$  are:

- (A) Imaginary
- (B) Real
- (C) Rational
- (D) Equal

29. If  $AB$  exists, then  $(AB)^{-1}$  is:

- (A)  $A^{-1}B^{-1}$
- (B)  $B^{-1}A^{-1}$
- (C)  $AB$
- (D) None of the above

30. For what value of  $k$  will the two equations  $3x + 4 = 4(x - 2)$  and  $-x + k = 2x - 1$  have the same solution?

- (A) 11
- (B) 7
- (C) -11
- (D) 17

1. Which of the following is an example of the computer secondary data storage ?  
(A) Processor registers (B) Processor cache  
(C) RAM (D) Magnetic tape
2. Decimal equivalent of binary number 10101 :  
(A) 11 (B) 21  
(C) 15 (D) 7
3. The ascending order of a data hierarchy is :  
(A) Bit-byte-record-field-file-database  
(B) Byte-bit-field-record-file-database  
(C) Bit-byte-field-record-file database  
(D) Bit-byte-file-record-field -database
4. Which of the following is an internet browser ?  
(A) Internet Explorer (B) Safari  
(C) Firefox (D) All of the above
5. The age of earth is currently thought to be :  
(A) 6.5 billion years (B) 4.5 billion years  
(C) 8.5 billion years (D) 2.5 billion years
6. The layer that separates the earth's crust from the core is the :  
(A) Mantle (B) Lithosphere  
(C) Atmosphere (D) None of the above
7. Which planet is not known to have volcanoes ?  
(A) Venus (B) Mars  
(C) Saturn (D) Earth
8. Drumblin is ?  
(A) Erosional feature of glaciers (B) Depositional features of glaciers  
(C) Topographic features of Moon (D) Geomorphic features of Mars

9. Which of the following is not a mineral ?  
(A) Olivine (B) Calcite  
(C) Limestone (D) Quartz
10. Land capability is a function of :  
(A) Soil, topography and climate (B) Topography  
(C) Climate (D) All of the above
11. Which of the following factors influences the erodibility of soils ?  
(A) Slope (B) Vegetation  
(C) Soil texture (D) All of the above
12. Zone of maximum organic matter accumulation is the :  
(A) A-horizon (B) B-horizon  
(C) C-horizon (D) R-horizon
13. Optical remote sensing operates in which of the following wavelength region ?  
(A) 400-700 nanometers (B) 400-700 micrometers  
(C) 400-700 centimeters (D) 400-700 millimeters
14. Which of the following is a digital representation of the topography ?  
(A) DTM (B) DGPS  
(C) SAR (D) GIS
15. Which of the following satellites/sensors is an example of thermal sensing ?  
(A) ASTER (B) TM  
(C) MODIS (D) All of the above
16. Geographic Information System :  
(A) Is a sensing technology  
(B) Integrates data from various sources  
(C) Synonymous to Information Technology  
(D) All of the above
17. Which of the following is the largest reservoir of water ?  
(A) Groundwater (B) Lakes  
(C) Rivers (D) Atmosphere

18. The average annual rainfall of Srinagar is around :
- (A) 1000 mm (B) 700 mm  
(C) 1500 mm (D) 1800 mm
19. Lysimeter is a hydrological instrument used to measure :
- (A) Evaporation (B) Infiltration  
(C) Evapotranspiration (D) Interception
20. An isohyet is a line joining :
- (A) Equal precipitation intensity  
(B) Equal precipitation depth  
(C) Equal storm duration  
(D) Equal height of precipitation stations
21. Paddy cultivation leads to the release of which gas in the atmosphere ?
- (A) Methane (B) Nitrous oxide  
(C) Ozone (D) Hydroflourocarbons
22. Man and Biosphere program is affiliated with :
- (A) IUCN (B) UNESCO  
(C) WWF (D) UNEP
23. The Indian Water Pollution Act (Prevention and Control) came into the force in the year :
- (A) 1972 (B) 1977  
(C) 1956 (D) 1974
24. Which of the following statements is true about the melting of Himalayan cryosphere ?
- (A) It shall impact the transboundary sharing of waters  
(B) It shall adversely affect the streamflows  
(C) It shall adversely affect the food security  
(D) All of the above
25. The Himalayan Ibex is a type of :
- (A) Goat (B) Deer  
(C) Sheep (D) Horse

26. Tourism Carrying capacity of an area means its :  
(A) Infrastructure capacity (B) Social capacity  
(C) Ecological capacity (D) All of the above
27. UN Millennium Development Goals are meant to :  
(A) Reduce child mortality (B) Empowering women  
(C) Poverty reduction (D) All of the above
28. Which region of the State has the highest hydropower potential ?  
(A) Kashmir valley (B) Gureza valley  
(C) Chenab valley (D) Suru valley
29. The process of successful establishment of a species in a new area is called :  
(A) Sere (B) Climax  
(C) Invasion (D) Ecesis
30. The ecosystem with the highest plant productivity is :  
(A) Desert (B) Tundra  
(C) Savannah (D) Tropical rain forest
31. A probe is used in which stage of genetic engineering ?  
(A) Cloning (B) Screening  
(C) Cleaving DNA (D) Recombining DNA
32. All of the following structures are present in the dicot seed except :  
(A) Radicle (B) Endosperm  
(C) Coleoptile (D) Seed coat
33. The male hormone testosterone is produced by :  
(A) Leydig cells (B) Epididymis  
(C) Vas deferens (D) Seminiferous tubules
34. An example of hermaphrodite is :  
(A) Frog (B) Fish  
(C) Earthworm (D) Hydra

35. Axoplasm is the :
- (A) Blood plasma that nourishes a nerve
  - (B) Fluid external to the axon but inside the myelin sheath
  - (C) Cytoplasm of the dendrite
  - (D) Cytoplasm of the axon
36. Which of the following animals is called a living fossil ?
- (A) Sacculina
  - (B) Polystomella
  - (C) Sea cucumber
  - (D) Peripatus
37. Which of the following has the greatest covalent character ?
- (A) NaCl
  - (B)  $MgCl_2$
  - (C)  $AlCl_3$
  - (D)  $SiCl_4$
38. A gas absorbs a photon of 355 nm and emits at two wavelengths. If one of the emissions is at 680 nm, the other is at :
- (A) 518 nm
  - (B) 1035 nm
  - (C) 325 nm
  - (D) 743 nm
39. An atom has a mass number of 23 and atomic number 11. The number of protons are :
- (A) 11
  - (B) 12
  - (C) 23
  - (D) 44
40. Which of the following salts is basic in nature ?
- (A)  $NH_4NO_3$
  - (B)  $Na_2CO_3$
  - (C)  $Na_2SO_4$
  - (D) NaCl
41. Which of the following is not a magnetic material ?
- (A) Iron
  - (B) Nickel
  - (C) Cobalt
  - (D) Silver
42. Which of the following bonds would show the strongest absorption in the IR ?
- (A) Carbon-hydrogen
  - (B) Oxygen-hydrogen
  - (C) Nitrogen-hydrogen
  - (D) Sulfur-hydrogen

43. Which of the following statements is correct ?
- (A) Wavelength is directly proportional to energy
  - (B) Wavelength is directly proportional to frequency
  - (C) Wavelength is inversely proportional to frequency
  - (D) All of the above
44. What happens to the gravitational force between two objects, if the mass of one object is doubled ?
- (A) Remains same
  - (B) Becomes double
  - (C) Becomes four times
  - (D) Becomes half
45. Which of the following human activity has added the maximum carbon to the atmosphere ?
- (A) Burning of fossil fuel
  - (B) Deforestation
  - (C) Mining
  - (D) Soil erosion
46. Why is it difficult to integrate the atmospheric nitrogen in the nitrogen cycle of the biosphere ?
- (A) Few organisms can directly utilize atmospheric nitrogen gas
  - (B) Nitrogen is not abundant in the atmosphere
  - (C) Living organisms quickly absorb nitrogen gas
  - (D) Oceans quickly absorb nitrogen gas
47. The boundaries between biomes are usually seen as :
- (A) Gradual transition zones
  - (B) Abrupt changes in vegetation but not of animals
  - (C) Abrupt changes in both vegetation and animals
  - (D) Distinct topographic barriers such as mountains and rivers
48. Which one of the following is a glacier erosional feature ?
- (A) Drumlins
  - (B) Moraines
  - (C) Cirques
  - (D) Eskers
49. The "Coriolis force" is caused due to :
- (A) Wind movements
  - (B) Earth's rotation
  - (C) Cyclones
  - (D) Jet streams

50. Western disturbances originate from which sea ?  
(A) Indian Ocean (B) Arabian Sea  
(C) Dead Sea (D) Mediterranean Sea
51. How does the annual precipitation of Sriangar compare to that of Leh ?  
(A) Same (B) Lower  
(C) Higher (D) None of the above
52. Which of the following climatic controls is the most important ?  
(A) Latitude (B) Longitude  
(C) Continentality (D) Wind system
53. Correlation Coefficient varies from :  
(A) 0-1 (B) -1 to +1  
(C) -1 - 0 (D) None of the above
54. What is the standard deviation of the data set; [14, 23, 9, 12, 21, 18, 8] ?  
(A) 15.987 (B) 13.456  
(C) 5.398 (D) 7.876
55. Under what circumstances should we be cautious about using the mean as the measure of central tendency ?  
(A) When the data is skewed  
(B) When the data is positively skewed  
(C) When the data is negatively skewed  
(D) All of the above
56. Which of the following is true about the normal statistical distribution ?  
(A) 99.7% of the data lies between  $\pm 3\sigma$  of the mean  
(B) 95.4% of the data lies between  $\pm 2\sigma$  of the mean  
(C) 68.2% of the data lies between  $\pm 1\sigma$  of the mean  
(D) All of the above
57. Which of the following statements is not correct ?  
(A)  $\log(2+3) = \log(2 \times 3)$  (B)  $\log_{10} 10 = 1$   
(C)  $\log_{10} 1 = 0$  (D)  $\log(1+2+3) = \log 1 + \log 2 + \log 3$

58. What is the 30<sup>th</sup> term of the Arithmetic progression : 10, 7, 4, .... ?

(A)  $-97$

(B)  $-87$

(C)  $-77$

(D)  $-67$

59. Which of the following is not a quadratic equation ?

(A)  $x + 1/x = 5$

(B)  $(x - 3)(2x + 1) = x(x + 5)$

(C)  $(x - 2)(x + 1) = (x - 1)(x + 3)$

(D)  $(2x - 1)(x - 3) = (x + 5)(x - 1)$

60. Find the determinant of the matrix :

$$\begin{bmatrix} 5 & -2 & 3 \\ 4 & -1 & -5 \\ 6 & 7 & 9 \end{bmatrix}$$

(A) 214

(B) 300

(C) 364

(D) 376

1. Which of the following is not an operating system ?  
(A) Windows Vista (B) Red Hat Linux  
(C) Mac OS X (D) Microsoft office XP
2. The errors that can be pointed out by the compiler are :  
(A) Syntax error (B) Symantic error  
(C) Logical error (D) Internal error
3. Which of the following is not a database management system ?  
(A) Relation database management system  
(B) Object oriented database management system  
(C) Network database management system  
(D) Raster database management system
4. Which of the following performs modulation and demodulation ?  
(A) Fibre optics (B) Modem  
(C) Coaxial cable (D) Satellite
5. The rigid outer most layer of the earth is called :  
(A) Lithosphere (B) Outer core  
(C) Asthenosphere (D) Mantle
6. The Moho is located between :  
(A) Inner and outer core  
(B) Crust and Mantle  
(C) Lithosphere and Asthenosphere  
(D) Continental slope and abysmal plain
7. The most common mineral in the earth's crust is :  
(A) Olivine (B) Feldspar  
(C) Quartz (D) Hornblende
8. Fossils are most common in which type of the rocks ?  
(A) Igneous (B) Sedimentary  
(C) Metamorphic (D) All of the above

9. Which of the following is a measure of soil conservation ?
- (A) Mulching (B) Tillage cropping  
(C) Check dams (D) All of the above
10. Land capability classification is based on which of the following properties ?
- (A) Soil fertility, climate, topography and water availability  
(B) Geology, land degradation, weathering and geomorphology  
(C) Climate, vegetation, glaciers, population  
(D) None of the above
11. Soil erosion is associated with :
- (A) Dunes and heaving  
(B) Rills and ravines  
(C) Floods and water logging  
(D) Landslides and avalanches
12. Soil texture influences which of the following ?
- (A) Hydrologic properties (B) Climatic processes  
(C) Tectonic processes (D) Magmatic properties
13. Microwaves used in remote sensing have :
- (A) Nanometer wavelength (B) Micrometer wavelength  
(C) Centimeter wavelength (D) All of the above
14. Digital Elevation Model is a representation of :
- (A) Electromagnetic radiation (B) Surface topography  
(C) Mountain orography (D) Land surface processes
15. Which of the following is an example of the high spatial resolution satellite ?
- (A) NOAA (B) MODIS  
(C) LANDSAT (D) IKONOS
16. Global Positioning System is used for determining the :
- (A) Location and altitude (B) Crustal deformation  
(C) Height of the tree canopies (D) All of the above

17. Lysimeter is used to measure :
- (A) Precipitation (B) Soil moisture  
(C) Evaporation (D) Evapo-transpiration
18. What does a hietograph display ?
- (A) Variations in snowfall over time  
(B) Variations in river discharge over time  
(C) Variations in water temperature over time  
(D) Variations in rainfall over time
19. Hard water contains high concentration of:
- (A) Silicon (B) Lead  
(C) Cadmium (D) Calcium
20. Hydropower potential estimation is dependent on :
- (A) Head (B) Stream flow and velocity  
(C) Gravity (D) All of the above
21. Which of the following international conventions is for the protection of Ozone layer ?
- (A) UNFCCC (B) CBD  
(C) UNCCD (D) None of the above
22. The algal bloom in the lakes is due to :
- (A) Increase in the greenhouse gases attributed to Climate change  
(B) Explosive increase in Cyanobacteria  
(C) Growth of certain fungi in humid conditions  
(D) Excessive loading of heavy metals
23. The J&K and other Himalayan states are highly vulnerable to earthquake disasters because of :
- (A) The high relief and mountainous terrain  
(B) The stress generated by continued northward movement of the Indian plate  
(C) The high volcanic activity in the region  
(D) The tempering of nature by humans

24. Snow and glacier melt constitutes :
- (A) Almost half of the stream-flow discharge in J&K state
  - (B) The entire stream-flow discharge in the J&K state
  - (C) Negligible proportion of the stream-flow discharge in the J&K state
  - (D) None of the above
25. Which of the following is an example of Choropleth maps ?
- (A) Population density map
  - (B) Drainage map
  - (C) Digital elevation model
  - (D) Satellite image
26. As per the 2011 census, what is the population of J&K state ?
- (A) 10.90 million
  - (B) 11.20 million
  - (C) 18.5 million
  - (D) 12.5 million
27. Changthang wildlife sanctuary hosts which of the following wildlife ?
- (A) Snow leopard and Ibex
  - (B) European red deer and brown bear
  - (C) Black bear and Musk deer
  - (D) All of the above
28. Which of the rivers in the state has the highest hydropower energy potential ?
- (A) Jhelum
  - (B) Chenab
  - (C) Indus
  - (D) Tawi
29. The enzyme that fixes atmospheric CO<sub>2</sub> in C<sub>4</sub> plants is :
- (A) Aldolase
  - (B) Hydrogenase
  - (C) PEP carboxylase
  - (D) RUBP carboxylase
30. What is the primary route of mineral absorption by roots ?
- (A) Root hairs
  - (B) Cortex of the root
  - (C) Epidermis of the root
  - (D) Casparian strips
31. Epigeal germination is found in :
- (A) Pea
  - (B) Gram
  - (C) Castor
  - (D) Jowar

32. During cellular respiration, NADH is :
- (A) Used in electron transport system
  - (B) Converted to NAD<sup>+</sup> by an enzyme called dehydrogenase
  - (C) Reduced to form NAD<sup>+</sup>
  - (D) None of the above
33. Geographically India falls in which of the major biomes of the world ?
- (A) Tropical rain forest
  - (B) Tropical dry forest
  - (C) Tropical savannah
  - (D) Tundra
34. Which of the following is false ?
- (A) The thyroid gland secretes calcitonin
  - (B) Thyroxin is formed by iodination of tyrosine
  - (C) A hormone may be secreted by nerve cells
  - (D) Melatonin is secreted by pituitary gland
35. The scientific name of Kashmir stag (Hangul) is :
- (A) *Moschus fuscus hanglu*
  - (B) *Cervus elaphus hanglu*
  - (C) *Muntiacus muntjac hanglu*
  - (D) *Cervicapra hanglu*
36. Cholecystokinin hormone is produced in :
- (A) The stomach
  - (B) The pancreas
  - (C) The small intestines
  - (D) The mouth
37. Which of the following are not electromagnetic waves ?
- (A) Cosmic rays
  - (B) X-rays
  - (C) Gamma rays
  - (D) Beta rays
38. If the distance between the sun and the earth is increased by three times, then the attraction between the two will :
- (A) Remain constant
  - (B) Decrease by 63%
  - (C) Decrease by 89%
  - (D) Decrease by 73%

39. When the amount of work done is 333 cal and increase in internal energy is 167 cal, then the heat supplied is :
- (A) 500 cal (B) 433 cal  
(C) 333 cal (D) 167 cal
40. Both electric and magnetic fields in an electromagnetic waves are :
- (A) Perpendicular to the direction of the propagation of wave  
(B) Parallel to the direction of the wave propagation  
(C) Opposite the direction that the wave travels  
(D) Tangential to the direction that the wave travels
41. What is the electronic configuration of Co ?
- (A) [Ar] 4s<sup>2</sup> 3d<sup>10</sup> (B) [Ar] 4s<sup>2</sup> 3d<sup>2</sup>  
(C) [Ar] 4d<sup>1</sup> 3d<sup>3</sup> (D) [Ar] 3d<sup>7</sup> 4s<sup>2</sup>
42. If both, the pressure and volume of a gas are doubled, how will the absolute temperature change ?
- (A) It will increase by two times its original value  
(B) It will decrease to one fourth of its original value  
(C) It will stay the same as its original value  
(D) It will increase by four times its original value
43. Which among the following does not have the hydrogen bond ?
- (A) Phenol (B) Liquid NH<sub>3</sub>  
(C) Liquid HCl (D) Water
44. The oxidation number of Carbon in CH<sub>2</sub>O is :
- (A) -2 (B) +2  
(C) 0 (D) +3
45. The Ozone layer is found in :
- (A) Troposphere (B) Stratosphere  
(C) Thermosphere (D) Mesosphere

46. Which of the following is not a Greenhouse gas ?
- (A) Carbon dioxide (B) Carbon monoxide  
(C) Methane (D) Chlorofluorocarbons
47. Black carbon enhances the melting of Himalayan glaciers as the black carbon deposition :
- (A) Decreases the albedo causing positive radiative forcing  
(B) Increases the albedo causing negative radiative forcing  
(C) Results in acid rains in the ablation zone  
(D) None of the above
48. Which one of the following is an important minor forest produce in Kashmir Himalayas ?
- (A) Bamboo (B) Mushrooms  
(C) Dioscorea (D) None of the above
49. Isohytes are the lines joining the points of equal :
- (A) Temperature (B) Height  
(C) Pressure (D) Precipitation
50. Carbon sequestration is achieved through :
- (A) Rocks (B) Soils  
(C) Plants (D) All of the above
51. The pace of the anthropogenic climate change can be reduced by :
- (A) The use of renewable sources of energy  
(B) Reducing the deforestation  
(C) Reducing the use of fossil fuels  
(D) All of the above
52. The climate of the Kashmir valley is determined by :
- (A) Westerlies (B) Trade winds  
(C) Monsoons (D) None of the above

1. Which of the following is an internet browser ?
  - (a) Chrome
  - (b) Internet Explorer
  - (c) Firefox
  - (d) All of the above
  
2. DBMS don't use which of the following database structure ?
  - (a) Hierarchical model
  - (b) Network model
  - (c) Topologic model
  - (d) Relational model
  
3. Which of the following is an example of the spreadsheet software ?
  - (a) MS Excel
  - (b) Lotus
  - (c) Xoom Office
  - (d) All of the above
  
4. Bytecode is :
  - (a) A compiler that produces an independent executable file
  - (b) Is not a machine code and thus, not tied to any particular hardware
  - (c) A data type in C programming language
  - (d) A database Management System
  
5. Horn, Col, Cirque and Arete are associated with landforms produced by :
  - (a) Running water
  - (b) Ground water
  - (c) Wind action
  - (d) Glaciers
  
6. A rock dominated in composition by Quartz and Feldspar is :
  - (a) Basalt
  - (b) Dunite
  - (c) Granite
  - (d) Periodolite
  
7. Which of the following rocks has higher porosity but lower permeability ?
  - (a) Limestone
  - (b) Sandstone
  - (c) Conglomerate
  - (d) Shale

8. Which of the following explains the build up and release of stress during an earthquake ?
- (a) The modified Mercalli scale      (b) The elastic rebound theory  
(c) The principle of superposition      (d) The travel difference
9. Which of the following agents of erosion shall be dominant in arid environments ?
- (a) Water      (b) Wind  
(c) Gravity      (d) Ice
10. Land use and Land cover information can be generated through :
- (a) Remote sensing      (b) GIS  
(c) Topographic surveys      (d) GPS
11. In chemical weathering, which of the following processes are important ?
- (a) Hydrolysis      (b) Oxidation  
(c) Dissolution      (d) All of the above
12. Peat soils have :
- (a) High carbon content      (b) Low carbon content  
(c) High sand content      (d) None of the above
13. Radar remote sensing sensors :
- (a) Can see through clouds  
(b) Can penetrate water surface  
(c) Are passive sensor  
(d) Operate in the visible part of the spectrum
14. The components of a typical Geographic Information System are :
- (a) Hardware, software, data and users  
(b) Satellites, computers, printers and models  
(c) GPS, remote sensing, digital cartography and image processing  
(d) Computers, DEM, applications and GPS

15. Digital Elevation Model can be generated from :
- (a) Stereo images
  - (b) GPS measurements
  - (c) Contour lines
  - (d) All of the above
16. Vector GIS data model is suitable for :
- (a) Network analysis
  - (b) Slope analysis
  - (c) Digital cartography
  - (d) Aspect analysis
17. Thiessen polygons describe :
- (a) A network of rainfall gauges
  - (b) Contours of equal rainfall across an area
  - (c) Polygons that contribute to excess overland flow
  - (d) Polygons created by drawing straight lines at equal distance between points
18. What does a hydrograph display ?
- (a) Variations in snowfall over time
  - (b) Variations in river discharge over time
  - (c) Variations in water temperature over time
  - (d) Variations in rainfall over time
19. Evaporation pans provide an approximate estimate of :
- (a) Actual transpiration
  - (b) Actual evaporation
  - (c) Potential evapo-transpiration
  - (d) Actual evapo-transpiration
20. One-in-100-year flooding event means :
- (a) Flood will occur once in 100 years
  - (b) There is 1% chance of a flooding occurring in any given year
  - (c) There is high probability of the biggest of the 100 years flood occurring this year
  - (d) There is high chance of flooding occurring once every year
21. Which of the following is not a major green house gas ?
- (a) Water vapour
  - (b) Carbon dioxide
  - (c) Methane
  - (d) Nitrogen

22. The State of J&K is vulnerable to the following hydrological disaster :
- (a) Earthquake
  - (b) Flooding
  - (c) Landslides
  - (d) Tsunamis
23. Millennium development goals that all nation states have agreed to :
- (a) Address climate change issues
  - (b) Address Biodiversity conservation issues
  - (c) Combat desertification in the developing countries
  - (d) Encourage development to improve the socio-economic conditions in the poorest countries
24. The human interference in the nitrogen cycle has led to :
- (a) Eutrophication of lakes
  - (b) Increased acid rains
  - (c) Nitrous oxide release
  - (d) All of the above
25. Which of the following is not an essential element of the map composition ?
- (a) Legend
  - (b) Scale
  - (c) Direction
  - (d) Path/row
26. In J&K State, the dominant forest type is :
- (a) Himalayan moist temperate forest
  - (b) Himalayan dry temperate forest
  - (c) Sub tropical dry evergreen forest
  - (d) All of the above
27. Black-necked crane is found in which of the following wildlife parks ?
- (a) Dachigam
  - (b) Kishtwar
  - (c) Changthang
  - (d) Hemis
28. The State has an identified potential for geothermal energy in :
- (a) Kashmir Valley
  - (b) Puga valley
  - (c) Chinta valley
  - (d) Suru valley
29. Genetic Engineering allows us to directly manipulate :
- (a) RNA
  - (b) DNA
  - (c) Cell membranes
  - (d) Bacteria

30. The biome that is characterized by long winters and short growing season :
- (a) Tundra (b) Taiga  
(c) Savannah (d) Tropical rainforests
31. Which of the following forms of vegetation would probably appear first on the bare rocks ?
- (a) Lichens (b) Weeds  
(c) Shrubs (d) Trees
32. AP2, AG and TFL1 are genes involved in :
- (a) Seed maturation (b) Flower development  
(c) Germination (d) Light response
33. Which of the following enzymes is present in secretions of mouth, stomach and pancreas ?
- (a) Amylase (b) Trypsin  
(c) Lipase (d) Lactase
34. Hormones :
- (a) Are chemical regulators that are conveyed from one organ to another through blood stream  
(b) May be secreted by endocrine cells  
(c) May be secreted by nerve cells  
(d) All of the above
35. Which of the Fauna of the Jammu and Kashmir State is endangered/threatened ?
- (a) Ibex (b) Tibetan antelope  
(c) Snow leopard (d) All of the above
36. Nearctic zoo-geographic realm mostly encompasses :
- (a) North American continent (b) South American continent  
(c) African continent (d) Australian continent

37. Which of the following forms of energy has potential to mitigate the climate change impacts ?
- (a) Hydropower energy                      (b) Solar energy  
(c) Wind energy                                (d) All of the above
38. Sound travels in air as :
- (a) Electromagnetic waves                (b) Longitudinal waves  
(c) Transverse waves                        (d) Matter waves
39. The Stephen Boltzmann's law states that the total emitted radiation from a black body is proportional to :
- (a) Square of its absolute temperature  
(b) Cube of its absolute temperature  
(c) Fourth power of its absolute temperature  
(d) Square of its area
40. A rubber ball is dropped from a height of 5 m on a planet where the acceleration due to gravity is unknown. On bouncing, it rises to 1.8 m, the ball loses its velocity on bouncing by a factor of :
- (a)  $2/25$                                         (b)  $1/5$   
(c)  $3/5$                                         (d)  $9/25$
41. Which one among the following does not have the hydrogen bond ?
- (a) Phenol                                        (b) Liquid ammonia  
(c) Water                                         (d) Liquid HCL
42. If both, the pressure and volume of a gas are doubled, how will the absolute temperature change ?
- (a) It will increase by two times its original value  
(b) It will decrease to one fourth of its original value  
(c) It will stay the same as its original value  
(d) It will increase by four times its original value

43. Using your knowledge of the Coulomb's law, which of the following atoms has the largest diameter ?
- (a) I (b) Br  
(c) Cl (d) F
44. What is the most likely electron configuration for a Silicon atom in its ground state ?
- (a)  $1s^2 2s^2 2p^6 3s^2 3p^1$  (b)  $1s^2 2s^2 2p^6 3s^2 3p^2$   
(c)  $1s^2 2s^2 2p^6 3s^2 3d^4$  (d)  $1s^2 2s^2 2p^6 3s^2 3p^5$
45. The upper boundary of the stratosphere is called :
- (a) Tropopause (b) Stratopause  
(c) Thermosphere (d) Mesopause
46. Which of the following country is the largest contributor of Green House Gases ?
- (a) India (b) China  
(c) USA (d) Brazil
47. Smog is a type of :
- (a) Storm (b) Hail storm  
(c) Fog which is mixed with smoke (d) Cloud
48. The colder winter across the Northern Hemisphere this year is attributed to :
- (a) Strong ENSO (b) Strong La-Nina  
(c) Volcanic eruptions in Indonesia (d) Lower global GHG emissions
49. An environmental flow is the water regime provided within a river, wetland or coastal zone to :
- (a) Maintain healthy aquatic ecosystems and ensure sustainability of their services  
(b) Promote ecotourism and water sports  
(c) Round the year hydropower generation  
(d) Promote climate change mitigation and adaptation

50. Which of the following is the largest reservoir of Carbon ?
- (a) Oceans (b) Soils  
(c) Plants (d) Atmosphere
51. Himalayas, the Water Tower of Asia and forming the headwaters of almost all the major rivers in Asia, has an approximate glacier coverage of :
- (a) 1,00,000 sq km (b) 50,000 sq km  
(c) 10,000 sq km (d) 5,000 sq km
52. Which of the following Minor forest produce is obtained from Pinus Roxburghii in Jammu region :
- (a) Olive (b) Resin  
(c) Oleander (d) Dioscorea
53. Which of the following is false about the Correlation Coefficient ?
- (a) Varies between 0 to 1  
(b) Describes degree of association between two variables  
(c) A positive value indicates a rise in one variable accompanies a rise in the other  
(d) Is denoted by the symbol "r"
54. Marks of the Geoinformatics paper follow a normal distribution with a mean of 65 and a standard deviation of 12. Approximately what proportion of the students have scores below 50 ?
- (a) 11% (b) 89%  
(c) 15% (d) 51%
55. Which of the following statement is false ?
- (a) The median is always greater than the mean  
(b) The first quartile is equal to the twenty-fifth percentile  
(c) In a symmetric distribution, the mean and the median are equal  
(d) In a symmetric distribution, the median is halfway between the first and the third quartiles

56. Which of the following statement is false ?
- (a) In random sampling, every element of the population has a known and equal chance of being selected
  - (b) Convenience sampling often leads to bias in estimate because sample is often not representative of the population
  - (c) In random sampling, the precision of a sample mean or sample proportion depends only upon the sample size (and not on the population size)
  - (d) If a sample of 100,000 pixels is randomly selected from a satellite image (with 15 million pixels) and the average pixel value is computed, then the true pixel value of all the pixels in the image is known
57. If  $x = 1$  is a common root of the equations  $ax^2 + ax + 3 = 0$  and  $x^2 + x + b = 0$ , then  $ab = ?$
- (a) 3
  - (b) 3.5
  - (c) 6
  - (d) 4
58. The value of  $k$  for which the system of equations  $3x + 5y = 0$  and  $kx + 10y = 0$  has non-zero solution is :
- (a) 3
  - (b) 5
  - (c) 6
  - (d) 10
59. If  $A$  is a matrix of order  $2 \times 3$  and  $B$  is a matrix of order  $3 \times 5$ , what is the order of matrix  $(AB)^T$  ?
- (a)  $2 \times 5$
  - (b)  $3 \times 5$
  - (c)  $5 \times 3$
  - (d)  $5 \times 2$
60. The first and last terms of an arithmetic progression are 1 and 11. If some of its terms is 36, then the number of terms will be :
- (a) 7
  - (b) 6
  - (c) 9
  - (d) 11

# Geoinformatics - 2010

M.Sc. Geoinformati

1. The main components of the computer communicate with each other through :  
(a) Monitor (b) Keyboard  
(c) Memory (d) System bus
2. Who suggested the "stored program concept" :  
(a) John Von Neumann (b) Howard Aiken  
(c) Herman Hollerith (d) Charles Babbage
3. A computer on the network that is used for sharing resources with others is called :  
(a) Workstation (b) Client  
(c) Server (d) Mainframe
4. What is the maximum data capacity of the optical fiber cable :  
(a) 10 mbps (b) 1000 mbps  
(c) 10000 mbps (d) 20000 mbps
5. Which of the following is not a DOS command ?  
(a) Delete (b) CP  
(c) remove (d) None of the above
6. A grid of cells and columns for input of data in a spreadsheet is called :  
(a) File (b) Table  
(c) Worksheet (d) Workbook
7. A pictorial representation of the algorithm is called :  
(a) Word processor (b) Spreadsheet  
(c) Flowchart (d) Graphic User Interface
8. In order to make a design template for powerpoint presentation, we use :  
(a) Slide master (b) Slide sorter  
(c) Slide viewer (d) All of the above
9. The binary code, made up of only 1 and 0, for 47 is :  
(a) 00111000 (b) 00111100  
(c) 00111101 (d) 00111111

10. All the layouts, text and displays in a website are programmed using :
- (a) HTML
  - (b) SGML
  - (c) XML
  - (d) All of the above
11. Universe began :
- (a) 4.2 billion years ago
  - (b) 10 - 15 billion years ago
  - (c) 1.9 billion years ago
  - (d) 6 -7 billion years ago
12. Which of the following divisions of the geologic time scale is an era of the phanerozoic eon :
- (a) Paleozoic
  - (b) Paleocene
  - (c) Permian
  - (d) Proterozoic
13. On an average, how thick is the crust of earth ?
- (a) 100 km
  - (b) 40 km
  - (c) 10 km
  - (d) 82 km
14. All life forms on the earth are referred by :
- (a) Hydrosphere
  - (b) Biosphere
  - (c) Atmosphere
  - (d) Exosphere
15. The core of earth is thought to be composed of :
- (a) Granite
  - (b) Basalt
  - (c) Iron - Nickel alloy
  - (d) Peridotite
16. The amount of ground displacement in an earthquake is called the :
- (a) Dip
  - (b) Slip
  - (c) Epicentre
  - (d) Focus
17. Which of the following statement is true ?
- (a) Most earthquakes occur at plate boundaries
  - (b) Earthquakes can be caused by normal, reverse and thrust faulting
  - (c) P waves travel faster than both S waves and surface waves
  - (d) All of the above
18. Radiometric dating is least useful for dating :
- (a) Metamorphic rocks
  - (b) Sedimentary rocks
  - (c) Granitic rocks
  - (d) All types of rocks

19. Which type of glaciers are common in the Kashmir Himalayas ?
- (a) Cirque glaciers (b) Valley glaciers  
(c) Alpine glaciers (d) All of the above
20. Marble is a metamorphic rock that forms from :
- (a) Limestone (b) Granite  
(c) Sandstone (d) Shale
21. Diamond is an example of what type of bonding ?
- (a) Covalent (b) Metallic  
(c) Ionic (d) None of the above
22. Ozone hole, formed due to CFCs emissions, is developed over earth's polar regions in:
- (a) Mesosphere (b) Thermosphere  
(c) Stratosphere (d) Troposphere
23. Mechanical weathering produces :
- (a) Clay minerals (b) Smaller particles  
(c) Quartz (d) All of the above
24. Thrust fault is a :
- (a) Low angle reverse fault (b) Low angle strike slip fault  
(c) Low angle normal fault (d) High angle reverse fault
25. Which of the following rocks have not been reported from Kashmir :
- (a) Precambrian (b) Permian  
(c) Triassic (d) Jurassic
26. Kyoto protocol is linked to :
- (a) UNCCD (b) UNFCCC  
(c) UNCBD (d) Montreal Protocol
27. Which of the following is not an indicator of climate change :
- (a) Glacier recession (b) Change of seasons  
(c) Shrinking of wetlands (d) Avalanches

28. A hydrograph is a plot of :
- (a) discharge versus time                      (b) rainfall intensity versus time  
(c) rainfall depth versus duration            (d) cumulative rainfall versus time
29. Topographic maps are generated using :
- (a) GPS    (b) GPRS  
(c) Tachometer                                    (d) Odometer
30. Panjal Traps mainly consist of :
- (a) Granite                                        (b) limestone  
(c) Basalt    (d) All of the above
31. Which of the following is not a measure of the central tendency ?
- (a) Mean    (b) Mode  
(c) Median                                         (d) Standard deviation
32. Scatterplots are used to show relationship between :
- (a) Mean and standard deviation of the data  
(b) Histogram and variance  
(c) Any two variables  
(d) All of the above
33. The distribution of heights of students in a class is roughly bell-shaped. Moreover, the average height is 68 inches and approximately 95% of the heights are between 62 and 74 inches. The standard deviation of the height distribution is approximately :
- (a) 12    (b) 9  
(c) 6    (d) 3
34. If  $n$  is a positive integer such that  $n! / (n-2)! = 342$ , find  $n$  :
- (a) 15    (b) 19  
(c) 17    (d) 18
35. For what value of  $k$  will the two equations  $2x + 4 = 4(x - 2)$  and  $-x + k = 2x - 1$  have the same solution ?
- (a) 11    (b) 7  
(c) -11    (d) 17

36. If  $x$  is a negative number, which of the following must be true ?
- I.  $x^5 < |x|$
  - II.  $x < \sqrt{-x}$
  - III.  $x - 1/|x| < 0$
- (a) II and III only                      (b) I, II and III  
(c) I and II only                         (d) I and III only
37. What is the sum of the reciprocals of the solutions to the equation  $x^2 - (3/5)x = -11/3$  ?
- (a)  $3/11$                                       (b)  $9/33$   
(c)  $9/55$                                       (d)  $55/33$
38. The amount of a radioactive material decays according to the formula  $A(t) = A_0 e^{-kt}$  where,  $A_0$  is the initial amount,  $k$  is a positive constant and  $t$  is the time in days. Find a formula for the half life of the material :
- (a)  $T = \ln 2/k$                               (b)  $T = \ln 4/k$   
(c)  $T = \ln k/10$                               (d) None of the above
39. The level of sound  $D$  in decibels is defined as  $D = 10 \log(I / 10^{-16})$ , where  $I$  is the sound intensity in watts/cm<sup>2</sup>. Determine the level in decibels of a sound with intensity  $I = 10^{-8}$  watts/cm<sup>2</sup> :
- (a) 60 decibels                              (b) 80 decibels  
(c) 120 decibels                              (d) 10 decibels
40. Find the 10<sup>th</sup> term of a geometric sequence if  $a_1 = 45$  and the common ratio  $r = 0.2$  :
- (a)  $4.601 \times 10^{-2}$                               (b)  $2.304 \times 10^{-25}$   
(c)  $2.304 \times 10^{-5}$                               (d)  $2.304 \times 10^{-9}$
41. Two waves of same wavelength and amplitude interfere to produce a minimum when phase difference is :
- (a) 0    (b)  $\pi/2$   
(c)  $\pi$     (d)  $3\pi/2$
42. In electric wires, copper is used for electric conduction mainly because :
- (a) It has low electrical resistivity      (b) It is cheaper  
(c) It is very durable and light          (d) It has a high melting point

43. The path of charged particle moving in a magnetic field can be :
- (a) Straight line                      (b) Helix  
(c) Circle                                (d) All of the above
44. Earth Observation Satellites use which part of electromagnetic radiation for remote sensing :
- (a) Gamma rays                        (b) Cosmic rays  
(c) Sunlight                              (d) Radio waves
45. Which of the following is not a renewable source of energy ?
- (a) Ocean currents                      (b) Biomass  
(c) Geothermal                         (d) Uranium
46. Rutherford's experiment, which established the nuclear model of the atom, used a beam of :
- (a) Helium nuclei                        (b) Helium atoms  
(c) Beta particles                        (d) Gamma rays
47.  $\text{NH}_4\text{Cl}$  contains :
- (a) Covalent bond                        (b) Ionic bond  
(c) Coordinate covalent bond        (d) All of the above
48. Which of the following is not a salt ?
- (a) Lead sulphide                        (b) Sodium chloride  
(c) Slaked lime                            (d) Zinc nitrate
49. Atmospheric chemistry includes study of aerosols which are responsible for :
- (a) Global warming and climate change  
(b) Scattering of incoming solar radiation  
(c) Weather of earth system  
(d) All of the above
50. Which among the following oxides of nitrogen on dissolution in water produces an acid which can act as, both, reducing and oxidizing agent ?
- (a)  $\text{NO}$                                       (b)  $\text{N}_2\text{O}_3$   
(c)  $\text{NO}_2$                                       (d)  $\text{N}_2\text{O}_5$

51. The wool for the shahtoosh shawls is obtained from :
- (a) Red deer (b) Tibetan antelope  
(c) Barking deer (d) Wild goat
52. Which of the following minor forest produce in J & K has tremendous economic and medicinal importance ?
- (a) Hazel nut (b) Dioscorea  
(c) Resin (d) Oleander
53. Genetic engineering has established its applications in the field of :
- (a) Food production and food security  
(b) Population control  
(c) Renewable energy generation  
(d) All of the above
54. A cell has mitochondria, ribosomes, smooth and rough ER, and other parts. Based on this information, it could not be :
- (a) A cell from a pine tree (b) A grasshopper cell  
(c) A yeast (fungus) cell (d) A bacterium
55. In nutrient cycles in general, the minerals tend to be dispersed through :
- (a) Evaporation (b) Assimilation  
(c) Conduction (d) Surface and Sub-surface runoff
56. Which of the following are floating ocean plants and animals ?
- (a) Nekton (b) Plankton  
(c) Benthos (d) terrenus
57. Which of the following is a correct reaction for photosynthesis ?
- (a)  $6\text{CO}_2 + \text{C}_6\text{H}_{12}\text{O}_6 + \text{solar energy} = 6\text{O}_2 + 6\text{H}_2\text{O}$   
(b)  $6\text{H}_2\text{O} + 6\text{CO}_2 + \text{solar energy} = \text{C}_6\text{H}_{12}\text{O}_6 + 6\text{O}_2$   
(c)  $6\text{H}_2\text{O} + \text{C}_6\text{H}_{12}\text{O}_6 + \text{solar energy} = 6\text{O}_2 + 6\text{CO}_2$   
(d)  $6\text{H}_2\text{O} + 6\text{O}_2 + \text{solar energy} = \text{C}_6\text{H}_{12}\text{O}_6 + 6\text{CO}_2$
58. Fungi and bacteria, which breakdown organic matter and return nutrients to the soil, are called :
- (a) Decomposers (b) Autotrophs  
(c) Imposters (d) Producers

59. The loss of energy from one trophic level to the next is an example of :

- (a) The law of conservation of matter
- (b) The First law of thermodynamics
- (c) The Second law of thermodynamics
- (d) The recycling of nutrients

60. Which of the following is a Ramsar Site in J & K ?

- (a) Dal lake
- (b) Gangabal lake
- (c) Manasbal lake
- (d) Tsomoriri lake
